# $HOB Whitepaper

**The Hobbit defeats The Dragon.**
**The true greatest Solana airdrop of all time.**

## A Hob's Tale

$HOB, our beloved memecoin, launches on the Solana blockchain. Just like Shire-folk nestling down in their cozy hobbit-holes, $HOB finds its home in the fast and efficient realm of Solana.

## T.G.A.I.H

The True Greatest Airdrop in History awaits loyal $HOB holders. This airdrop will be the stuff of legends, surpassing all others in the history of Solana.

## Fellowship of HOB

$HOB companions will form the greatest community on Solana, bound by the loyalty and warm-heartedness of hobbit-kind. Together, they will face challenges and forge unbreakable bonds that last many epochs.

## The Unexpected Party

When the dragon is defeated, a mystery event will unfold. Much like Bilbo's unexpected party, $HOB holders will be in for a delightful surprise that will go down in Solana history.

## Hold The Precious

To qualify for the airdrop, all you need to do is buy and hold $HOB. Like Gollum clinging to The Precious, simple seek shelter in your mountain cave and hold onto your $HOB tokens...until you forget your name!

## Slay the Dragon

1% of the $HOB token supply is allocated to DEFEAT THE DRAGON. Like the brave hobbit Bard who slew Smaug, $HOB holders will unite to take down the malevolent beast.

## Quests of the Shire

$HOB holders can embark on quests on Zealy.io to boost their chances with the airdrop. These quests will test their wit, courage, and dedication, much like the trials faced by Frodo and his companions.

## There and Back Again

When $HOB's market cap surpasses that of Nvidia, $HOB will acquire the rights to The Hobbit. This epic journey will be remembered as "$HOB: There and Back Again, A Memecoin's Tale."
