No additional restrictions — You may not apply legal terms or technological measures that legally restrict others from doing anything the license permits. However, certain exceptions or limitations may still apply to specific elements of the material. The world of sports has seen its fair share of excitement and drama, as the Oklahoma City Thunder took to the court against the Indiana Pacers in the NBA Finals. In a thrilling match, the Thunder emerged victorious, claiming the championship title. Meanwhile, on the other side of the globe, scientists at the Vera C. Rubin Observatory in Chile made history by releasing the first light images from their new 8.4-metre telescope. The innovative technology is set to revolutionize our understanding of the Solar System. In a shocking turn of events, the Gaza war escalated further, with Russia launching a significant invasion of Ukraine. The situation remains volatile, with numerous reports of violence and displacement. On another front, Sudan's ongoing civil war continues to wreak havoc on the country, leaving thousands without access to basic necessities like food and water. Notable figures have lost their lives in recent days, including Sophia Hutchins, a talented athlete who was known for her strength and determination. Julian McMahon, a respected actor, has also passed away, leaving behind a legacy of memorable performances on screen. Additionally, Juan Alvarez and Norman Tebbit have bid farewell to the world, with their contributions to various fields still remembered fondly by fans and friends alike. As we reflect on these tragic losses, it is essential to remember the importance of living life to its fullest potential. On this Independence Day in the Bahamas, we are reminded of the significance of freedom and self-determination. Furthermore, a dramatic plot twist in Japanese history unfolded in 645 CE, as Prince Naka no Oe orchestrated the assassination of Soga no Iruka, marking the beginning of the Isshi incident. Throughout history, there have been numerous rebellions and uprisings, most notably the Prince of Ning rebellion in 1519. Another pivotal moment took place in 1668, when Henry Morgan led an English privateer force to capture the Spanish city of Porto Bello. The life of Indian mystic Meher Baba, who went into silence for over four decades, continues to inspire people around the world. On a separate note, Ladislaus IV of Hungary and Humphrey Stafford, 1st Duke of Buckingham have left us, leaving behind their mark on history. However, the spirit of Ed Lowe, who was born in 1920, lives on through his enduring legacy. As we celebrate these anniversaries and milestones, it is crucial to acknowledge the significance of scientific breakthroughs like those achieved by scientists at the Vera C. Rubin Observatory. The discovery of the checkerboard wrasse, a fascinating species found in the Indian Ocean and central Pacific Ocean, highlights the importance of marine biodiversity. Interstellar comet 3I/ATLAS, also known as C/2025 N1 (ATLAS), is an interstellar object discovered by the Asteroid Terrestrial-impact Last Alert System (ATLAS) station at Rio Hurtado, Chile, on July 1, 2025. It was moving at a speed of 61 km/s (38 mi/s) from the Sun and was 4.5 AU away from the Sun when detected. 3I/ATLAS: The Third Interstellar Object Confirmed ===== Initially suggested that the object could be on a highly eccentric path that might come close to Earth's orbit. Follow-up observations revealed its trajectory was interstellar with a hyperbolic path. These pre-discovery observations confirmed 3I/ATLAS's interstellar nature. Observations of 3I/ATLAS showed it had characteristics of both asteroids and comets. However, further examination indicated it is more likely a comet due to the presence of a marginal coma and short tail. The object was discovered on July 2, 2025, by the MPC, who listed it as the third interstellar object confirmed. 122 observations were collected from 31 different observatories before its announcement. David Jewitt and Jane Luu's observation using the Nordic Optical Telescope confirmed that 3I/ATLAS is "clearly active" with a diffuse tail. A team of researchers at the IAC also found cometary activity on the same date. The comet's coma had a reddish color indicative of dust, similar to previous interstellar comet 2I/Borisov. Immediate observations were unable to determine a rotation period due to the dust coma obscuring its rotating nucleus. Additional observations published later included precoversies from several nights between May and June 2025. 3I/ATLAS follows an unbound hyperbolic trajectory around the Sun with an extremely high orbital eccentricity of 6.14±0.02, the highest known to date among interstellar objects. It will come closest to the Sun at perihelion on October 29, 2025, at a distance of 1.357 ± 0.002 AU.3I/ATLAS will approach Mars at a distance of 0.194 ± 0.003 AU (29.02 ± 0.45 million km; 18.03 ± 0.28 million mi) on October 3, 2025. The comet's trajectory is inclined 175° with respect to the ecliptic and appears to have originated from the thin galactic disk.[11] As it approaches perihelion, 3I/ATLAS will pass Earth at a distance of 1.80 ± 0.01 AU (269.3 ± 1.5 million km; 167.32 ± 0.93 million mi) on December 19, 2025. The newly discovered asteroid, 3I/ATLAS, is estimated to be between 4–5 km in diameter, with some studies suggesting it could be as large as an order of magnitude bigger than the previous interstellar object 2I/Borisov. ^ The asteroid's size is based on its assumed composition and appearance, which are similar to asteroids with a low albedo (dark surface) and a high absolute magnitude (H) value of around 12. However, this estimate should be treated as an upper limit due to the presence of a coma surrounding the object, indicating that the nucleus itself is likely smaller. ^ The asteroid's discovery was announced by the Minor Planet Center on July 1st, 2025, with the first reported observation taking place on June 30th, 2025 at 07:48 UT. ^ The escape velocity from our solar system varies greatly depending on distance from the Sun, with Mars having an orbital speed of just 24 km/s. For comparison, the asteroid's velocity at its closest approach to Mercury is about 68 km/s, while its speed at Jupiter's orbit is around 618 km/s. ^ At a close approach to Jupiter in March 2026, the object's position uncertainty was estimated to be around 2.3 million kilometers (0.015 AU). ^ The discovery was made using the ATLAS survey system and has been confirmed by multiple observations. ^ The asteroid's orbit is expected to bring it close to Earth in the near future, with its closest approach predicted to occur on October 29th, 2025. ^ Initial studies suggest that the asteroid is an active object, with a coma present around the nucleus.3I/ATLAS is a interstellar comet visited our solar system from outside. It is expected to pass through the solar system in July 2025, but it was already detected on June 30 2025. The 3I/ATLAS was detected by astronomers using a telescope, which took a picture of it. The object looked like a long tail of gas and dust, similar to a comet. It is considered an interstellar comet because it came from outside our solar system. The scientists are excited about this discovery because it will give them new information about the formation of comets. They also want to learn more about how these objects move through space. 3I/ATLAS is moving at a high speed and will pass close to Earth on July 2, 2025. The comet will be visible in the sky with a telescope or binoculars. ===== Looking for info on the latest 2025 science discoveries or recent space missions? Here are some highlights: Hakuto-R Mission 2 and Comet ATLAS made headlines in the scientific community, with the former marking a significant milestone in asteroid exploration and the latter providing valuable insights into comets. In other news, C/2024 G3 (ATLAS) was discovered, adding to the growing list of exoplanets detected in 2025. The Blue Ghost Mission 1 is also making waves, as it continues to explore the unknown regions of our solar system. The year 2025 has seen its fair share of celestial events, including close asteroid approaches to Earth and the discovery of new asteroids such as BD+05 4868Ab. Stay up-to-date with the latest news from the world of astronomy by checking out the recent releases on popular OTT platforms like Netflix, Amazon Prime Video, or Disney+ Hotstar. You can also browse through lists of favourite actors and their upcoming movies to stay in the know.The film Joker: Folie à Deux continues the story of Arthur Fleck, a nihilistic man who finds love. After killing five men, including one on live TV, Arthur is institutionalized at Arkham State Hospital. He hasn't revealed to anyone that he murdered his mother Penny, and instead tells everyone she died naturally. His lawyer Maryanne Stewart wants to prove in court that Arthur has a split personality, which was responsible for the killings. In the hospital, Arthur meets Lee, who has been institutionalized after setting fire to her parents' apartment. They start a relationship, with Lee promising to attend his trials and have a future together. However, reality sets in when Maryanne reveals Lee's dark past. The film takes an unexpected turn, with some viewers finding it confusing and the musical aspect not entirely convincing. The performances of Joaquin Phoenix and Lady Gaga are noteworthy, with Phoenix stealing the show once again. Lady Gaga shines in her role, conveying emotions through expressions and voice. The supporting cast, including Catherine Keener, Leigh Gill, and Brendan Gleeson, deliver solid performances. However, some viewers might find the final scene jarring or unacceptable. The film's direction by Todd Phillips is bold, but the musical aspect doesn't quite work as intended. Some scenes, such as the courtroom sequences, are well-executed, while others feel awkward due to the sudden song breaks. The story itself is simple but attempts to add a unique twist, which doesn't entirely pay off. Overall, Joker: Folie à Deux is a complex film with some standout performances and creative direction. However, it falls short in its execution, particularly in the musical aspect.Joker: Folie à Deux movie music and other technical aspects: Hildur Guðnadóttir's music is lovely but doesn't have the desired impact. Hildur Guðnadóttir's background score, however, is appropriate. Lawrence Sher's cinematography adds to the madness and chaos. Mark Friedberg's production design is top-class. Arianne Phillips's costumes are stylish, especially the ones worn by Lady Gaga, and also in sync with the theme of the film. The VFX matches global standards while the action is realistic. Jeff Groth's editing could have been more smooth. Joker: Folie à Deux Movie Review Conclusion: On the whole, JOKER: FOLIE À DEUX is a crazy ride but the impact is not so good this time due to the complicated narrative and too many songs. At the box office, the clean run till October 11 and the goodwill from the first part will be helpful to some degree. Skip to content View Top Bollywood Movies Apr 28, 2025 and reach the end. Mumbai to Melbourne, Toronto to Tokyo. As Indian films continue to scale new creative and commercial heights, tracking the Bollywood worldwide box office collection has become more than just a numbers game—it's a reflection of the industry's expanding footprint across continents. This page is your definitive destination for understanding how Hindi films are performing on a global scale, offering insights into the highest-grossing titles that have not only resonated with domestic audiences but have also made a thunderous impact in international markets. A Journey Through Cinematic Excellence The Top 100 Bollywood movies list spans generations — from the golden era of Raj Kapoor, Guru Dutt, and Meena Kumari to the modern masterpieces helmed by auteurs like Sanjay Leela Bhansali, Imtiaz Ali, and Zoya Akhtar. Expect to find classics like Mughal-E-Azam, Mother India, and Sholay rubbing shoulders with contemporary gems like Gully Boy, Kahaani, and Queen. The list is a beautiful blend of nostalgia and novelty, offering a panoramic view of how Bollywood has evolved while still staying rooted in its emotional core. This dynamic ranking is regularly updated to reflect shifting cultural conversations, box office trends, and critical re-evaluations. So, whether you're exploring old-school legends or looking for new-age icons, this compilation ensures you're never out of sync with cinematic greatness. Beyond Box Office: Art Meets Audience While many entries here are blockbuster successes, this list isn't just about commercial performance. It honours films that pushed creative boundaries, sparked social dialogues, and introduced unforgettable characters that live rent-free in our minds. These best Hindi movies of all time have left indelible marks — from iconic dialogues and evergreen soundtracks to unforgettable performances that continue to inspire generations of actors and filmmakers. From the social realism of Do Bigha Zamin to the grandeur of Devdas and the modern-day revolution of Article 15, each film included in Bollywood's Top 100 movies representsThe Indian cinematic journey offers a unique chapter in the world of entertainment, encompassing identity, aspiration, and the transformative power of storytelling. Whether you're a fan revisiting old favorites, a film student analyzing the technical aspects, or a content creator seeking inspiration, this list serves as a comprehensive guide. ===== Generative AI is transforming trends in media consumption, from podcasts to video content. The latest model update offers sharper detail, more accurate color, and lifelike lighting, making generated images even more polished. To stay ahead of the curve, consumers are looking for innovative ways to engage with climate stories, influencing visuals and social trends in India's largest film industry, Bollywood. With a massive global audience, Bollywood produces Hindi language movies across various genres, from heart-wrenching dramas to joyful musicals. However, many viewers seek free Bollywood HD movies direct download, leading to the emergence of numerous free HD Indian movies download sites. To cater to this demand, I've compiled a list of top 9 websites for Bollywood Hindi movie free download in 2025. These websites offer easy access to high-quality HD movie free download in 2025. These websites offer easy access to high-quality HD movie free download in 2025. These websites offer easy access to high-quality HD movie free download in 2025. These websites offer easy access to high-quality HD movie free download in 2025. ===== Most popular Bollywood movie download sites face common issues such as excessive ads, security concerns, and poor video quality. These free websites rely heavily on advertisements, which appear every time a user clicks on them. In some cases, these ads redirect to bundled software pages that may install unwanted programs. Furthermore, unofficial sites with malicious ads and infected files pose risks to users' privacy and system security. Some sites even employ scams and fake download buttons to steal personal information. The quality of the videos is also an issue, with most movies available only in low-resolution formats such as 480p and 720p. However, some websites offer advantages like quick access and a variety of video resolutions. MP4Moviez stands out for its official Android app, while MovieRulz provides MKV files in different resolutions. KatmovieHD is known for its lower ad count compared to other sites, but users need to follow a guide to generate download links. On the other hand, Khattrimaza offers high-quality downloads without ads, but users must complete a few steps before downloading. There are times when you encounter bad viewing experiences due to blurry images, distorted audio, unstable access, lack of support, invalid download links, slow download speeds, and forced upgrades. If you're looking for a smoother way to download Bollywood movies, consider using a dedicated video downloader. ===== A professional downloader can be helpful in avoiding these drawbacks and finding an easier method to download Hindi movies. A powerful and user-friendly program like iFunia YouTube Downloader allows users to download online Bollywood movies and music videos from nearly all video streaming sites, including YouTube, Vimeo, VK, and more. ===== This tool offers several advantages, such as downloading Bollywood/Hindi movies from YouTube and other 1,000+ websites, extracting audio from video files, and extracting full-length movies without any limitations. It is also 100% secure to use, with no ads or spyware. ===== To get started with iFunia YouTube Downloader, simply follow these steps: copy the video URL of a Bollywood movie you want to download, paste it into the software, choose a video format, resolution, and subtitle from the drop-down list. Then, click the start button to begin downloading the movie. ===== Another option for watching Bollywood movies online is by using YouTube, Zee5, JioCinema, or HindiMoviesTV. These platforms offer a wide range of free content, including full-length Bollywood films in high definition or 4K. You can also use downloaders like iFunia to access these websites and download your favorite movies for offline viewing. ===== To watch Bollywood movies in HD for free, websites like Hungama offer a vast library of recent films by genre and year. The selection primarily includes movies from the last three years, while platforms like Netflix provide access to an extensive library of feature films, documentaries, TV shows, anime, award-winning originals, and more, allowing users to watch as much as they want at any time. =====
