WHO WE ARE

DNA Solutions is a team of software engineers committed to driving you to the heart of **digital transformation** with innovative, tailor-made solutions.

Our approach is deeply **human-centric** and focused on **collective success**.

We transform complex concepts into captivating, easy-to-adopt solutions that **your clients will love**.

WHAT WE DO

- 01 Data Intelligence and Analytics
- 02 Cloud-Based Solutions and Architecture
- 03 Operational Excellence and Automation
- 04 Monitoring and Observability Solutions
- 05 High Impact and Ethical AI Solutions

MASTERED TECHNOLOGIES

DATA INTELLIGENCE & ANALYTICS

Data Intelligence and Analytics harnesses advanced data analysis to extract **actionable insights**, driving **strategic decision-making** and **significant ROI**. By leveraging cutting-edge techniques in data science and business intelligence, we help you transform your raw data into **valuable knowledge**, fuelling innovation, efficiency, and **competitive advantage** in a data-driven world.

Our team has implemented a comprehensive solution for Deutsche Telekom, integrating advanced data extraction from Oracle and Postgres into a structured Data Lake. Utilizing ETL processes, we transformed raw data into insightful business analytics. Our dashboards and business analysis services, coupled with technology enabling self-run business analysis and data science, empower strategic decision-making. This approach enhances operational efficiency, improves customer satisfaction, and optimizes financial management, driving substantial ROI and competitive advantage.

CLOUD SOLUTIONS & ARCHITECTURE

1358+
Daily Streamings

80+
Countries Covered

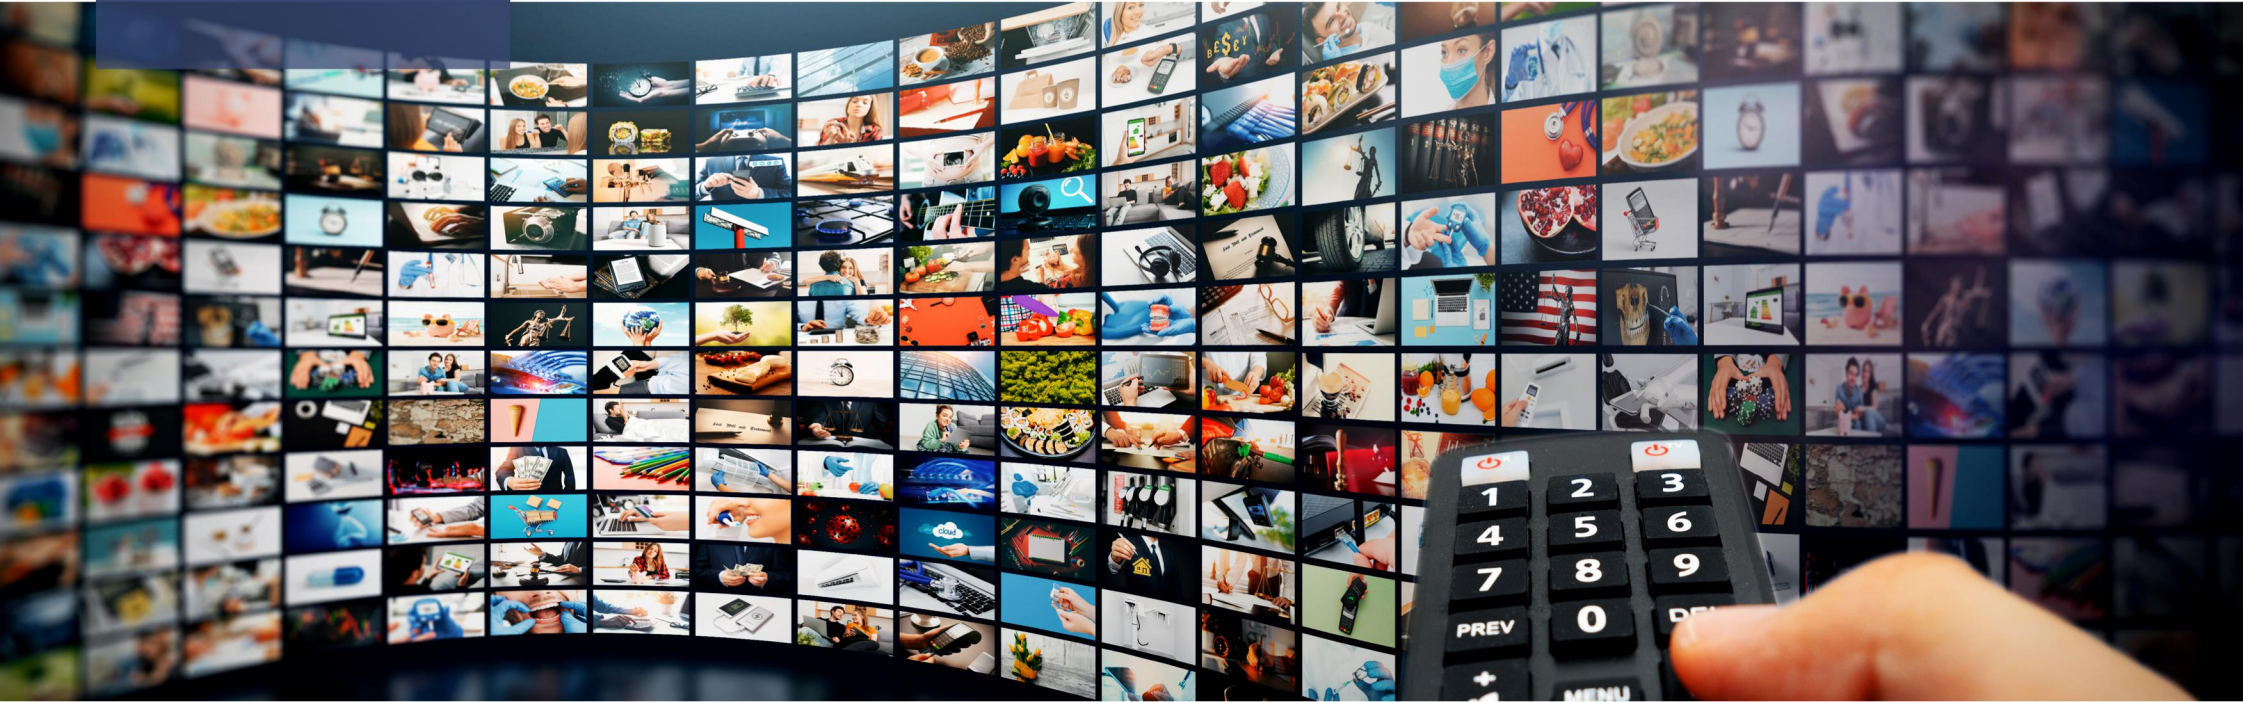

Cloud-Based Solutions and Architecture encompass designing and managing **scalable**, **efficient** cloud infrastructures, including SaaS solutions and microservices.

Thanks to this approach we ensure **flexible**, **cost-effective** systems that enhance business **agility** and **innovation**. It enables **robust**, on-demand **scalability** and **accessibility**, maximising operational **efficiency** and **security** in a dynamic digital landscape.

DNA Solutions has implemented a streaming platform like « Netflix » for the European Commission.

Based on a secure, scalable SaaS solution, and microservices architecture, this streaming service contributes to the transparency and multilingualism policies, being a modern tool for disseminating European Commission's proceedings towards the European citizens.

This approach is also part of the desire for sustainability with savings made in time, but also with travel and accommodation, and the avoidance of CO2 emissions.

Operational Excellence and Automation focus on streamlining processes through Stream Processing, Monitoring, and DevSecOps.

This enhances **operational efficiency**, ensures continuous system monitoring, and maintains **robust security**. It drives **productivity** and **reduces risk**, leading to a more **agile, responsive**, and more **effective** operational environment, vital for maintaining a competitive edge in fast-paced industries.

DNA Solutions has collaborated with T-Systems Road Charging to build the very first fully European Electronic Toll Service (EETS) compliant tolling system in Europe.

This makes this solution the undisputed technological leader in the field of road usage charging and a trend setter in the tolling industry.

The main challenges included fulfilling the highest safety and quality standards with high flexibility, within budget, and ready to operate by the short deadline set by Europe.

MONITORING & OBSERVABILITY SOLUTIONS

Enhance your **business efficiency** with our advanced monitoring solution.

Our offering provides real-time data analysis and insights, enabling you to swiftly identify and address operational issues. Benefit from streamlined data processing and comprehensive analytics, ensuring **enhanced security** and **optimized performance**.

Our customizable visualization dashboards offer clear, **actionable insights**, making complex data easily understandable. With efficient time-series data handling and precise alerting, you can **proactively** manage system health and performance. It's designed to alert you instantly to any irregularities or potential issues, ensuring **continuous uptime and reliability**.

Observability is an invaluable asset for any forward-thinking company, driving informed decision-making and fostering a **resilient, secure, and efficient business environment**.

- Enhanced Security
- Improved Performance
- Cost Savings
- Compliance
- Troubleshooting
- User Satisfaction
- R&D Insights

Not just a technical necessity...

A critical business strategy!

We focus on building solutions that brings value and that are meaningfully useful for our customers and their business.

To achieve this, we follow our four stages of innovation: discovery, synthesis, experimentation and transition into a production product or service, always targeting excellence.

We like to say that we are a software company without a product. Our client's products are our products! And we are a well rounded team that is equipped to build and support your business.

MISSION

Helping companies create high value products or services, and build their software organisation.

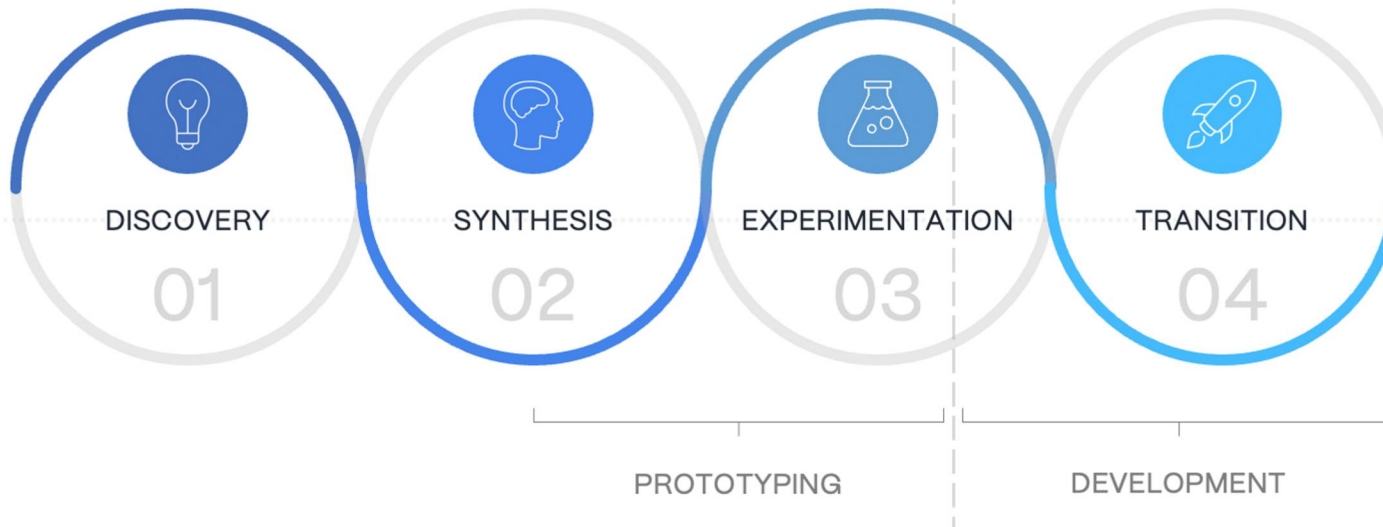

David Aerts

CTO & Visionary

“

*A visionary turns goals
into shared dreams.*

”

David Rénaers

CEO & Customer Advocate

“

*People do not care how much you know
until they know how much you care.*

”

At DNA Solutions, we don't just develop software. We craft digital experiences that resonate at the heart of your business.

Our team of passionate software engineers embodies our core values of winning together, empathy, cohesion, agility, resilience, and excellence.

We believe in the power of unity and human connection, making us more than a tech company.

We're your partner in digital transformation.

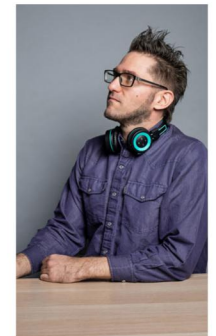

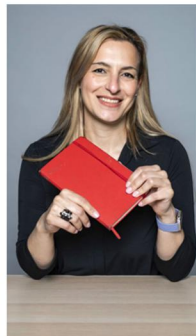

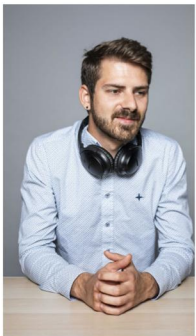

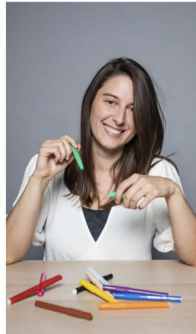

WE CARE...

In a world constantly evolving, choose DNA Solutions as your preferred partner.

Experience the thrill of innovation coupled with the warmth of collaboration.

Connect with us, and let's embark on a journey to reimagine your digital landscape, creating a future where technology meets human touch.

David.
