## Resuscitation Armoire Infant Care Station

The Resuscitation Armoire unites state-of-the-art technology with design and function to provide a comprehensive infant care station. Everything needed for infant resuscitation is contained inside. The work surface comes down for full, three-sided access to allow multiple caregivers the necessary room to tend to the infant. The heater head rotates out over the work surface, providing a controlled, warm environment. An accessory slide is mounted inside the cabinet to hold a resuscitator.

### Features/Specifications:

- Great design aesthetic
