

APEX Transitional Care

Transitioning patients from SNF or hospital to home

- Intake within 24 hours of discharge and in person visit within 7 days
- Reconciling medications to ensure compliance
- Decreasing and avoiding emergency room visits and re-hospitalizations
- Ensuring needed services are in place such as home health, therapies, palliative, etc.
- Collaboration amongst providers and care team.

APEX Health Services

Patients have made “home” their preference for care. APEX Health Services continues to expand our skilled care services to provide care and services to patients, as they transition through the various stages of post-acute care after a recent illness or hospitalization.

We offer a network of services, so patients can receive a continuum of care with a team which they are familiar with throughout their healthcare journey, while improving collaboration amongst providers.
