

This Notice primarily describes how and for what purposes NanoMosaic processes personal data for US customers.

Types of personal data being collected:

In general, and to the extent necessary, NanoMosaic collects and processes the following categories of personal data:

- Information that is related to individuals that are acting on behalf of an entity (for example a university or company) that is engaged with NanoMosaic in some manner. This includes names, addresses, telephone numbers, email addresses, details about the services for which you have engaged us and also your professional background.
- Information handled in conjunction with individuals' expressions of interest in NanoMosaic's services and products generally. This information includes name, address, telephone number, email address and, if relevant, professional background.
- Information that is related to a person interested in seeking employment at NanoMosaic. This information includes name, address, telephone number, email address and, if relevant, professional background.
- NanoMosaic may also process other types of personal data that is provided to the company generally including in connection with external meetings or marketing events.

How data is being collected by NanoMosaic:

NanoMosaic collects and processes personal data:

- That has been provided to NanoMosaic in conjunction with an agreement regarding provision of services and sale of products.
- That has been provided to NanoMosaic when someone communicates with the company, e.g. when an individual contacts NanoMosaic for technical support or when someone signs up for a newsletter or other information from the company.
- That has been obtained from other sources, e.g. from cooperating partners, third party databases and different social media and marketing networks.
- That NanoMosaic collects due cookies on the company websites that collect information from your web browser.

How do we use the data?

NanoMosaic used the collected data in the following ways:

- Provision of services and sale of products.
- Communication about services and products.
- Development of services and products.
- Research needs analysis and marketing purposes.

For EU customers, NanoMosaic strives to comply with GDPR. The GDPR privacy notice is available upon request.
