Key features

Charge customers for deliveries based on how far they live from your brick and mortar store.

Supports multiple locations each offering their own rules and pricing.

Integrates with Shopify's most popular apps including Zapiet - Pickup + Delivery.

Easily configure tiered pricing based on distance, weight and order total.

Fully compatible with Shopify's Express Checkout options including PayPal and Instagram.

Global coverage with support for all countries and regions.

No coding or changes required to your store's theme.

Choose between shortest or fastest route calculations.

World-class customer support by phone, chat and email included in all plans.

Simple pricing

Flexible monthly plan with no minimum contract. Enjoy a 14-day free trial to test the app's features and make sure it fits your workflow.
