

TECKpert offers a range of services for government agencies, including IT assessments, software solutions, and technical staffing services. We understand the unique needs and challenges faced by government organizations, and our teams have experience working with federal, state, and local agencies. Our solutions are tailored to help government organizations keep pace with rapid technological changes and drive better outcomes for their constituents. TECKpert is a prime contract holder and we also work as a subcontractor for other prime contractors. We have a proven track record of successful project delivery and we strive to exceed expectations on every engagement, no matter our role, to provide exceptional service to our government clients.

### Mission

Transform organizations with talent & technology.

### Our Vision

Grow an ecosystem of innovation creating new products, capabilities & workforce opportunities.

### Values

# Services

## Where Modernization and Innovation Meet to Drive Mission Success

### Technical Assessments

TECKpert offers comprehensive assessments to help organizations of all sizes gain insights into their technology infrastructure, software applications, cybersecurity, and digital transformation readiness. We offer Digital Transformation, Cybersecurity, IT, and Software Assessments.

### IT Staff Augmentation

At TECKpert, we recognize that securing the right talent is essential for government agencies to achieve their mission-critical objectives. Through our IT Staff Augmentation services, we streamline the process of recruiting, vetting, and managing skilled IT professionals for short and long-term projects.

### Fractional CIO/CTO Services

When your organization is in transition or requires leadership on a short-term or interim basis, TECKpert provides Fractional Leadership solutions tailored to your specific needs. Our Fractional Services cover a range of key leadership roles from CTOs to CIOs, CISOs, and PMs.

### Software Development & DevOps

We offer a dynamic solution tailored to the unique needs of government agencies at state and local levels. Our in-house teams specialize in executing software development projects with precision and efficiency, leveraging our internal staffing capabilities to assemble the ideal teams for each project.

### Cybersecurity for Local Government - CEPS™

CEPS™ is tailored to meet the unique cybersecurity needs of local governments. With the increase in cyber threats, protecting critical information systems and data is paramount. Our service provides education, planning, and support to enhance cyber resilience and safeguard sensitive information.

### Software Modernization ModSafe™

ModSafe™ is a comprehensive offering designed to help organizations upgrade and modernize their legacy software systems using AI. We utilize AI to scan your code repository for deficiencies and vulnerabilities and create code to resolve these issues, securing your legacy software systems.

#### 100% US Based

Our vetted teams of digital professionals deliver high quality work with a focus on customer service and communication.

#### Project-Based or Staff Augmentation

We provide the high-skill workforce you need the way you need it: short-term, long-term, project to project and across competencies.

#### Flexible On-Demand

Build your team with TECKpert and reduce your scale-up time from months to days.
