Advanced SystemCare Ultimate 17 is a comprehensive PC security and performance tool that provides a one-stop solution to protect against viruses, ransomware, and malware, while also cleaning, optimizing, and speeding up your computer. It features an upgraded IObit Anti-Ransomware Engine and the latest Bitdefender antivirus engine, which work together to prevent hackers from encrypting your files and safeguard your PC against various online threats in real-time. The software's Privacy Shield modules can detect unauthorized access to sensitive data and block untrusted programs, while its Digital Fingerprint Protection prevents websites from stealing your digital fingerprint. Additionally, ASC Ultimate 17 offers a one-click approach to boost your PC's performance by cleaning up junk files, registry entries, and privacy traces, as well as accelerating Internet speed and fixing system weaknesses. New features include an expanded antivirus database for better threat removal, enhanced Startup Optimizer for faster Windows program booting, and Software Updater for keeping popular software up-to-date. The tool also includes a Performance Monitor with advanced temperature acquisition technology and Anti-Tracking for automated privacy cleansing. Available in 37 languages, Advanced SystemCare Ultimate 17 can be downloaded from various links, and users can activate the software using a free license code that provides a subscription until October 19, 2025. To get the most out of your PC, regular maintenance is essential. Software like IObit Advanced SystemCare 17 PRO can help optimize performance and security.
