## Silent hill 3 guide

Welcome to ICG's Silent Hill 3 guide, where you'll find a comprehensive walkthrough, puzzle solutions for each difficulty and riddle mode, enemy tactics, item lists, weapon lists, and more! This guide is designed to help you navigate the creepy and disturbing world of Silent Hill as you control Heather through her nightmare. The guide was written using the Japanese version of Silent Hill 3 with the English language option mode available, making it extremely unlikely that there will be any differences for U.S. and PAL versions. The walkthrough begins at Lakeside Amusement Park Dream, where you'll follow a straightforward path until you reach the end of the roller coaster rails. You can skip the wandering around by letting Heather die or fall into a pit (except in Action Level Easy, where Heather can't fall into pits). There's also a shop along the way with nothing in it, but this area is only experienced on the first playthrough. The next section takes you to Central Square Shopping Center, where you'll find a save point on the restroom mirror. From there, exit through the window and follow the path to enter the door along the way. After clearing the game, you can access new areas in Extra New Game mode. In this section, you'll retrieve items like the Infinite Submachine Gun, Handgun, Flamethrower, Beam Saber, and more. The guide concludes with Central Square Shopping Center (Otherside), where you'll find a save point in the room across from the bottom left men's restroom. You'll also discover flashlights and other items to aid you on your journey. --- (Note: This paraphrased text maintains the original language and structure of the provided text.) To begin, head to the Church on the Upper Level and follow these steps: Go past the altar where you'll find a "Eye of Night" Tarot Card on a table in front of a stained glass window. Move to the right side door at the back of the altar and use the Church Map to locate the Confession Booth. From there, exit through the main door down the hallway then go out the large rectangular room's other door into another hallway. Go straight past the bottom right door where you'll find a small square room containing a Cassette Tape. Next, head to the right-hand side of the hallway with the distinctive shape of seven; pass through its doors on your left. You will find a Save Point just after an angel painting at the turn in the hall. Move this painting and enter it to continue. Keep moving forward through the next area and you'll encounter a large hole. Go past it down to the lower level church by passing through the bottom right door, then get into the small square elevator to reach your destination. At the Lower Level Church follow these steps: Go out the top left door and get past Heather where there's an easily accessible "Hanged Man" Tarot Card. Return back through the big rectangular room then go straight down a long hallway until you see a passage marked by camera angle changes in it. You will need to look at a wall in this place for hidden information before entering a door that has your final Save Point on it. Go past Heather's right-hand side, pass through two doors and finally into the main part of the large room. After the long hallway ends go down the last set of stairs, then enter the book lying flat against a chair to get your "Fool" Tarot Card. Your goal now is to travel all the way back through the main part of the church until you reach the lower-left exit door where there's another Save Point on the shelf. On the wall to the left of this room, find a Brass Key with a butterfly. Head back up and then pass through the key-secured bottom-right door. You will now enter into yet another long hallway and have access to three different doors: Head straight past the lower left door that has your "Priestess" Tarot Card inside it after examining a tape deck using Cassette Tape you found earlier. In order to complete the level, head back down through the church until you reach the smaller room where there is another Save Point in it. Look over at the picture of a book lying flat on a bed for guidance in finding and using your final Tarot Cards. At the lower end of this path pass through the main large doors before proceeding to the Central Square Shopping Center's My Bestsellers Bookstore, located next door. Upon arrival here follow these steps: Put all five Shakespeare books back onto their shelf according to their proper order to solve a simple math puzzle and get your passcode. To obtain a four-digit passcode in order of difficulty: Easy 4639, Normal 8634, Hard 4896. The code is randomly generated and displayed on an alarm clock. In harder levels, the time must be converted from 12-hour to 24-hour format, considering that numbers after noon should be added with a leading '1'. For instance, 6:45 PM equals 1845. The passcode for Brookhaven Hospital's crematorium is found by matching bed numbers with those on a door plate. Harder codes include combinations like Fool Moon Eye Hanged Priestess. Players can obtain various weapons, including knives and shotguns, in specific locations throughout the game world.
