Unsure about the dosage or your dog's condition? Get expert advice from a licensed vet it's quick, easy and reliable! Chat with a Vet Now Important: Always consult your veterinarian before administering any medication to ensure the correct dosage and frequency. This information is a general guideline and should not replace professional medical judgment. When managing chronic pain, seizures or anxiety in dogs, Gabapentin is often prescribed for relief. However, determining the correct dosage can be complex as it depends on several factors including dog's weight, condition being treated and overall health. To ensure proper dosing, we've created a detailed guide and tool to help pet owners provide the right amount. Gabapentin Dosage for Dogs The standard dosage of gabapentin for dogs ranges from 10-20 mg per kilogram every 8 hours. However, this can vary depending on the specific condition being treated and the individual dog's needs. A general guideline for gabapentin administration based on a dog's weight is as follows:- Low dose: 50 mg compounded liquid or capsule (5-10 lbs)- High dose: 100 mg oral capsules or tablet (11-20 lbs)- High dose: 200 mg oral capsules (21-30 lbs)- Medium dose: 150 mg oral tablets (31-40 lbs)- High dose: 400 mg oral tablets or capsules (41-50 lbs)It is essential to consult with a veterinarian before administering gabapentin, as they will adjust the dosage based on your dog's specific needs. The vet can also provide guidance on how to use the medication safely and effectively. Common side effects of gabapentin in dogs include sedation, lethargy, poor balance, and difficulty walking. These effects are usually more noticeable when higher doses are used. To minimize these issues, it is crucial to follow your veterinarian's instructions and adjust the dosage as needed. In some cases, gabapentin can cause vomiting or diarrhea, especially at higher doses. However, most of these side effects tend to wear off within 8-12 hours. It is also essential to note that gabapentin can interact with other medications your dog may be taking, such as phenobarbital, NSAIDs, and sedatives. To ensure safe and effective use of gabapentin for dogs, it is recommended to: * Use a vet-approved liquid version * Avoid human liquid Gabapentin, which may contain xylitol (toxic to dogs) * Give the medication with food if your dog has a sensitive stomach * Hide capsules in soft treats or pill pockets It's also important to note that gabapentin can start working within 1-2 hours of administration. For anxiety, it's recommended to give it 1-2 hours before the stressful event. Gabapentin dosage in dogs: A guide for pet owners Gabapentin is a medication commonly used to treat various conditions in dogs, such as anxiety, epilepsy, and arthritis. Proper dosing is crucial when administering gabapentin to your dog to ensure their safety and efficacy. This guide will help you determine the right dosage based on your dog's weight and condition. The English version is one of many available Wikipedias, with over 1 million articles listed in other languages. The article also includes information about the year 455 CE, which was a significant year in history. It marks the assassination of Emperor Valentinian III by two Hunnic retainers and the subsequent rise of Petronius Maximus as emperor. The article provides details on various calendars used to mark this year, including the Gregorian calendar, Julian calendar, and others. Additionally, the text highlights the cultural and historical significance of the 455 CE, mentioning notable events such as King Genseric's sack of Rome and the transition from the Theodosian dynasty. Western Roman Empire. Maximus secures the throne through bribery in the imperial palace. He solidifies his power through a forced marriage with Licinia Eudoxia, widow of Valentinian III. Maximus appoints Avitus, his most trusted general, to magister militum and sends him on an embassy to Toulouse to gain Visigoth support. He elevates Palladius to Caesar, having him marry Eudocia, daughter of Valentinian III. On May 31, Maximus is stoned to death by a mob fleeing Rome amid reports of the Vandals plundering Italy. June 2 Sack of Rome: King Genseric leads the Vandals into Rome after promising Pope Leo not to burn and plunder the city. The city is sacked for two weeks. Eudoxia and daughters are taken hostage, with loot sent to Ostia before departing for Carthage. July 9 Avitus proclaimed Roman emperor in Toulouse, later recognized by Gallic chiefs near Arles. September 21 Avitus enters Rome with a Gallic army, restoring imperial authority in Noricum and leaving a Gothic force under Remistus at Ravenna. The Ostrogoths conquer Pannonia and Dalmatia. The 4th century CE, spanning from 301 to 400, was a transformative period marked by significant changes in the Eastern Hemisphere. The early part of the century saw Constantine the Great's rise to power and adoption of Christianity, leading to the establishment of Nova Roma (New Rome), later renamed Constantinople. This development signaled the beginning of the end for the Western Roman Empire as it became increasingly dependent on its eastern half. As the century progressed, the two-emperor system previously established by Diocletian took hold, with the east growing in importance as a center of trade and imperial power. Christianity emerged as the official state religion, replacing the old pagan culture. Despite experiencing general prosperity, recurring invasions by Germanic tribes from the north marked the beginning of the decline of this once-thriving city. In China, the Jin dynasty faced internal strife and external pressures, leading to the insurrections of northern barbarian tribes and the collapse of the empire. The Former Qin dynasty briefly united the north before being defeated at the Battle of Fei River in 383 CE. This conflict sparked civil war and contributed to the downfall of the Former Qin. Archaeological findings indicate that state-level societies emerged in Korea during this period, giving rise to the Three Kingdoms of Korea. The 4th century was marked by significant events that shaped the course of history in various regions. The period saw the rise and fall of empires, the spread of Christianity, and pivotal battles that altered the global landscape. Historians refer to this era as the "Long Fourth Century," spanning from 284 to 450 AD. During this time, the Roman Empire was plagued by internal conflicts, external threats, and the gradual decline of its power. In Asia, the Gupta Empire was established in the early 4th century, while in China, the Sixteen Kingdoms period began in 304-439 AD. The Kingdom of Aksum adopted Christianity around 325-328 AD, and the Huns launched a series of attacks on the Sassanid Empire from 350-400 AD. In the Americas, Tikal had a population of approximately 100,000 when it was conquered by Teotihuacan, marking the beginning of the decline of this once-thriving city. The Butuan Boat One, an ancient Balangay ship native to the Philippines, was built around 320 AD. Europe saw significant events during this period as well. The Kingdom of Aksum expanded its territories by conquering the Kingdom of Kush around 350 AD. The Huns continued their attacks on Europe, and the Visigoths appeared on the Danube, eventually leading to their entry into the Roman Empire in 376 AD. The Battle of Adrianople in 378 AD marked a turning point in Roman history, as the Roman army was defeated by the Visigoth cavalry, resulting in the death of Emperor Valens. Theodosius I, who later became the Roman emperor, banned pagan worship and made Christianity the official religion of the Empire in 378-395 AD. The 4th century also saw significant cultural and artistic developments. Wang Xizhi created a portion of the Feng Ju album during this period, which is now preserved at the National Palace Museum in Taipei. A stone inscription from the Kutai Martadipura kingdom was written in Sanskrit using Pallava script around 350 AD. Natural disasters, such as earthquakes and tsunamis, also occurred during this period. An earthquake with a magnitude of at least eight struck the Eastern Mediterranean in 365 AD, causing widespread destruction in several regions. The 4th century came to an end with the death of Theodosius I in 395 AD, marking the permanent split of the Roman Empire into two distinct halves. The 4th century was a time of significant innovation and cultural development in various parts of the world. In China, the stirrup was invented by no later than 322 AD, revolutionizing warfare with its introduction. The Kama Sutra, an ancient Indian text on eroticism and spirituality, dates back to between 400 BC and 300 AD. Meanwhile, India boasts the world's first Iron Pillar, located in Delhi. In the realm of mathematics and astronomy, trigonometric functions such as sine and versine originated in Indian astronomy during this period. The Codex Sinaiticus and the Codex Vaticanus Graecus 1209 are notable for being among the earliest Christian bibles. Additionally, the Book of Steps, a collection of Syriac religious discourses, provides valuable insights into early Christian thought. This century was also marked by the development of various writing systems and literary works. The invention and influence of the stirrup had far-reaching consequences in Chinese military history, while ancient Indian texts like the Kama Sutra offer unique perspectives on human relationships and spirituality. Sources such as the Timeline of Historic Inventions 4th century and historical accounts from authors like J. Roberts and S. McGill provide a comprehensive understanding of this pivotal era in world history. K Health, a virtual care platform, has partnered with various health systems and insurance providers to offer high-quality virtual care to patients in different regions. The platform allows users to access care from top-tier academic health systems, such as Cedars-Sinai, and share their health records seamlessly across multiple providers. The company's team includes doctors, scientists, and entrepreneurs who aim to reinvent primary care for the better. Co-founder Alton has a personal experience of frustration with the US healthcare system, which inspired him to build K Health. He previously co-founded Vroom (NASDAQ: VRM) and Wix (NASDAQ: WIX). K Health's hybrid model combines virtual and in-person care, making it easier to coordinate patient care and share health records. The platform has already helped thousands of patients access high-quality care from home. Some notable partnerships include: * Hartford HealthCare providers in Connecticut * Hackensack Meridian Health clinicians in New Jersey * Cedars-Sinai providers in California Certain Elevance Health (formerly Anthem) members and SureSt (UnitedHealthcare company) members can use their insurance to pay for care on the K Health app. Dr. Brown is an experienced emergency medicine physician with over two decades of expertise in the ER, holding a medical degree from Tulane University since 1996. He has been instrumental in shaping K Health's senior clinical roles and has worked at prominent US hospitals such as University of Illinois, Chicago, and IU Health Arnett Hospital. He served McKinsey & Company, focusing on growth strategies for healthcare providers, covering financial operations. Brad serves as Vice President of Finance and leads our finance team based on data analysis. He previously managed corporate finance at several major companies, including PepsiCo, MBIA, and PURE Insurance. Neal is Senior Director of Analytics, overseeing our analytics department. He was a Strategy, Operations & Analytics Lead at ClassPass in the past.
