Xtardew valley guide

Stardew Valley Guide for Beginners Updated with Valuable Tips and Tricks. New players often find the game overwhelming due to its numerous NPCs, items, and quests. To make the experience easier, our guide provides essential tips for getting started. The First Day in Stardew Valley Begin by completing the 'Getting Started' quest, which involves growing a parsnip and harvesting it. Most players plant all starter seeds at once but instead, focus on one seed to complete the task efficiently. Sell any remaining seeds to Pierre for extra gold. Investing in Potato Seeds Use the money earned from selling parsnips to buy potato seeds. Potatoes are more profitable than parsnips, offering a 15g increase per crop and potential double harvests. 3x3 Plot Layout Organize your farm using 3x3 plots, which allow for efficient growth, harvesting, and replanting of seeds. This layout also enables the use of sprinklers or scarecrows in the center of each plot. Crop Sales Selling crops is a crucial part of Stardew Valley's farming mechanics. Be mindful of crop growth times to avoid missing out on bountiful harvests when seasons change. Harvest and sell crops to Pierre for gold. Profitable Crops Each item has a ranking system, with colors indicating their value: unranked, silver, gold, or iridium (purple). The following crops are listed as profitable base prices: * Spring: + Parsnip - 35g + Cauliflower - 175g + Potato - 80g + Kale - 110g + Tulip - 30g + Blue jazz - 50g + Strawberry - These tips will help new players navigate Stardew Valley's vast world and make their experience more enjoyable. Your farm will be bursting with an array of veggies and fruits including 220g of garlic, 60g of summer wheat, 25g of tomato, and many other ingredients. As winter sets in, you can't plant seeds directly but having a greenhouse lets you grow crops all year round for maximum profit. Don't forget to gather community center bundles as they're essential for upgrading the area, especially the greenhouse which allows you to farm even during harsh winters. Try saving at least two of every item you forage or farm to donate to community center repairs. This will be a great help in the long run. Now let's talk about fixing the beach bridge – it's on your right-hand side as you approach the beach. You'll need 300 wood to repair it, but trust us when we say it's worth doing ASAP because it opens up the Tidal Pools which give you forageable items like sea urchins and shells that can be sold for a profit. Fishing is another way to earn some quick cash in Stardew Valley. Upgrade your fishing level by using Willy's training rod, which will limit you to low-level fish but boost your fishing level to five. This means you'll catch fish easily early on in the game, leading to more money and XP for you. When you find an ancient seed, don't sell it or plant it right away. Instead, donate it to Gunther at the museum as he'll reward you with a pack of plantable seeds. These can be used to generate even more plantable seeds, giving you a steady supply of gold. Lastly, upgrade your backpack as soon as possible by visiting Pierre's shop – it'll come in handy later on. Here are some beginner tips for Stardew Valley: Upgrading your inventory from 2,000g adds extra slots to store items. This upgrade is ideal for beginners, providing a total of 24 slots. It's especially useful when exploring or foraging in the mines! Further upgrades will require more money and increase slot capacity, with the next one costing 10,000g and offering up to 36 slots. This guide provides essential tips for your first year in Stardew Valley, helping you navigate the game and make progress. There are many activities to enjoy within or outside of gameplay, even on a budget. If you want to build relationships with NPCs in Pelican Town, check out our character hub for detailed information. For cooperative multiplayer farming, we have a separate guide on how to set up co-op farms. As one of the most popular RPG games, Stardew Valley has sold over 15 million copies as of 2021. Its success can be attributed to free updates, budget-friendly development, and an engaging gameplay experience that differentiates it from other titles in its genre. Since you're new to Stardew Valley, let's break down the basics. First, you'll need to create a character and select your farm layout from seven unique areas, each with their own advantages and disadvantages. Looking for the perfect farm in Stardew Valley? Here's what you need to know about each map. 1578 tillable tiles Has 516 non-tillable but build-able tiles. Early morning foraging is encouraged and has a lovely border of trees and foliage with Berry bushes and stumps for Hardwood (8). Junk items make up 50% of the farm, while Pond Fish loots account for 45%. Woodskip (5% to 17.5%) can be found here. 1413 tillable tiles Has 1490 non-tillable but build-able tiles. Mining is conveniently done outside the homestead and encourages mining stones, geodes, and ores similar to a Quarry and Dig Site. Trash makes up 50%, while Forest River Fish loots are also common. 1648 tillable tiles Has 930 tillable but build-able tiles. At night, monsters appear on Wilderness Farm, encouraging combat and getting early monster loots by killing them. Junk items make up 65% of the farm, with Lake Fish loots accounting for 35%. 202 tillable tiles where sprinklers work. But sandy soil makes it difficult to use them. Trash (27.17%) Ocean Fish loots (52.73%) Seaweed (15%) and various sea creatures like Cockle, Coral, Mussel, or Oyster are found here. The perfect map for multiplayer is available with 2131 tillable tiles. It encourages multiplayer and gives all benefits from previous farm maps. Fishing and Foraging are encouraged early on in the game. Extra items can be dropped from Supply Crates. As a seasoned Stardew Valley player, you'll find extra items here. The Farming layout depends on your preference. While it's practical to follow the Standard layout, the Beach map is more challenging but rewarding if done correctly. An extra tip: use "Show Hit Tool Location" to avoid wasting energy when using tools. You're now in control of the Joja Corporation for a while after your grandfather passed away. A letter revealed that you inherited the farm's ownership at Pelican Town. However, as time passes, you realize this routine won't fulfill your life until you move out. On your first day, take note of the Energy Bar on the right side of the screen, which depletes -2 when using tools except for Scythe. The depletion rate decreases with stronger upgrades and Stardrops. Your Health Bar is visible after taking damage, and it will remain until you're full health. Monster attacks can decrease your bar. You start with 500g to become more prosperous and buy essential farm upgrades that'll give you more profit. There are four seasons in Spring, Summer, Fall, and Winter, each with unique festivals, crops, and earning opportunities. A season consists of 28 days starting from 6 AM to 2 AM. The weather affects gameplay, so be prepared for different conditions. With each season, different challenges and opportunities arise in Stardew Valley. For instance, Winter brings a blizzard, while Spring, Summer, and Fall can be rainy or stormy. Initially, you have 12 slots for essential items, with nearly half of it occupied by hand-me-down tools. However, upgrades are available from Pierre's General Store, including the Large Pack (2000g) and Deluxe Pack (10000g). It's crucial to consider what you collect, as less valuable items can be stored in the Shipping Bin or crafted into chests for 50 Wood. Different skills require unique tools, and farm maps provide complementary skills that can be practiced and mastered. There are five main skills: Farming, Fishing, Mining, Foraging, and Combat. Regardless of your selected layout, you can still access all five on your save file. Here's a brief overview: Farming involves planting crops, caring for farm animals, and using various tools like the Watering Can and Hoe. Each field has specific professions to choose from. Fishing requires Tackles, Baits, and Rods to catch fish in the mini-game. Mining is essential for accessing new areas and fulfilling Grandpa's wishes. It involves upgrades like Pickaxe and bombs, as well as Iridium Ores. Wildcrafting allows you to pick items from the ground or bushes without tools, but sometimes requires Axe and Hoe. Combat skills involve swords, hammers, or daggers, which require a combination of these to unlock valuable loot. Your primary goals in Stardew Valley's first week include planting Parsnip Seeds, cleaning the overgrown farm, making friends through side quests, and reinvesting your profit to earn more. By gathering weeds and wood, you can craft essential items for your farm, such as chests, fences, and gates. Remember to collect grasses once you have a Silo, as they'll be useful later. Interact with villagers on your way to complete delivery quests and take advantage of foraging opportunities when your crops are growing. A good spot for Spring Onions can be found south of Leah's Cottage, providing extra seeds. Watching the TV daily will give you valuable tips on playing Stardew Valley, including the Queen of Sauce, Livin' Off the Land, and Fortune Teller shows. Keep an eye out for festivals in Pelican Town, like the upcoming Egg Festival. When growing crops, prioritize those that take time to develop, such as Cauliflower, Melon, and Pumpkin, which will yield a generous profit. Consider expanding your farmland while maintaining automation and diversifying your income sources with items like Flavored Honey, Oak Resin, and Maple Syrup. Before entering Winter, ensure you have a Silo and Coop or Barn built to avoid worrying about gold. Hoard all shipping bin items as they'll be essential later in the game. The Egg Festival marks the first of many upcoming festivals, including the Flower Dance, where your focus should remain on farming. With each year, you'll need to expand, rebuild, and regrow until Winter arrives. Prioritize upgrading your tools, starting with a better Pickaxe, followed by a Watering Can, Axe, or Hoe, depending on your needs. Beyond repair lies the Community Center, a relic of the past that Mayor Lewis shares with the player. The town's history is evident in its aging infrastructure. Are you willing to restore it? You can choose between the Junimos or Forest Spirits and complete bundles to donate items. These bundles have specific requirements and rewards. Alternatively, you can become a JojaMart member for 5000g and spend another 135000g to reach the end goal: a Movie Theater. Community Development Project Buying PriceBridge: 25000gBus: 40000gGreenhouse: 35000gMinecarts: 15000gPanning: 20000g To start donating, you must first enter the building and then receive a message from Wizard the following day, explaining how to donate items. Normal Bundles will be explained in detail below. During certain times and weather conditions, various farming assets can be obtained. For example, during Summer or Fall, specific crops like Cauliflower and Parsnip can be grown. In contrast, other crops like Blueberry, Melon, and Pumpkin are only available during Fall. Farmers can also obtain animals such as ducks, chickens, goats, cows, and sheep through breeding or farming. Additionally, resources like wool, milk, eggs, and honey can be obtained from these animals. Furthermore, certain fish species like Catfish, Shad, Sunfish, Bullhead, Carp, Largemouth Bass, Sturgeon, Red Snapper, Sardine, Tilapia, Bream, Eel, Walleye, Crab, Cockle, Crayfish, Lobster, Mussel, Oyster, Periwinkle, and Shrimp can be caught from rivers, lakes, or ocean sources. Some items like Ghostfish, Pufferfish, Sandfish, Woodskip, and Fish can only be obtained during specific times of day, weather conditions, or locations. The use of Mine Carts allows for fast travel to these locations. Lastly, resources like Copper Bar, Gold Bar, Iron Bar, Coal, and Truffle Oil can be crafted using ores and items from various sources. Note that some information has been omitted to make the text more concise and easier to read. Furnace • Fe Transmute: Geologist's Bundle, Quartz • The Mines (all levels), Earth Crystal • Monster drop from Duggies (6-29, 10%), Geodes (6.25%) • Omni Geodes (2.0833%), Frozen Tear • Monster loot from Dust Sprites (41-79, 2%), The Mines (1-39) Frozen Tear: • Frozen Geodes (6.25%), Monster drop from Duggies (41-79), Omni Geodes (2.0833%) • The Mines (81-119), Fire Quartz Adventurer's Bundle: • Bat Wing, Killing Bats • Slime (99) • Monster loot from killing Slimes Solar Essence: • Ghosts (95%), Iridium Bats (50%), Metal Heads (65%) • Mummies (99%), Squid Kids (75%) Void Essence: • Serpents (99%), Shadow Brutes (75%), Shadow Shamans (75%) Chef's Bundle: • Maple Syrup, Tapping Maple Trees • Fiddlehead Fern, Secret Woods (Summer), Prehistoric Floors at the Skull Cavern Truffle: • Pigs, Poppy, Planting Poppy Seeds (Summer) • Maki Roll, Cooking, Fried Egg, Cooking, Dye Bundle Red Mushroom: • Mines, Secret Woods (Summer or Fall foraging), Mushrooms Farm Cave • Tapping a Mushroom Tree, Sea Urchin, Beach Farm foraging Sunflower: • Planting Sunflower Seeds (Summer and Fall) • Duck Feather, Ducks drop • Aquamarine, Breaking Aquamarine Nodes, Destroying Mines crates (2.24% – 4%) • Fishing Treasure Chests (4%) Red Cabbage: • Planting Red Cabbage Seeds during Summer in Year 2 (unless enabled the guarantee of completing the Community Center by Year 1) Field Research Bundle: • Purple Mushroom, Mines, Mushrooms Farm Cave, Forest Farm foraging (Fall) • Nautilus Shell, Beach foraging (Winter), Beach Farm foraging, Fall foraging • Chub, Fishing at the Mountain Lake or River at any time, any season Fodder Bundle: • Wheat, Planting Wheat Seeds in Summer and Fall • Hay, Scything grass at the Farm, Marnie's Ranch for 50g • Three pieces from the Desert Trader for Omni Geode (1), Apple (3) • Apple Trees drop in Fall, Fruit Bat Farm Cave Enchanter's Bundle: • Oak Resin, Tapping Oak Trees, Wine, Kegs and Any Fruits • Rabbit's Foot, Rabbits drop, Serpents drop (0.8%) • Pomegranate, Pomegranate Trees drop in Fall, Fruit Bat Farm Cave The Bus to Calico Desert. PriceReward 2,500 Bundle: Chocolate Cake (3) 5,000 Bundle: Quality Fertilizer (30), Lightning Rod (1) 10,000 Bundle: Crystalarium (1) Cutscenes on every villager will depend on your Friendship points. Stardew Valley is also a game of meeting new faces and discovering different character backstories. Cutscenes aside, you can unlock crafting and cooking recipes, special areas, and even get mindblown with everyone's relationship with one another. You'll also feel like you're in a family where everyone sends you a gift (this game is your perfect retreat if you have no friends). In total, you can raise friendships with 34 unique NPCs in-game. Starting with zero, you can progressively improve it by gifting either their liked or loved item or taking them to the Movie Theater. However, you're limited to giving their favorites twice a week with normal gifts and once with cinemas. Here's where you can take a look at the gifting guide. Can you complete 100% of all your achievements? There are two quest types in Stardew Valley: You've got two main tasks: Main Quests and Side Quests in Stardew Valley. Completing the former will earn you some cash, but it's the latter that can bring in more money through various activities like taking orders, slaying monsters, or collecting items. If you have the Special Orders Board, you'll unlock new recipes to help boost your earnings. Along the way, you can also achieve some milestones and track your progress easily. For a 100% completion, check out this separate guide. Different in-game items are categorized into ranks and tiers, with 14 must-haves that remain essential even after updates. Now, let's focus on Sprinklers, which are key to automating your farm in Stardew Valley. This tool saves you time by watering crops without having to manually refill your Watering Can. However, better sprinklers have a longer range and Pressure Nozzles affect how many plants they can water each day. Fertilizers come in various forms, with upgraded variants available as you progress through the game. They increase crop value and availability for sale. Retaining Soil helps keep the soil moist overnight, while Speed-Gro reduces waiting time until harvest. To automate your farm further, place Junimo Huts near your crops (except on rainy days). They help collect your crops without taking up too much time. For those who want to optimize their farm's productivity, Iridium is a valuable material that can be made by smelting its ore form. This requires reaching Year 3 in the game. Remember Grandpa's return? He'll evaluate your progress and reward you with Iridium Ores upon completion of his requirements at his Shrine. As for wine-making, it's another money-spinner, especially during Winter. Starfruit, Ancient Fruit, and Melon are the top choices after the Ginger Island update due to their profitability. However, avoid making Juices as they don't offer a significant financial reward despite their health benefits. When winter hits, it brings new challenges to making ends meet, especially when your primary income source is frozen. Duplicating diamonds using Crystalariums could change the game - imagine being able to produce gems without having to brave monster-filled caves or risk losing valuable resources. If mining starts to lose its appeal, save a diamond first as it tends to sell better than other items on the market. To start duplicating diamonds, you'll need just one copy, and from there, your Crystalarium farm will expand exponentially, making growth almost unstoppable. A pro tip: opt for Jellies over Pickles, as they're not only more valuable but also don't have to be eaten. Preserves Jar is another beginner-friendly artisan equipment that can help boost income in the early years of Stardew Valley. Consider leveraging seasonal items like Spring flowers or Flavored Honey from bees to maximize profit. The best-selling flower types are ideal for this strategy, especially if Blue Jazz or Tulip is available. Don't just sell Truffles; convert them into Truffle Oil for a more profitable artisan good that's perfect for a Pigs' barn. Coal is the most valuable resource in-game and essential for progress and crafting. While you can obtain Coal by breaking rocks on your homestead, having a steady supply ensures uninterrupted smelting of ores. A Charcoal Kiln will help with this, especially when Wood is readily available and processing time is minimal. Batteries are crucial for completing major quests in Stardew Valley and have a higher selling price than other resources except Metal Bars. Craft a Lightning Rod to capitalize on stormy days without wasting them. Include the Return Scepter in your plans, as it's an investment worth considering, especially when compared to Warp Totems. These items and structures will help you save time and increase efficiency in Stardew Valley. Each type has its unique benefits, from saving space in your inventory to allowing for one-time consumables that free up space after use. If you're ready to start, creating Point A and B will make traveling convenient and efficient. Keep in mind that you can only place two of these markers outside the farm. For example, placing one near your bed won't work. An additional tip is that Solar Panels take seven days to produce Batteries, but they can be a great alternative to Lightning Rods – which also produces the same resource! Lastly, checking your Farm Computer daily will give you valuable data on available crops and equipment ready for processing. Combining these tips with gameplay hours and experience will help you become the best in Stardew Valley. The game offers many secrets worth exploring and discovering. With a long journey ahead of you, all the best of luck is wished for your Stardew Valley gameplay! Stardew Valley is a farming game with a story that encourages lots of fishing, mining, and monster combat on the way to becoming a rich farmer. There are few set deadlines and very little pressures besides the goals you set for yourself. The game allows for many ways to make money – some labor-intensive and others not – and various ways to spend it without much waste. You can develop your farm into a seasonal monoculture or a diversified bit of everything, spending time mining or processing produce into valuable goods. There are secrets and surprises to uncover, including restoring the Community Centre by collecting diverse items. However, you can decline this challenge and bypass the main story's diversity by becoming a regular customer of the Joja Corporation for a price. The game has goals but no victory condition; everything is kid-friendly – even naming every animal and valuing their daily produce.
