

Click to verify

Step one: past the tweet url into th save twitter input box and press th download button.Step two: press th download mp4 or download mp3 button to download th file to your device.(savetwitter.net works wel on al browsers: chrome, firefox, safari, opera, edge.)Sometimes, you might want to back up your twitter data for peace of mind or save memorable tweets and videos a way to honor a friend's memory.To download your twitter archive: open the x app or website.click "more" > "settings and privacy" in th left panel.go to "your account" > "download an archive of your data." enter th verification code when prompted.However, if you need to save media like videos and images separately, you'll need a reliable twitter media downloader.Here are some tools for downloading media from various social platforms: These apps allow users to quickly gather links from their clipboard, files, or supported websites with ease, thanks to built-in browsers that enable them to log in without leaving the app. WFDownloader supports Windows, macOS, and Linux operating systems. The software's key features include batch downloading capabilities, automatic file naming, customizable link extractors, pause/resume/download refresh options, and more.However, it lacks video or audio quality settings, which may cause errors like "No content in table" or a non-functional search button.To download media from Twitter/X with WFDownloader:1. Install the software on your computer.2. Copy the desired link from the address bar.3. Open WFDownloader and click "Add" or drag the link into the app, then customize settings as needed.4. Set download preferences to ensure only desired content is retrieved.Users may encounter login issues; in such cases, importing cookies from their browser can resolve the problem by accessing the cookie-import feature within the software.After configuring settings, initiate batch downloads and wait for completion. Once finished, users can access saved files via right-clicking on a file or batch.Alternatively, the online Twitter Media Downloader offers a simple solution for saving images, videos, and GIFs without requiring login credentials.The tool allows users to choose video quality after pasting the link into the box, but it has limitations regarding bulk downloads.Gallery-DL: A Command-Line Tool for Downloading Images and Videos from Social Media PlatformsGallery-dl is a powerful command-line tool that allows users to download images and videos from various social media platforms, including Twitter, Discord, EroMe, and hundreds of others. The tool also comes with configuration options to customize filenames, titles, and more.To get started, install the gallery-dl file on your computer, then create a config file by running the command `gallery-dl --config-create`. Next, add the Twitter section and name the file, specifying the extractor parameters for image filename formatting. Provide valid login credentials using the `-u` and `-p` options.For advanced customization, users can modify the configuration file to rename files, set download limits, or add authentication tokens. The default location of the config file is `~/config/gallery-dl/config.json` on Linux/macOS or `%APPDATA%\gallery-dl\config.json` on Windows.Alternatively, users can use user-friendly tools like Twitter/X Media Batch Downloader or Chrome extensions like Media Harvest or Video DownloadHelper to download images and videos from Twitter.Looking forward to seeing everyone at the meeting tomorrow and discussing our strategies.To download Twitter videos, follow these steps:1. Open the Twitter app and navigate to the video you want to save.2. Tap the "Share" button at the bottom right corner of the Tweet.3. Select "Share via" and scroll down to find the Download Twitter Videos icon.4. Tap it to begin the download process.Alternatively, you can use third-party video downloader apps on your iPhone or Android device:1. Install a reputable app, such as TW Save or Video Saver PRO, from the App Store.2. Copy the URL of the video you want to save by tapping "Copy Link" in the Twitter app.3. Paste the link into the downloader app and tap "Save".4. The app will prompt for permission to access your photos; grant it to complete the download.Note: Some apps may require payment or have issues, so choose a reputable option carefully.To use Twitter Video Downloader (TVDL) on your iOS device, follow these steps:1. Open Settings and toggle Allow Untrusted Shortcuts.2. Visit the TVDL page in a browser on your iPhone.3. Tap Get Shortcut and select + Add Shortcut.4. Launch the X app, navigate to the Tweet with the video, and tap Share via...5. Select TVDL v3.1 and allow permission to run.6. Choose your desired video quality and confirm.7. Find the video in your photo gallery.Alternatively, for PC or Mac users:1. Open the video on a web browser.2. Copy the URL of the Tweet that contains the video.3. Navigate to a video downloader website.4. Paste the URL into the text field and click Download.5. Select the desired video file from the generated options.Twitter Video Downloader allows users to download videos directly from Twitter. Users can choose from various resolutions such as 1920x1080, 1280x720, and others. The video will be saved as an MP4 file. If using SSSTwitter or TwitterVid, videos are downloaded to the computer upon clicking the Download button. However, if using Twitter Video Downloader, a URL is generated for viewing in the browser. To save it on the computer, right-click the video and select Save Video As.To download Twitter videos, start by copying the link from the tweet that contains the video. Next, open Safari (use Chrome if it's not available) and paste the link into the browser. From there, click on the three dots in the top right corner and select 'Save to Files.' You can then name your saved file and confirm the download.If you're using an Android device, you'll need a third-party app like TwiTake. Simply open the app, share the tweet link, copy it, and the app will automatically give you the option to download the video.For PC or Mac users, turn to Twitter Video Downloader. Copy the tweet link, paste it into the downloader site, select your preferred video resolution, and click 'download.' The downloaded video should appear in a new tab; right-click on it to save it to your computer's downloads folder.
