Recently, an update (UPDATE 62) was released, featuring a reworked Trophy Road in Starr Park and new brawlers, including Ali and Trunk. The update also introduced Angels vs. Demons events and Brawl Pass seasons 40 and 41. Nulls Brawl is a private server that offers a similar experience to Brawl Stars, but with some key differences. ===== Nulls Brawl allows players to access all brawlers at max level without needing to grind, and it also features unlimited gems, coins, blings, and boxes. This makes it easier for players to progress through the game and enjoy all its content without spending real money. The game also includes a Brawl Pass and Pro Pass system, which can be activated for free. Players can enjoy all game modes, including special events, and can access various box drops like Epic Box, Mega Box, Starr drop, Hypercharge drop, etc. An XP Doubler is also available that doubles your earned XP to increase your Brawl Pass tiers easily. One of the best features of Nulls Brawl is its support for installing extra modifications via assets files created by other developers. There are many [name]NullsBrawlAssets files with custom features like China skins, Minecraft graphics, Ghoul brawlers, no outlines, etc. You can add them in the Nulls Brawl and get extra features. Supercell has pulled out Brawl Stars from some countries like Russia, Belarus, etc., but Nulls Brawl is a private server that allows players to play in those regions as well. It can also be played alongside Brawl Stars on the same device, making it a great alternative for players who want to experience more. Overall, Nulls Brawl is packed with features such as unlimited resources, unlocked brawlers & skins, all skins to all pins & sprays for customization, etc. Below, we have explained all its features in detail, so you can learn how to secure your game account, install it, and understand the difference between it and Brawl Stars. ===== The Brawl Pass offers numerous attractive rewards, including seasonal exclusive skins, pins, sprays, and player titles. Initially, it was available for purchase using gems, but later switched to real money. This change was made to ensure that all players can enjoy its benefits without worrying about the cost. The Pro Pass is another type of pass that provides unique in-game items, such as Battle Card Frames, Pro skins, and gem bundles. The Pro skin can be upgraded to Level 11, unlocking various enhancements like attack effects, takedown effects, and spawn effects. It comes pre-activated in the Nulls Brawl for free. One of the most challenging aspects of the game is unlocking brawlers, which can take several months. To ease this process, Starr Road has introduced a 1-gem pack that unlocks every brawler in the game. Upgrading brawlers to their max level (Level 11) requires collecting power points and coins, which can be time-consuming. The game provides another 1-gem pack that upgrades all brawlers to their max level with a single tap. Gadgets, which grant special abilities during battles, unlock at Level 7 and cost 1000 coins. Star Powers are passive abilities that empower brawlers' basic attacks or Super attacks and unlock at Level 9. Gears provide passive bonuses to brawlers and unlock at Levels 8 and 10. Hypercharge unlocks at Level 11 and grants attribute boosts, enhancing the Super attack. Although getting all these gadgets, star powers, gears, and hypercharges for a single brawler takes time, purchasing the "Upgrade all brawlers" pack in the shop solves this issue. The Pro Pass features unique Pro skins with upgradable levels in each rank season. However, these skins come at a cost, often requiring real money, gems, or blings. The game's shop offers a 1-gem pack that unlocks all skins, including rare and legendary ones. Players can customize their profile with pins, sprays, and other items using this pack. With the Pro Pass, players can experience the thrill of opening box drops, starr drops, and hypercharge drops without spending real money. The shop offers free boxes for unlimited access. XP is required to unlock tiers in the Brawl Pass, but it can be obtained from battles. Nulls Brawl Experience Enhanced by New Features and Gameplay Mechanics Nulls Brawl, the popular battle royale game, has recently introduced several exciting features that elevate the gaming experience for its players. The addition of the XP doubler allows players to collect double their experience points in each battle, accelerating their progress through the ranks. Additionally, Nulls Brawl now offers a wide range of game modes, including special events such as Big Game and Mystery Mode, as well as trophy events like Basket Brawl, Hot Zone, Wipeout, Hunters, etc. The maps are updated regularly to keep the battles fresh and exciting for players. A significant improvement is the introduction of Null's Connect, a feature that allows players to save and sync their progress on the cloud, making it accessible across multiple devices. This innovation has eliminated the need to worry about losing progress after uninstalling the game. Moreover, Nulls Brawl now supports asset files, enabling players to install modifications such as Minecraft-like graphics, China server exclusive skin packs, Tokyo Ghoul & Dota 2 character packs, etc., via installing additional assets with the NullsBrawlAssets extension. This feature has opened up new possibilities for developers to create custom content. It's worth noting that Nulls Brawl does not feature bots in its battles, ensuring fair competition among players. The game's balance is maintained through the use of max brawlers and all gears & gadgets, allowing players to engage in battle at full power without any imbalance in levels.
