About Us

Environ Metal Designs is a metal fabricator specialised in contemporary and functional architectural products made for residential and commercial projects.

Based in Melbourne, we are a team of experienced metal fabricators, engineers, and technicians working their best to provide high-quality and custom aluminium products made for construction professionals working on high-profile projects.

Why choose our balustrades?

Designed for Builders, made for homes

Our Balustrades are lightweight and can be adapted to various building site environments. They comply with Australian safety standards and can be easily installed using established construction techniques. We consider both practical and architectural requirements when creating products for high-profile projects.

Quality product and services

Our team takes pride in delivering products and services that not only meet but exceed our customers' expectations. We continuously work towards improving and innovating our products to ensure that our customers receive the best product quality and technical advice possible.

Easy installation backed by on-site support

Installing our balustrades is easy even for those with limited construction experience, thanks to our detailed site installation map and user-friendly components. And if you encounter any difficulties during the installation process, our on-site support and guidance services are readily available to assist your team.

Collaboration

Our core principles are centered around fostering a culture of progress and collaboration. We encourage our team to think outside of the box, explore new ideas, and constantly challenge themselves to come up with practical solutions that will benefit our clients and our community.

Warranty

You can rely on a 5-year Warranty for our aluminium products. Everything is sourced and made in Australia. That means we will be right here if you ever need us.

Balustrade Guide

Create your custom balustrade

In this catalogue, you will find adaptable and customisable balustrades solutions that are easy to configure and fit various building environments. Here you have the flexibility to configure the ideal balustrade for your project.

Follow the steps below to configure your balustrade design

1. Choose a fixing solution that is most compatible with the construction environment and architectural specifications of the building and balustrade
 2. Define assembly options and panel quantities
 3. Choose a cladding design OR customise one for your project
 4. Finally, select a type of frame that can accommodate steps 1,2,3

Cladding Designs

Balustrade Cladding Design

You have the option to either customize or select from the cladding designs listed below. Our claddings are crafted for durability and safety and are designed to complement the architectural elements of most buildings. They are compatible with your selected fixing, assembly, and frame types.

Cladding position available:
60mm, 80mm, 100mm, 120mm

Cladding position available:
(Built inside frame/rail) Centered, Flush to front, and Flush to back

Abbreviations:
RHS: Rectangular Hollow Section
SHS: Square Hollow Section

TOP-SPA

TOP-MOUNTED with Spacers (TOP-SPA)

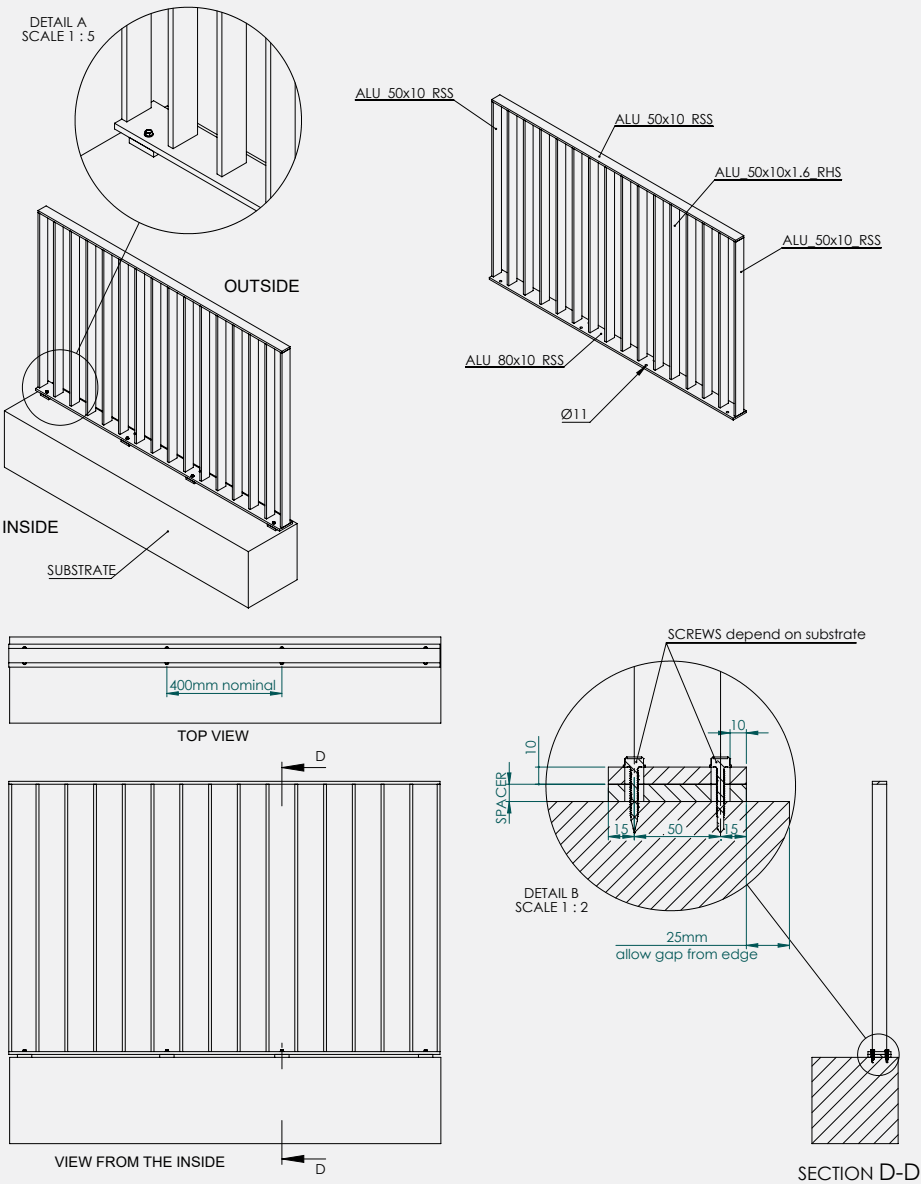

TOP-MOUNTED with Spacers

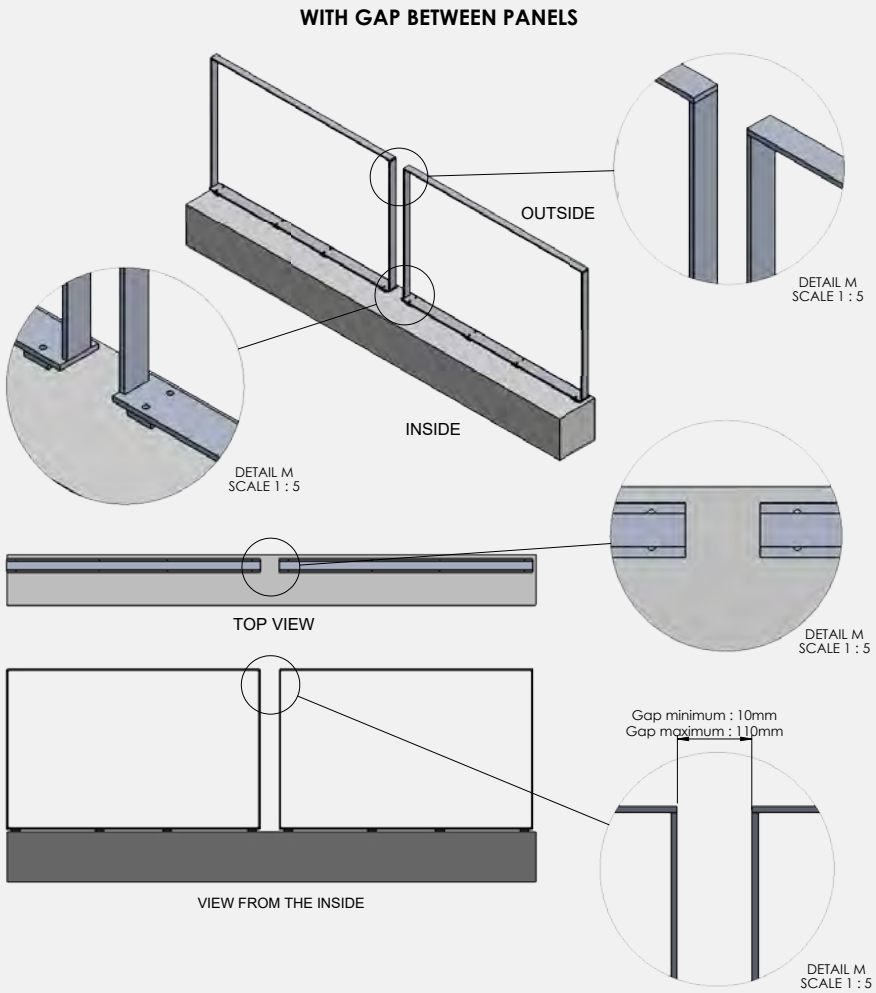

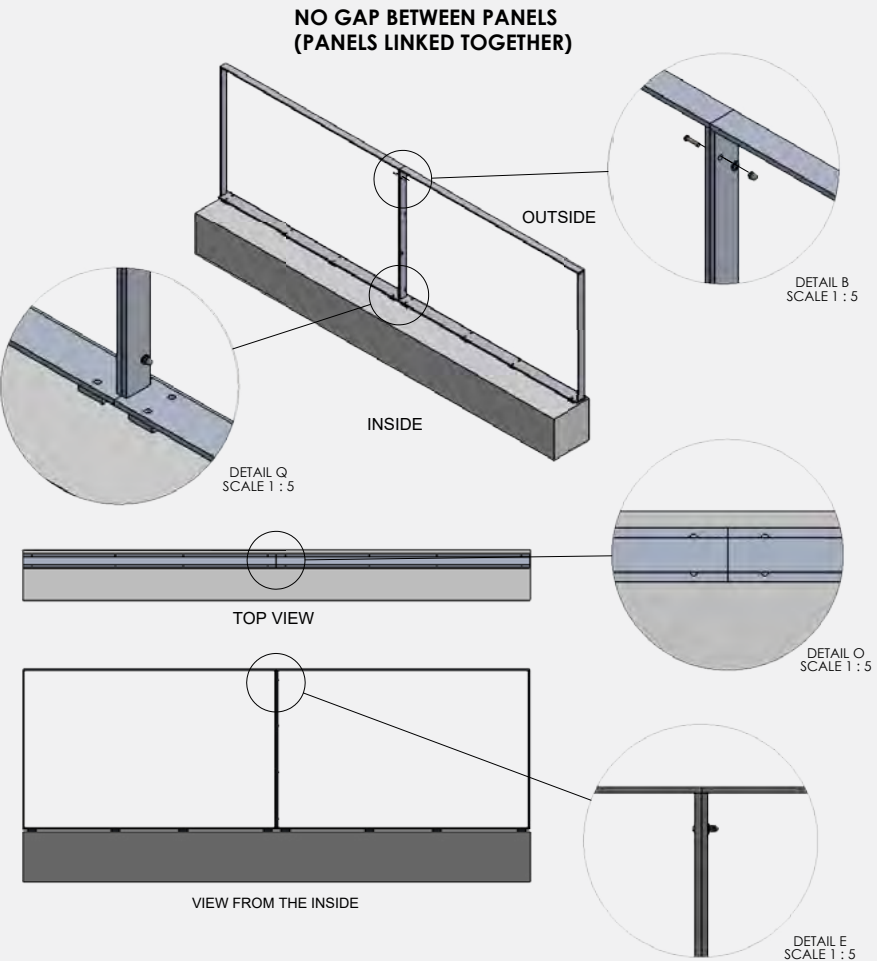

Clean and modern. This fixing solution complements the architectural elements of most buildings. Spacers allow for a subtle gap under panels and bring functionality to the design by providing effective water drainage.

		BLADE 50x10mm RHS		SLATS 50x10mm RHS		ANGLE 32x32x3mm		BATTEN 32x32x3mm SHS	
CENTERS MM	CLAD POSITION (inside rail)	GAP MM	Applicable	GAP MM	Applicable	GAP MM	Applicable	GAP MM	Applicable
100	FLUSH to BACK					68	✓		
	CENTERED	90	✓			68	✓		
	FLUSH to FRONT			50	✓	68	✓		
120	FLUSH to BACK					88	✓	88	✓
	CENTERED	110	✓			88	✓	88	✓
	FLUSH to FRONT			70	✓	88	✓	88	✓

Material	Aluminium grade 6061
Product construction	MIG welding
Anchor/Fasteners	Depend on substrate
Panel width range	500mm to 1300mm
Panel height range	1000mm to 1300mm from final floor level
Cladding position	Suitable for any cladding position
Frame options	Available for Flat Bar Full Frame and Flat Bar Fame with RHS Top Rail
Assembly options	Available for all assembly options
Finishing	Powder coated

TOP-MOUNTED No Gap

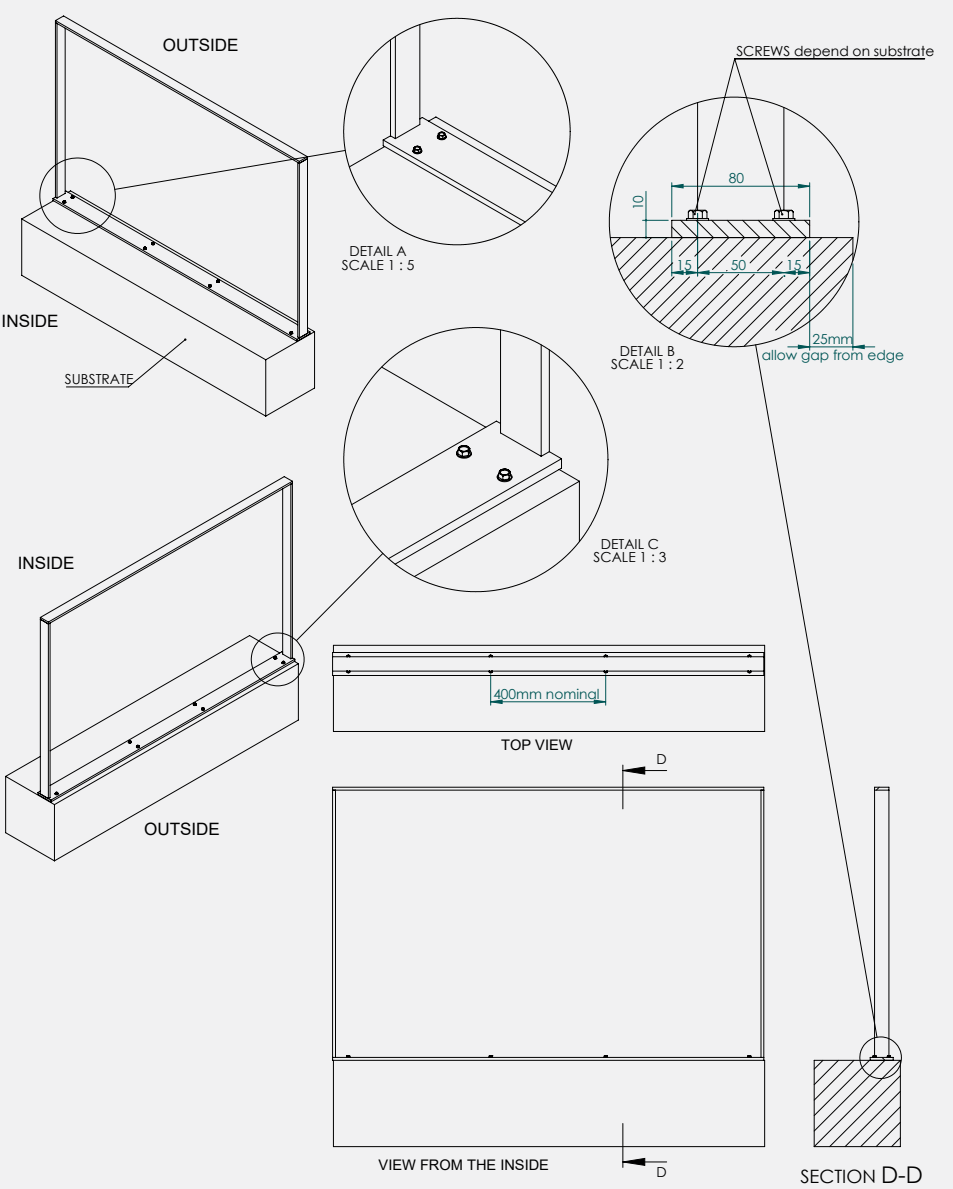

This fixing should only be installed on leveled surfaces, as the base used to fix this type of panel is a flat bar.

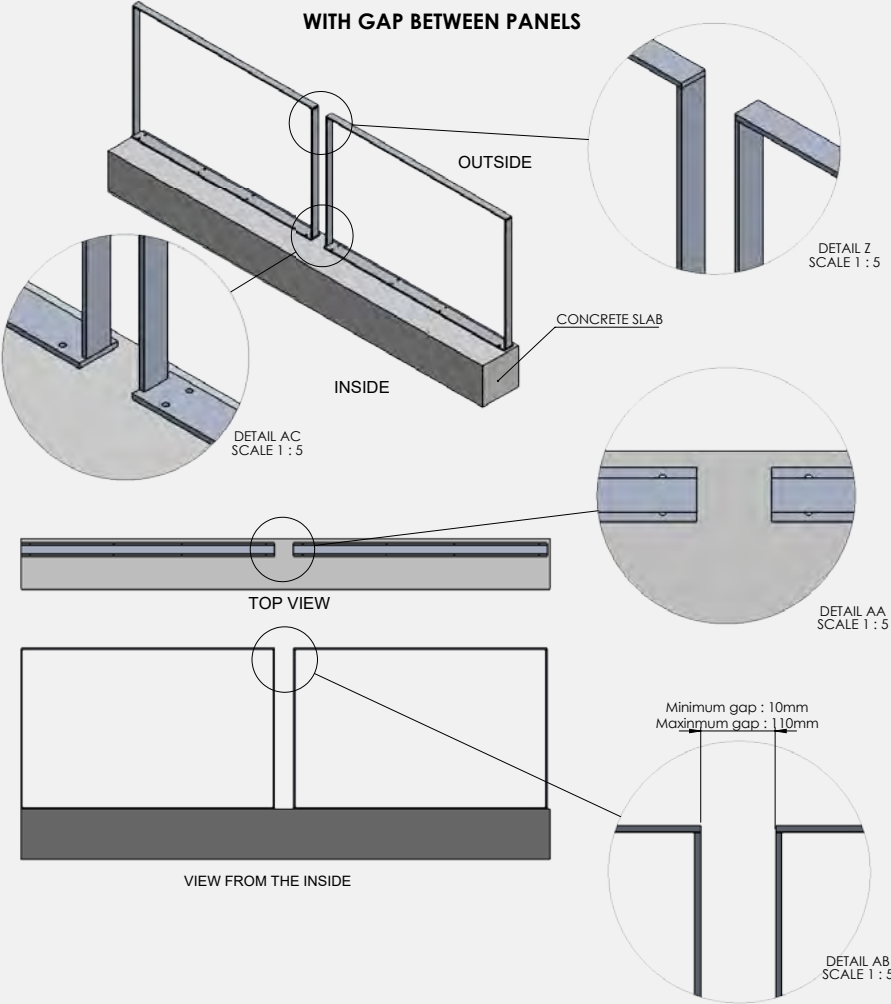

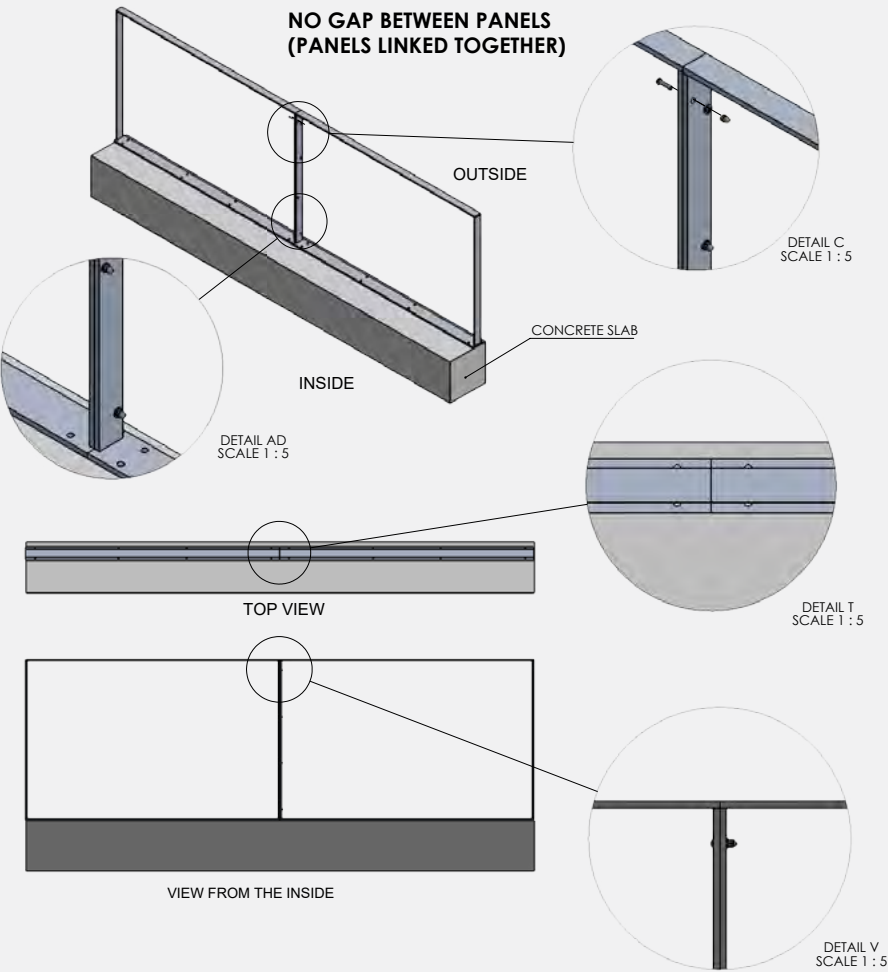

This design is an ideal solution for reducing transitioning lines between the building facade and the balustrade.

		BLADE 50x10mm RHS		SLATS 50x10mm RHS		ANGLE 32x32x3mm		BATTEN 32x32x3mm SHS

Material	Aluminium grade 6061
Product construction	MIG welding
Anchor/Fasteners	Depend on substrate
Panel width range	500mm to 1300mm
Panel height range	1000mm to 1300mm from final floor level
Cladding position	Available for all cladding positions
Frame options	Available for all frame types
Assembly options	Available for all assembly options
Finishing	Powder coated

TOP-TIL

TOP-MOUNTED for tile pod (TOP-TIL)

TOP-MOUNTED for Tile Pod

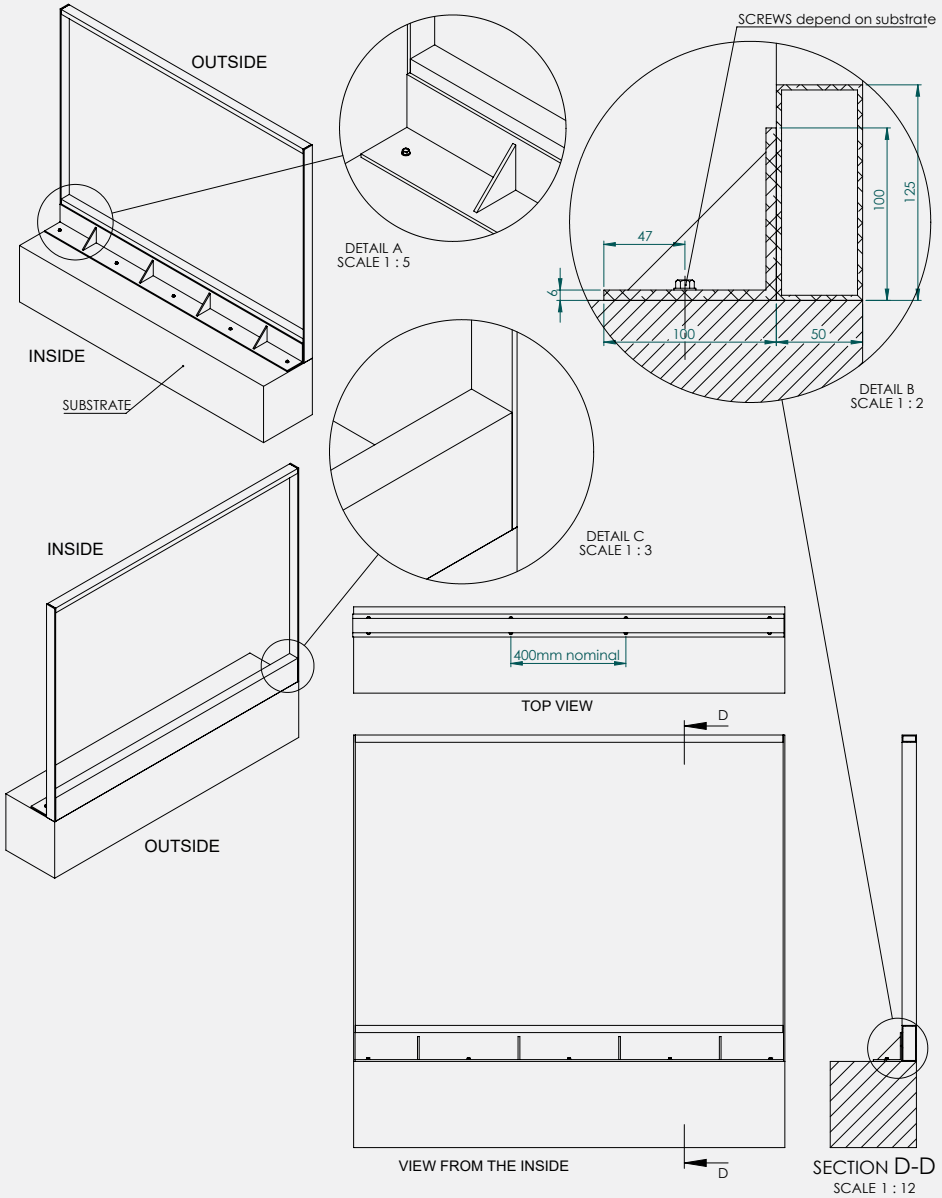

To be fixed on top of the concrete slab in preparation for tiling.

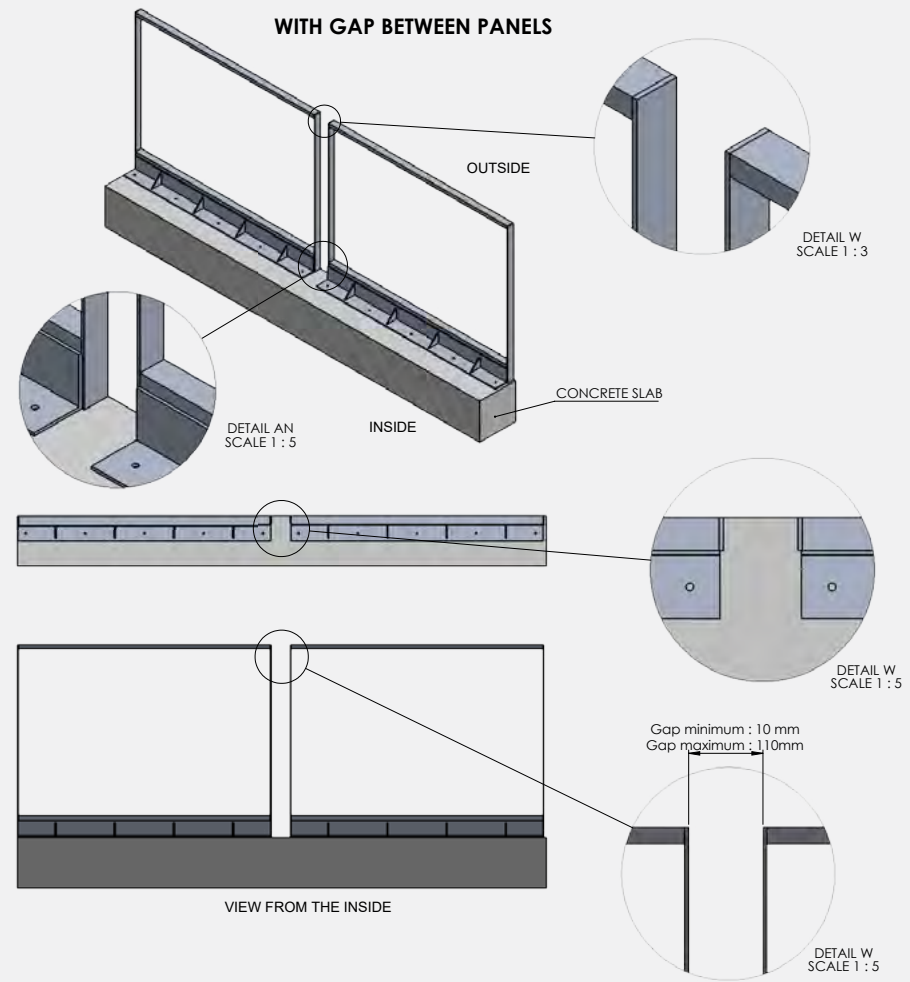

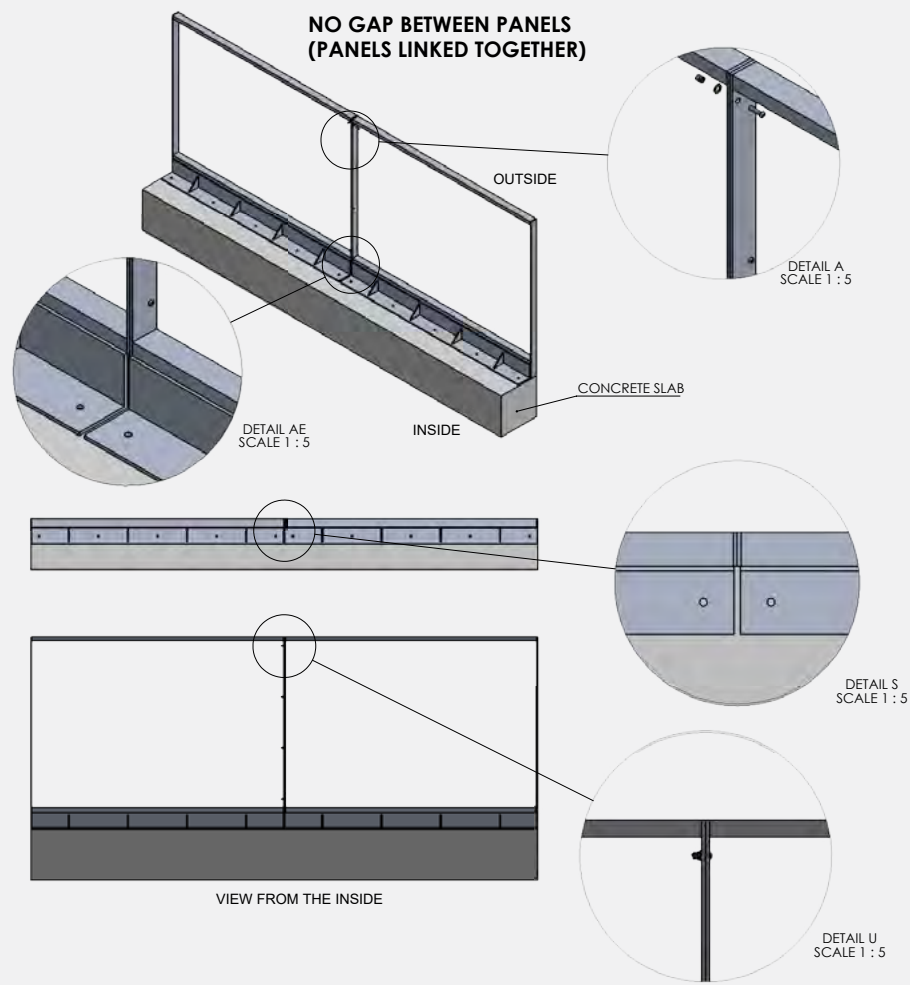

This fixing design features a hidden fixing system that once installed, appears to seamlessly merge from the ground.

		BLADE 50x10mm RHS		SLATS 50x10mm RHS		ANGLE 32x32x3mm		BATTEN 32x32x3mm SHS	
CENTERS MM	CLAD POSITION (inside rail)	GAP MM	Applicable	GAP MM	Applicable	GAP MM	Applicable	GAP MM

Assembly options	Available for all assembly options
Finishing	Powder coated

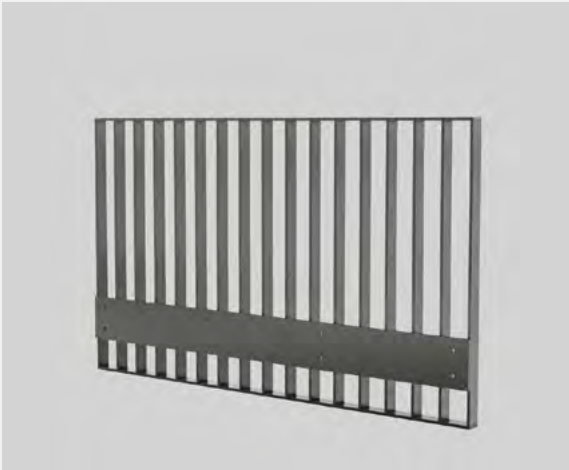

FAC-PLA

FACE-MOUNTED 160x10mm plate (FAC-PLA)

FACE-MOUNTED 160x10mm Plate

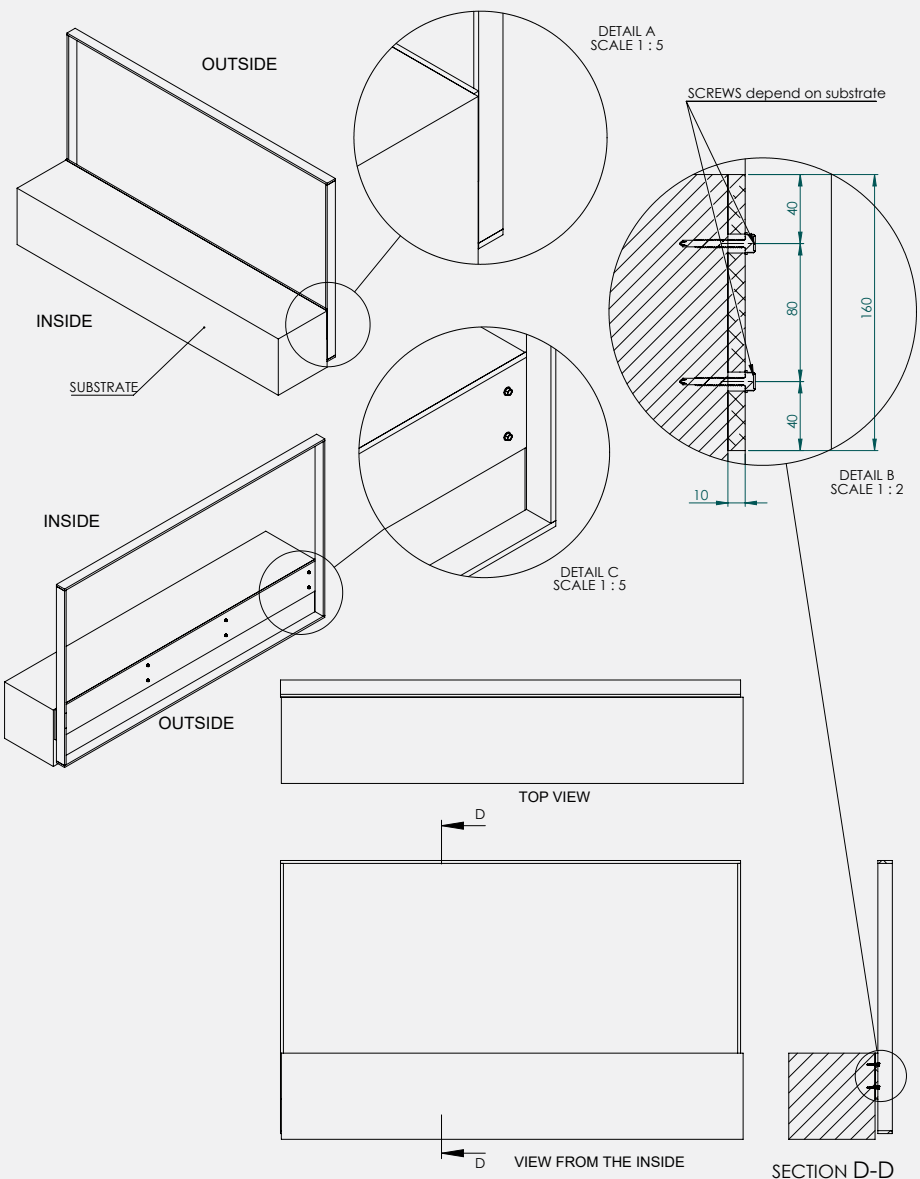

To be fixed onto a substrate's face and cover the concrete slab.

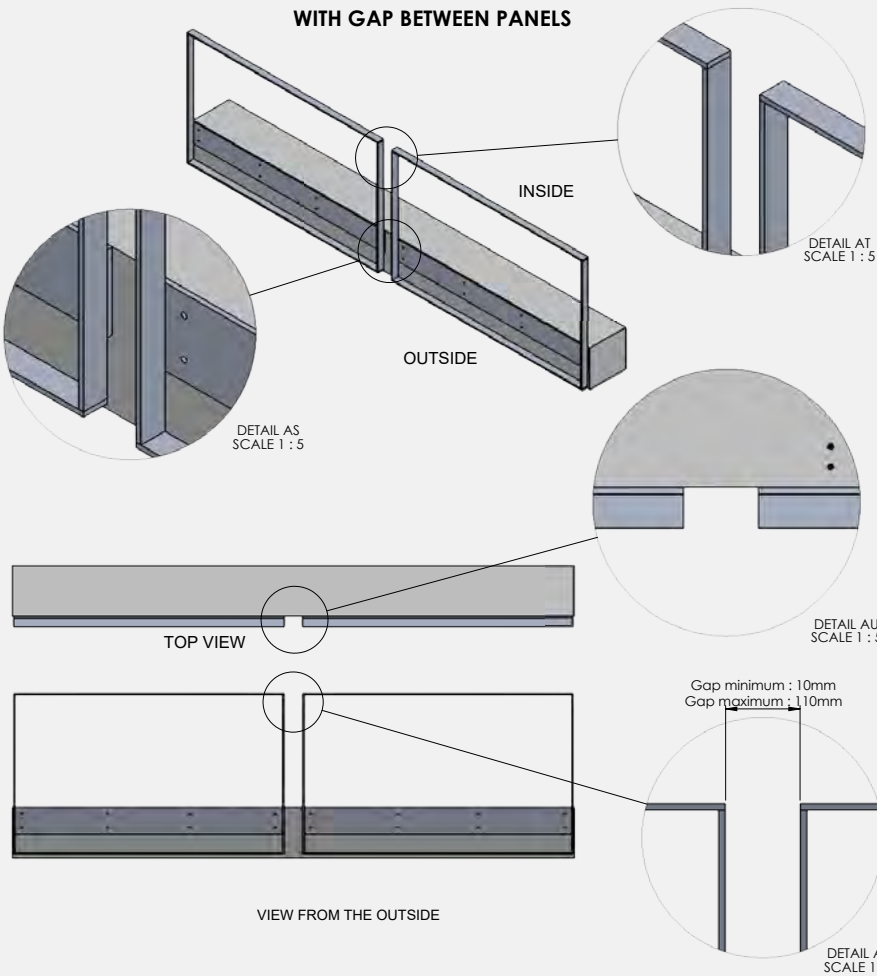

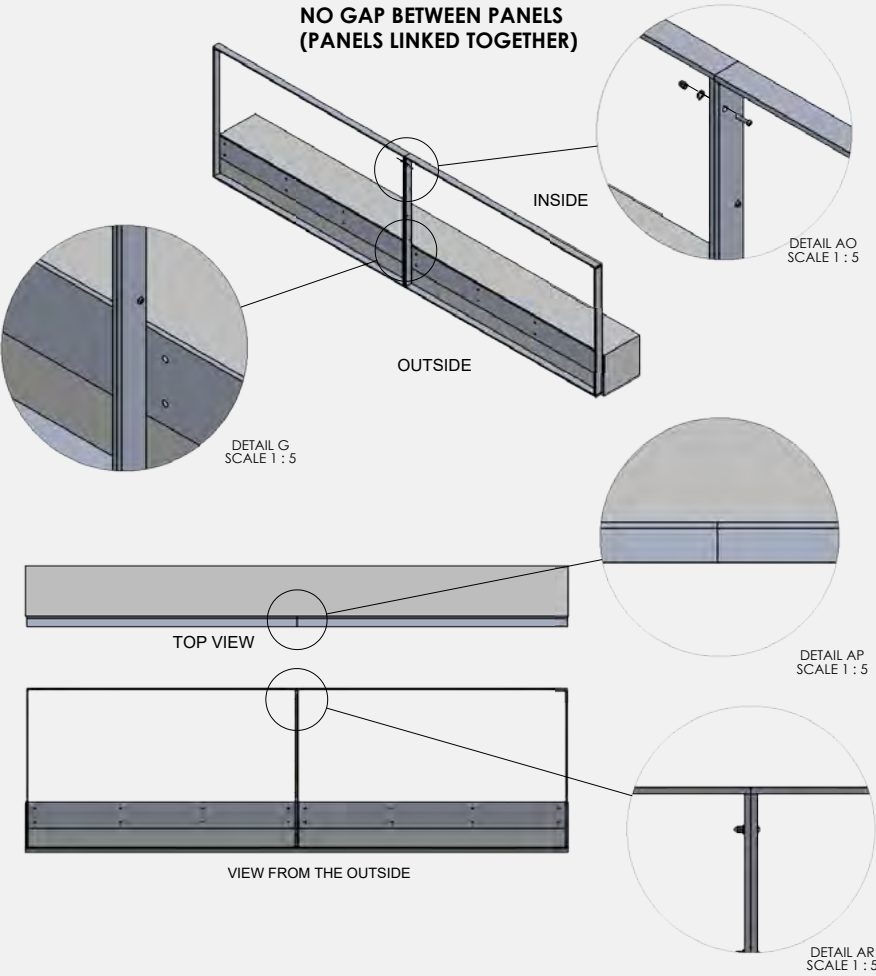

This fixing design adds modernity to the building's facade and creates more balcony space.

		BLADE 50x10mm RHS		SLATS 50x10mm RHS		ANGLE 32x32x3mm		BATTEN 32x32x3mm SHS	
CENTERS MM	Cladding position (within frame)	GAP MM	Applicable	GAP MM	Applicable	GAP MM	Applicable	GAP MM	Applicable

	CENTERED	90	✓						
120	FLUSH to BACK			70	✓	88	✓	88	✓
	CENTERED	110	✓						

Material	Aluminium grade 6061
Product construction	MIG welding
Anchor/Fasteners	Depend on the substrate
Panel width range	500mm to 1300mm
Panel height range	1000mm to 1300mm from final floor level
Cladding position	Not suitable for cladding designs flush to front
Frame options	Available for all frame types
Overhang variations	From 160-400mm
Assembly options	Available for all assembly options
Finishing	Powder coated

FAC-ANG

FACE-MOUNTED 100x100x6mm angle (FAC-ANG)

WALL-MOUNTED

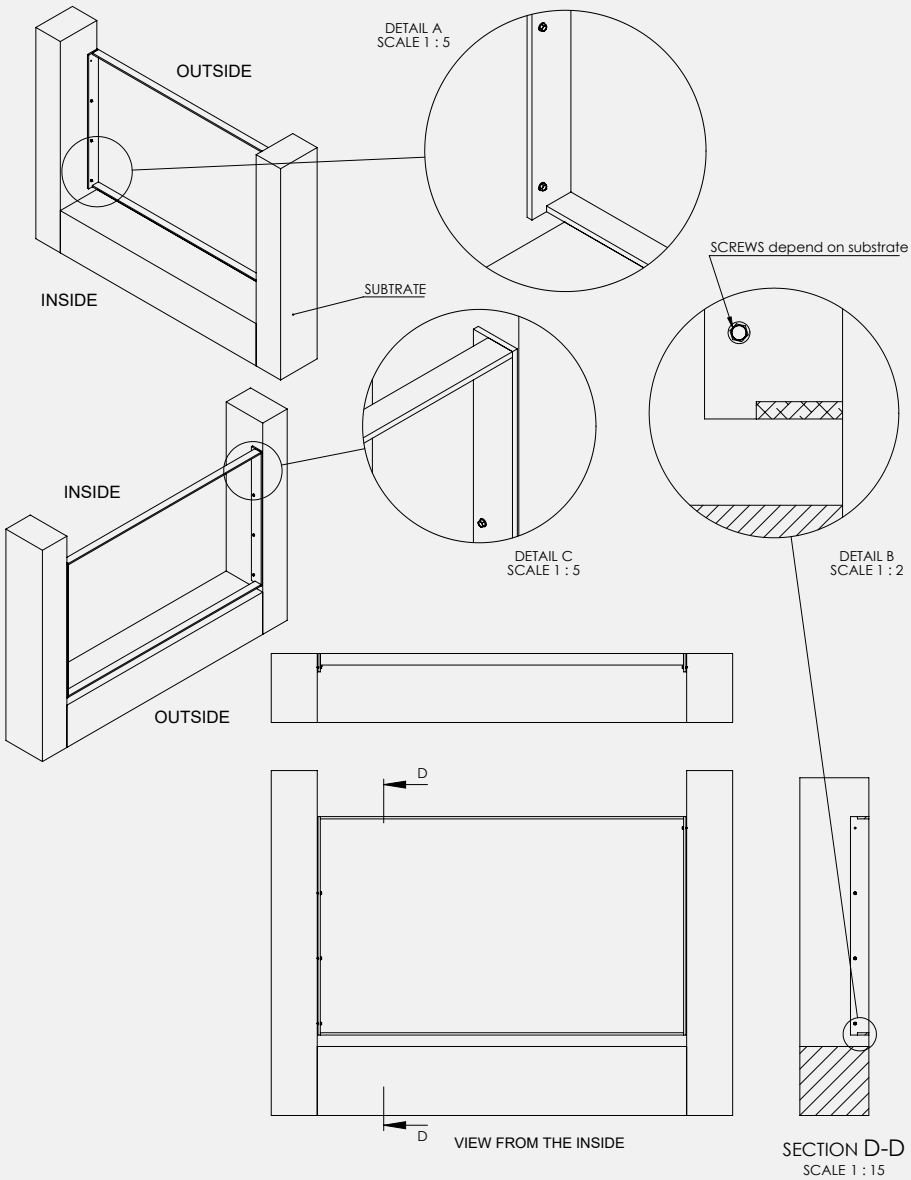

To be fixed in between walls as single or end panels.

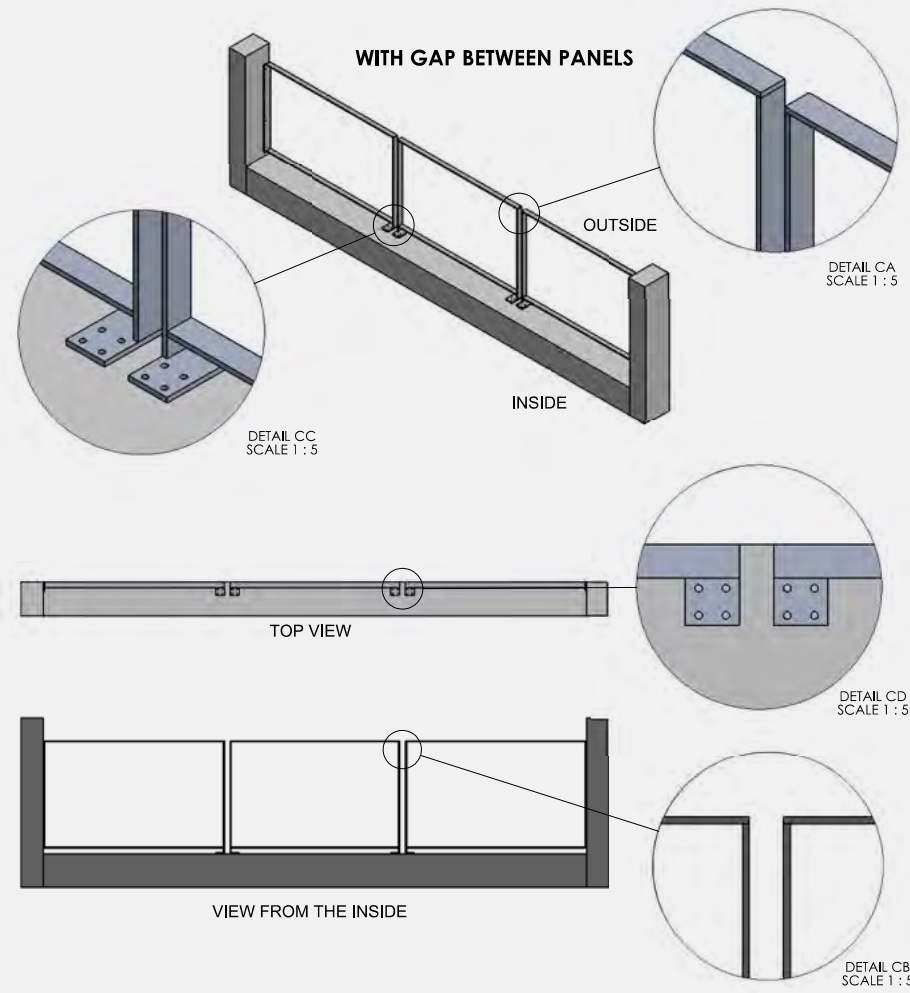

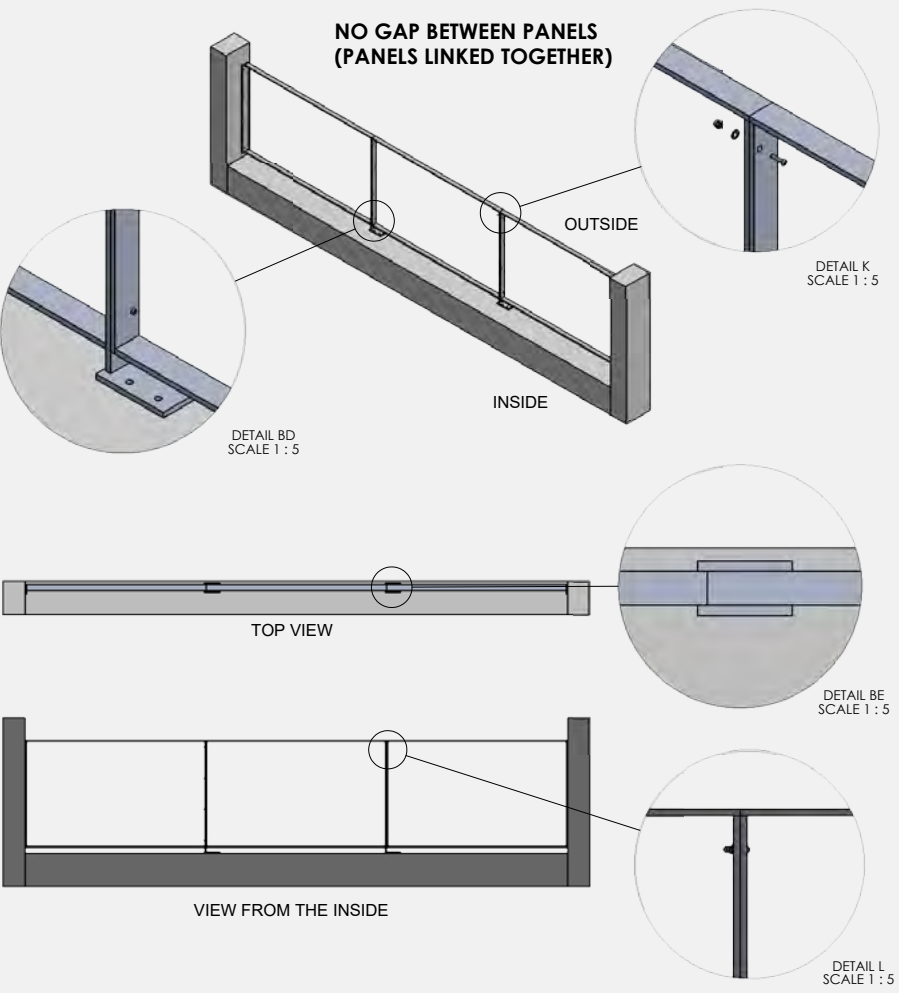

The installation of the Wall-mounted panel is easy as its wider frame uprights allow for easy fixing.

		BLADE 50x10mm RHS		SLATS 50x10mm RHS		ANGLE 32x32x3mm		BATTEN 32x32x3mm SHS	
CENTERS MM	CLAD POSITION (inside rail)	GAP MM	Applicable	GAP MM	Applicable	GAP MM	Applicable	GAP MM	Applicable

Product construction	MIG welding
Anchor/Fasteners	Depend on substrate
Panel width range	500mm to 1300mm
Panel height range	1000mm to 1300mm from final floor level
Cladding position	Suitable for all cladding positions
Frame options	Available for all frame types
Assembly options	Available for all assembly options
Finishing	Powder coated

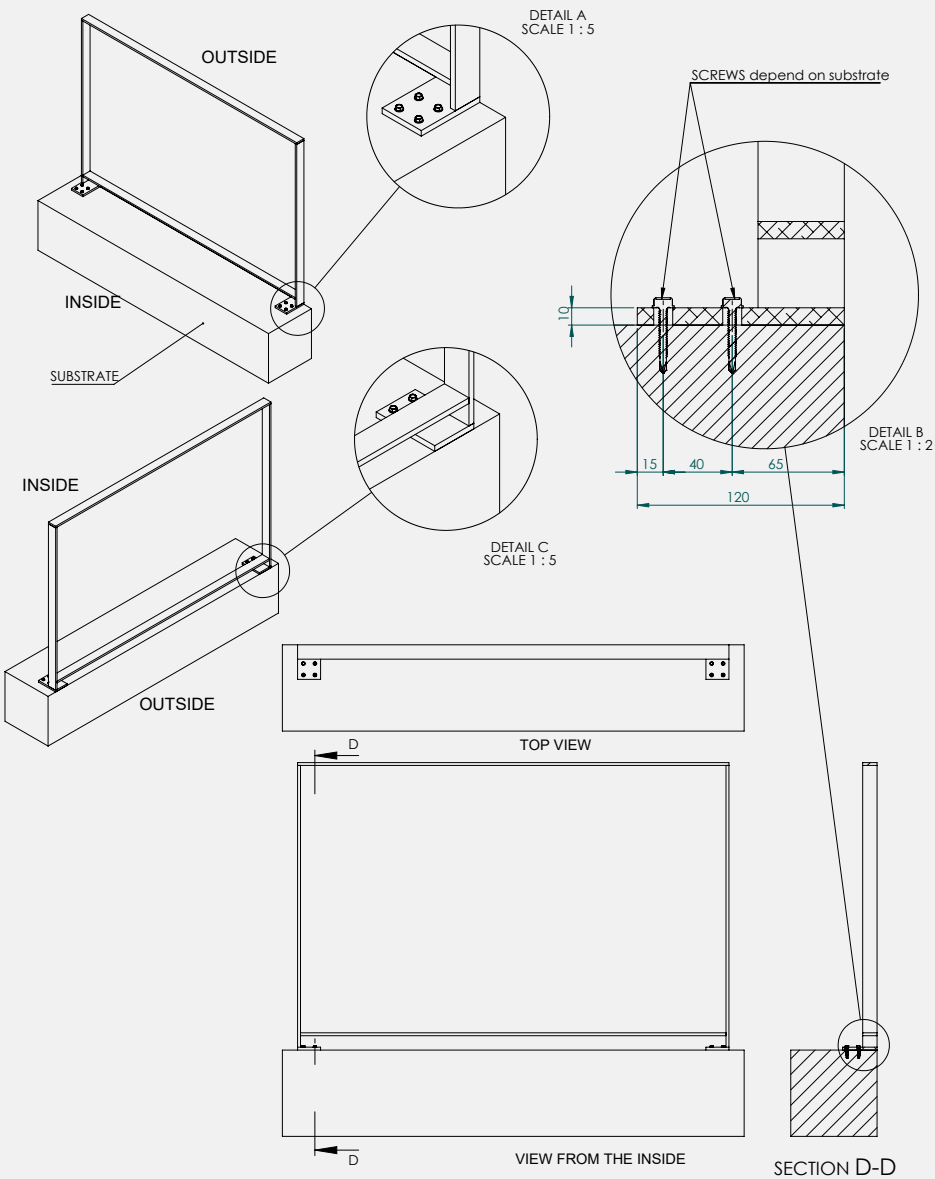

BASE PLATE

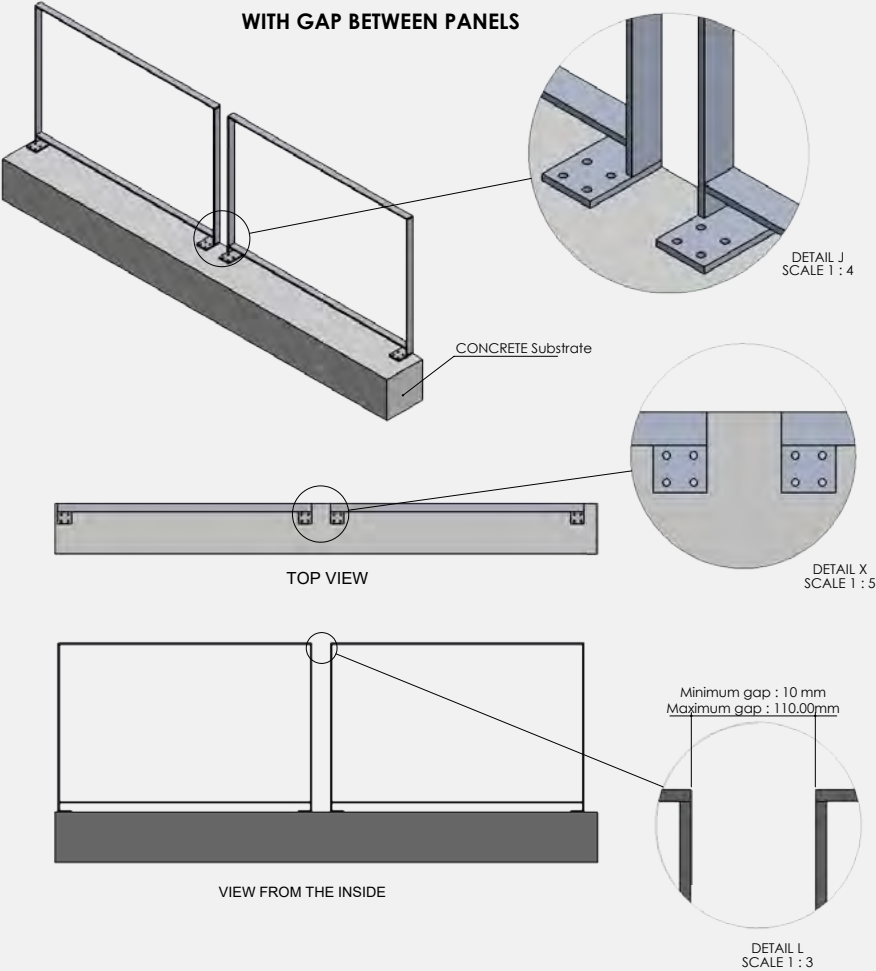

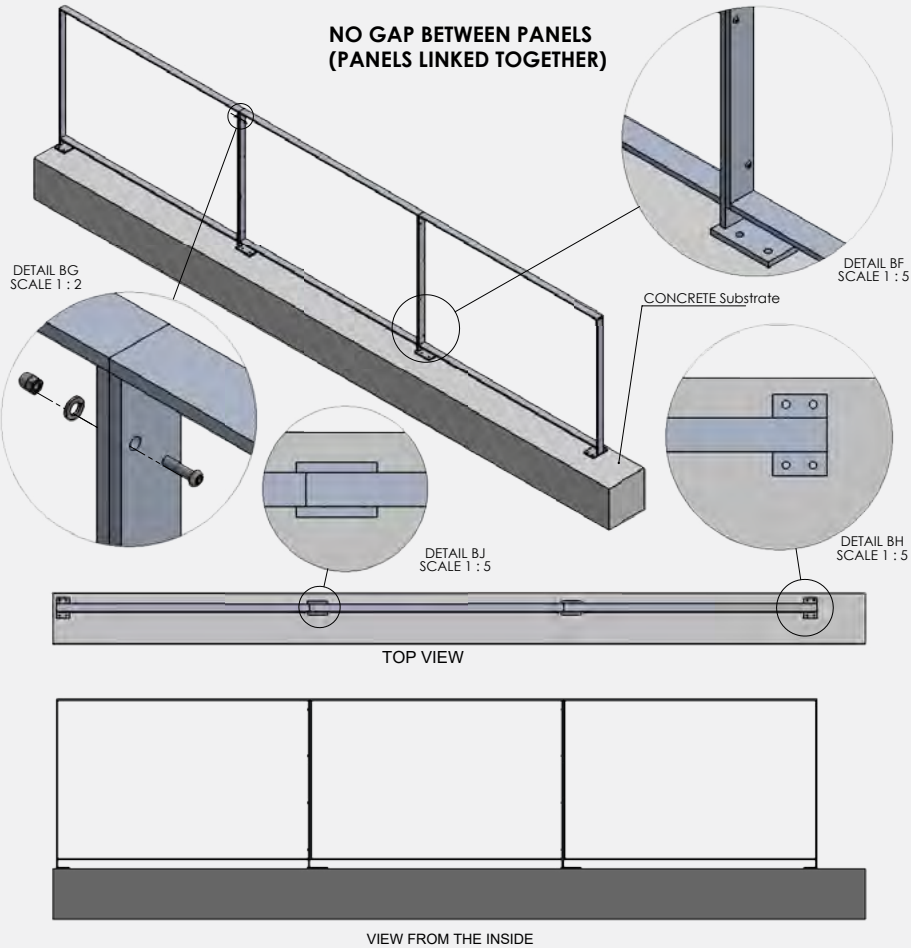

Easy to install and level, a fixing that can be installed in most substrates. Base plates are the best solution for achieving a larger gap under balustrades panels without compromising safety.

		BLADE 50x10mm RHS		SLATS 50x10mm RHS		ANGLE 32x32x3mm		BATTEN 32x32x3mm SHS
