

THE FUTURE OF ADVANCED AI

We allow the brightest minds to scale with the help of AI

Bloops is an upcoming AI-powered multi-tool that leverages advanced AI and complex data to revolutionize trading tools, checkouts, browsing/scanning, and more. Bloops works by utilizing publicly available and open-source AI models to capture information streams provided by the user, analyzing them, and influencing decisions based on the results. From analyzing complex coins to automating complex checkouts, and scanning upcoming startups & projects, Bloops ensures a holistic, immersive experience.

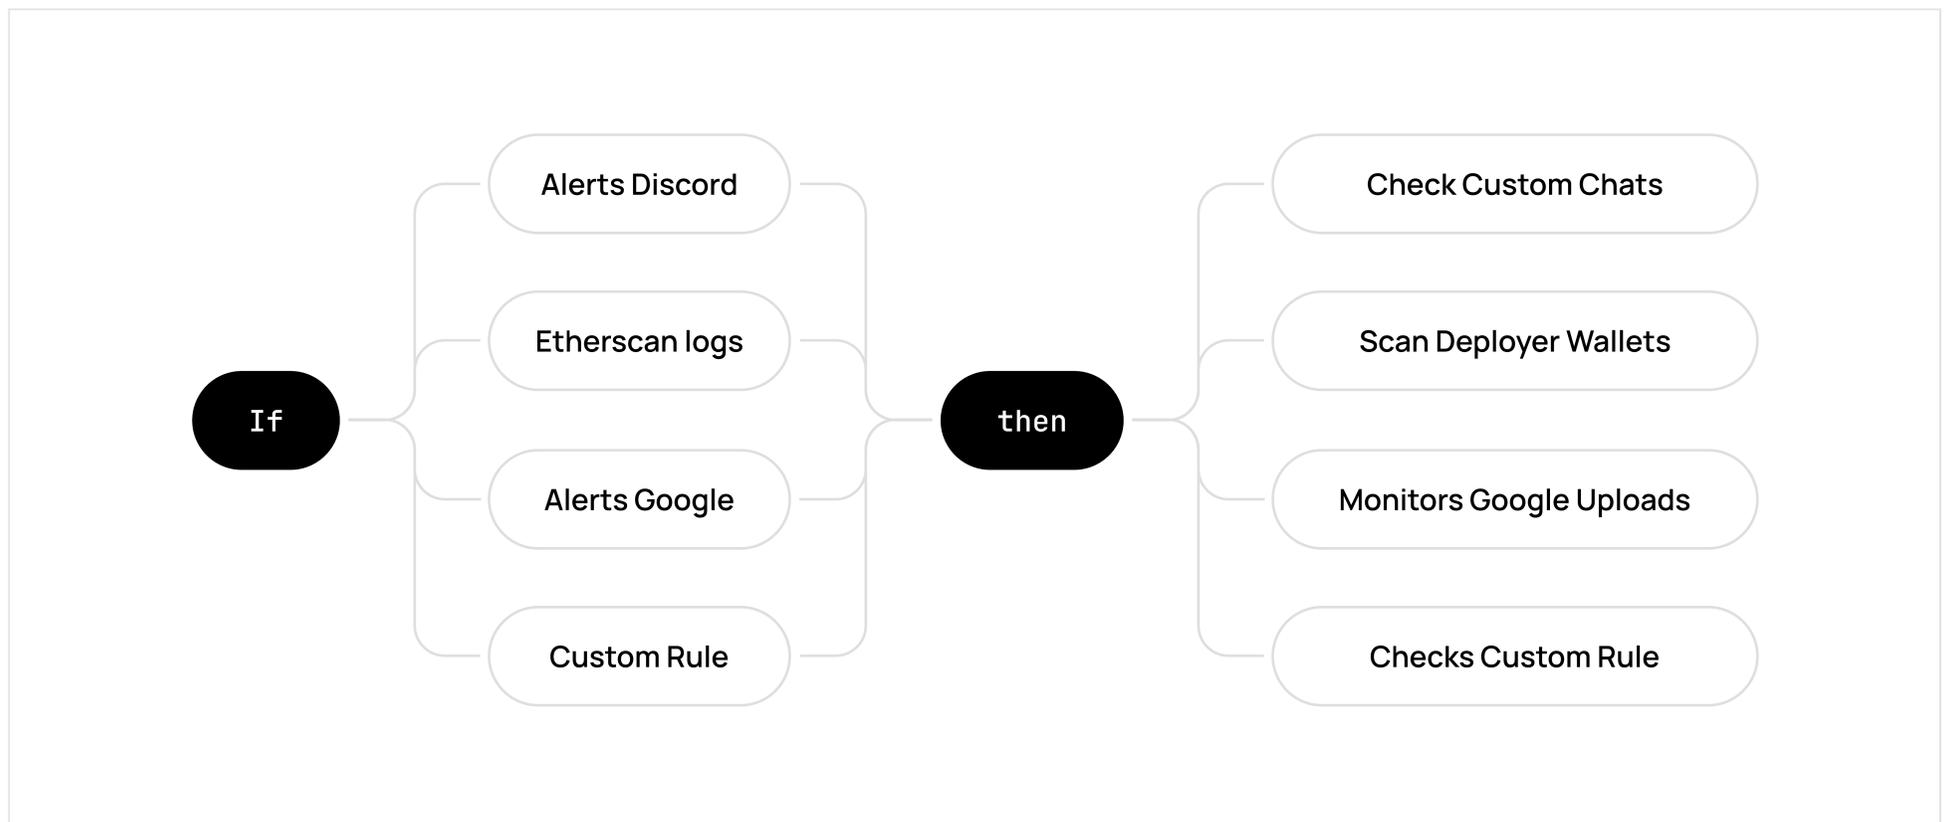

Data layers

INTRODUCTION

Getting started using our AI Lab for your tech products

To get started, simply upload information from any source (Twitter, Discord, Telegram, Google, Etherscan) and extract information such as complex patterns to better understand if a project is likely to go up or down, depending on the sources provided. These inputs can be as complex as scanning keywords, scanning own Discord channels, tracking wallets & purchases, scanning attitudes in chats from the community, as well as the founder's personal attachment and track record, among others. This process happens rapidly, in split-seconds, while allowing the user to choose whether to let our tool automatically trade or to take the wheel themselves with the data provided.

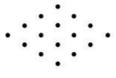

AI MONITORS / ACTIONS / FILTERS [+] MORE

Each tool in Bloops is fully customizable, offering filters, keywords, and custom rules. This empowers users to tailor their analytics precisely to reflect relevant news and actions.

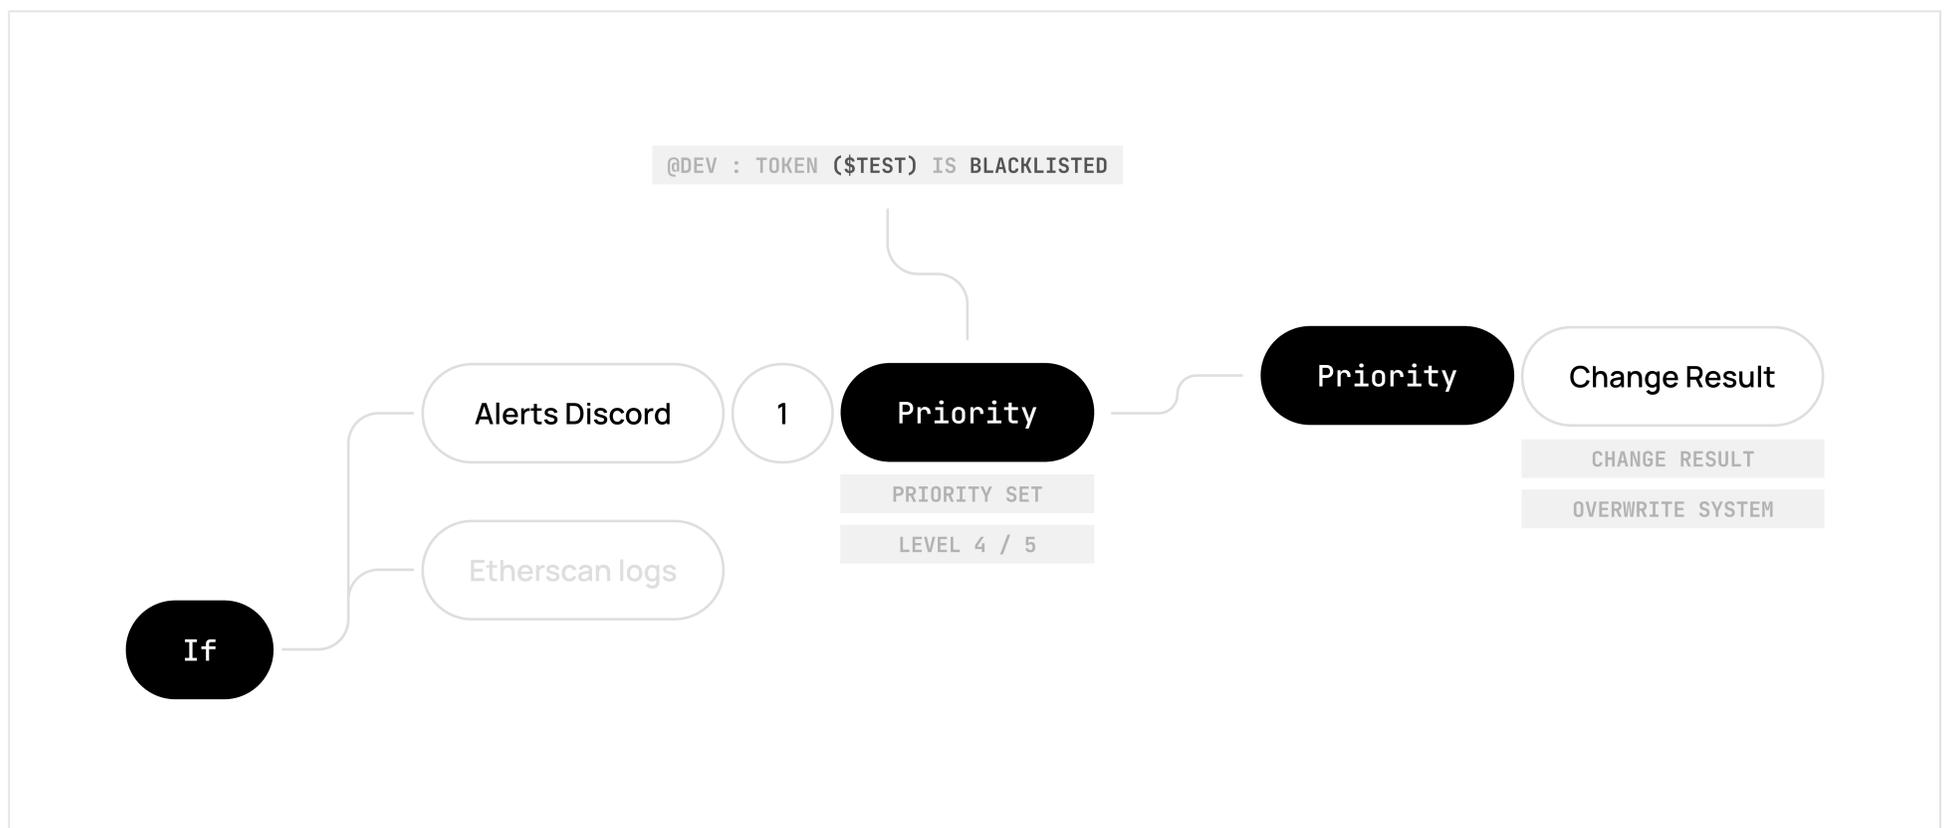

Surveying

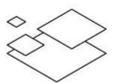

SURVEYING TASKS

Bloops AI exhibits varied reactions to inputs based on diverse resources. Users can customize and filter inputs, assigning roles, rules, and values to tailor the AI's responses accordingly.

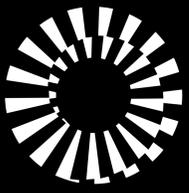

AUTOMATE TRADING

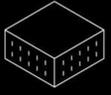

Construction and infrastructure

Our trading system's automation is fully editable and customizable, featuring limits and filters. Additionally, it can filter newly launched tokens, adding them to a watchlist for user approval before initiating autonomous trading.

BLO TOKEN ECOSYSTEM

Our goal is to introduce Blo token, backed by our company, to fortify and expand our ecosystem using innovative systems and technology. Blo token will serve various purposes including memberships, licenses, and accessing our forthcoming L2-based network slated for Q3.

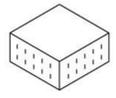

This network will democratize the use of our AI tools, enabling collaborative development, with Blo token serving as its cornerstone.

Mapping

MAPPING THE YEAR

In 2024, our primary focus will be on laying the foundation of our ecosystem through the launch of our token. We will unveil our first tech demos for private access, gradually transitioning to a full public launch. Concurrently, we will implement our own L2-Chain, establishing a bridge between the mainnet and AI to enhance interoperability and scalability.

Q1 - Q2 MAP

- LAUNCH (CLOSED BETA)
- TOKEN LAUNCH (BLO)

Q1 - Q2 INTERN MAP

- LAUNCH TOKEN + ON EXCHANGES
- ONBOARD 5 MORE TEAM MEMBERS
- FINALIZE NYC OFFICE
- HIT 5K FOLLOWERS ON TWITTER(X)
- PLAN BTOME LAUNCH
- SECURE 2M IN FUNDING
- CLOSED BETA ROLLOUT TO DEVS

Q2 - Q3 MAP

- PRIVATE BETA FOR PRIVATE PPL
- SHOWCASE PRODUCT (BTOME)
- FIRST PRIVATE API LAUNCH
- (BTOME) TECH DEMO

Q2 - Q3 INTERN MAP

- SECURE 2.5M IN FUNDING
- ONBOARD 10 MORE TEAM MEMBERS
- LAUNCH FIRST TECH DEMO

Q3 - Q4 MAP

- ANNOUNCE 10 NEW TECH PARTNERS
- (BTOME) FULL ROLLOUT
- L2-CHAIN TESTNET LAUNCH
- NEW CEO ANNOUNCEMENT

Q3 - Q4 INTERN MAP

- SECURE 7.5M IN FUNDING
- ONBOARD 30 MORE TEAM MEMBERS
- LAUNCH BLO-BRIDGE (L2)

Q4 MAP

- ROLLOUT OF PUBLIC API
- L2-CHAIN MAINNET LAUNCH
- LAUNCH OF DEV-TOOLS
- \$BLO TOKEN BASED TOOLS LAUNCH
- PARTNER PROGRAM LAUNCH

Q4 INTERN MAP

- ANNOUNCE ECO-PARTNERS
- BOOST BLO-TOKEN SUPPORTANCE
- (Q1.25) CALLS & PLANS

PARTNERS

& COUNTING
