Neeley School of Business at Texas Christian University. Prior to that, he was dean at Miami University and Kansas State University. Short taught at the University of Texas-Austin and the University of Chicago before entering administration.Patricia Libby is a professor of accounting at Ithaca College. She has taught financial accounting at various universities, including Eastern Michigan University and the University of Texas. Libby received her degree from Penn State and has published articles in top journals.The authors of Financial Accounting believe that their textbook is unique because it focuses on real-world companies and makes financial accounting interesting. They aim to engage students with a building-block approach to teaching transaction analysis, slowing down the introduction of new concepts to allow for greater mastery. Accounting for Financial Decision Making=====financial statement accounting system managerial decisions investing financing financial performance financial analysis financial reporting.The distinctive approach of Libby's Financial Accounting is well-known for its company focus, making financial accounting relevant to business success. Throughout each chapter, a familiar company is used, its decisions explained, and its financial statements discussed, showing the importance of accounting in real-world scenarios. Libby's Financial Accounting has been widely adopted since its first publication and continues to be a leading textbook on financial accounting. The authors of the Eighth Canadian Edition have enhanced it by providing a more engaging introduction to financial accounting for students. They achieve this through their unique learning approach, which involves real examples of companies familiar to students, making the material from the start of class.The Eighth Canadian Edition boasts significant improvements, including:- A greater focus on reporting by tech giants such as Alphabet (Google), Meta Platforms (Facebook), Apple, Amazon, and Microsoft.- Updated real company information reflecting recent annual report data.- A new feature on Environmental, Social, and Governance (ESG) Reporting with excerpts from sustainability reports of focus companies.- Marginal Important Tips to add clarity and remind students of key information.- Related Homework, Self-Study Quizzes, Guided Help videos for Self-Study Quizzes, Alternate Problems, and a revamped Connect Interface These updates are designed to enhance student learning, particularly in data analytics and visualization skills. The textbook includes new features such as auto-graded data analysis exercises, Data Analytics Boxed feature, Integrated Excel Activities, Tableau Dashboard Activities, and Focus Company Approach. Libby's Financial Accounting uses a building-block approach to teach transaction analysis, spreading its coverage over two chapters to allow students sufficient time to master the material. The textbook also incorporates real-world examples from familiar companies, making accounting more engaging and relevant for students.A comprehensive approach to financial accounting is presented in the textbook, focusing on building student mastery through a gradual introduction of transactions and real-world examples. The content balances technical requirements with practical applications, ensuring students understand both the use and preparation of financial statements.Libby's methodology incorporates International Financial Reporting Standards (IFRS) and Accounting Standards for Private Enterprises (ASPE), providing a clear distinction between the two types of reporting. This approach prepares students to analyze and interpret real financial information, ultimately enhancing their decision-making skills.The textbook's features include a wealth of problem material based on Canadian and international companies, as well as assignments that require conceptual analysis and critical thinking. McGraw-Hill Connect empowers students with digital tools, enabling instructors to streamline course management and maximize student engagement.=====She is chair of the department of accounting at Ithaca College, where she teaches undergraduate financial accounting course.
