Arts & Science Focus: Our curriculum integrates an arts and science focus to help students understand and appreciate the significance of these disciplines in everyday life. Enhanced Learning Experience: We are committed to delivering an enriched learning experience to each of our students, every day of the school year. Differentiated Instruction: Offering students multiple options for taking in information, making sense of ideas, and demonstrating mastery. Character Development: We foster a learning community that models and encourages strong character development, respect for diversity, and a sense of responsibility to the community and society. DaVinci Academy of Arts and Science will cultivate a passion for learning through an enriched and individualized approach to education. The DaVinci community will work together to ensure positive character development and build a strong foundation for continuous learning. Vision DaVinci Academy of Arts and Science students will be lifelong learners who make meaningful contributions to society. DaVinci Academy of Arts and Science offers everything you're looking for in the right school for your child. Commitment to Academic Excellence Arts & Science Focus Enhanced Learning Experiences Differentiated Instruction Character Development Small School Community Type of School: K-8 Charter School Location: Ham Lake, MN Application Process: Lottery basis. Enrollment: Serving students in Andover, Anoka, Blaine, Coon Rapids, East Bethel, Ham Lake and Lino Lakes Opened: September of 2008 Authorizer: Friends of Education Academic Schedule: Year-round Curriculum: Arts & Science Focused Core Knowledge Curriculum Teacher to Student Ratio: 14:1 (2015) Faculty Profile: 99.2% hold Bachelors or higher degree 97% Fully Licensed 84.6% have 3-10 years of experience Reward School 6 years in a row (2011-2016) 2016 National Blue Ribbon School Recipient 2015 National Blue Ribbon School Nominee Achieved 20% higher results than state averages on standardized tests (2015) Over 80% students meet or exceed state accountability test standards Over 90% Multiple Measurements Rating (MMR) Over 80% Student Proficiency in 2015, and well above state averages See highlights from our School Report Card Our History DaVinci Academy began like many other charter schools in Minnesota – by a parent who was looking for a different way for her students to learn. Kathy Reinartz, mother of two, had done extensive research on differentiated education and knew that many children were not getting the individualized approach to learning. Prior to founding DaVinci Academy, Ms. Reinartz was involved in another charter school in Columbia Heights. It was there she learned of the Core Knowledge sequence and curriculum. Core Knowledge provides a clear and sequenced curriculum, building on knowledge year after year. Because the northern suburbs were home to many technology firms, it seemed logical to give a science and technology priority to the new school. But as Leonardo DaVinci himself knew, the science cannot exist without the arts. As such, DaVinci Academy also gives priority to arts instruction, which fosters creative thought processes and helps students to become more well-rounded individuals. In July 2007, the charter proposal for DaVinci Academy was submitted to the State Department of Education. Of the 21 other charter proposals submitted at that time, only 11 were approved. DaVinci Academy opened in September 2008, with 160 students enrolled in kindergarten through sixth grade. By the end of the first year, DaVinci Academy had a student body of nearly 190 students. Seventh grade was added in 2009 and eighth grade in 2010, bringing total enrollment in the 2010-11 school year to 375 students. That enrollment expanded to 410 students in the 2011-12 school year, with two sections of each kindergarten through sixth grades, and one section of grades seven and eight. The school applied for a replication grant in 2015, based on their status as a high-quality charter school. Because suitable land or a building site that would allow them to financially support two separate K-5 schools could not be found, permission was asked to expand the current school on one campus. DaVinci received 2 years of Federal CSP Expansion funding, and started the expansion planning in 2016. The 2017-18 school year was a huge expansion year for DaVinci Academy of Arts and Science. The school moved to their new 20-acre Ham Lake campus to start the school year with 720 students in grades K-8, an increase of approximately 300 students. They also doubled their staff, added DaVinci Den after-school care, and the Renaissance Program to serve gifted/talented students. The 104,000 square foot building includes a 3-story classroom, a full-gym, an auditorium, and a cafeteria to better serve our expanding population of students. The school enrolls 914 students in the 20-21 school year. DaVinci School Pillars Arts & Science Focus DaVinci Academy will incorporate an arts and science focus across the curriculum to help students understand and appreciate the significance of these two disciplines in everyday life. Arts Research studies point to strong relationships between learning in the arts and fundamental cognitive skills and capabilities used to master other core subjects, including reading, writing and mathematics. Students at DaVinci Academy will follow the Core Knowledge curriculum, which has an increased focus on the arts. Science Scientific literacy is increasingly important in the workplace. Jobs at all levels require people to think critically, solve problems and use technology effectively. Furthermore, we need a scientific-literate public to compete successfully in the global marketplace. Enhanced Learning Experience DaVinci Academy is committed to delivering an enhanced learning experience to each of its students, every day of the school year. Several key educational tools used at our school help ensure we meet this challenge. Core Knowledge Sequence DaVinci Academy utilizes the Core Knowledge Sequence throughout its curriculum. Inherent in Core Knowledge is the understanding that knowledge builds upon knowledge. Students receive a solid foundation in all subjects, and then enhance that knowledge by building on what they already know. The Core Knowledge curriculum provides a clear outline of the specific, important knowledge in all subjects that students need to learn, grade by grade. Through this discipline, students become familiar with a broad range of knowledge, enabling them, regardless of background, to be comfortable in our national literate culture. Data-Driven Instruction Data-driven instruction, in which DaVinci Academy utilizes teacher-created, standards-based interim assessments for all students, is another key element of our differentiated instruction model. Teachers analyze assessment results for each student to identify standards the student has mastered as well as those requiring additional instruction. Teachers then work with their grade level and/or curriculum teams to effectively re-teach and reassess students for subject mastery. This process is an effective, proven pathway to academic achievement and leads to dramatic gains in student performance. Intersections and Innovative Projects DaVinci Academy incorporates intersections twice during the year which provide students with an enhanced focus on arts and science in everyday life. Topics vary annually, but have included physics, engineering, sculpture, astronomy, theater, video gaming history and environmental studies, to name a few. Through these experiences, students gain a better appreciation of how the knowledge they master in the classroom translates to things they will encounter throughout their lives. Teachers also use hands-on approaches to allow students to interact with the subject materials and make it more meaningful for themselves, thereby increasing retention. This approach has included a bartering fair for the first grade students to explain bartering in ancient Egypt; a student puppet show of The Three Bears completed a fairy tale unit; the use of real deer hearts allowed students to explore the circulatory system; students used Skype to communicate with a classroom in Mexico during Spanish class. These are the types of innovative approaches DaVinci Academy teachers use to enrich the learning experience we offer every student at our school. Differentiated Instruction Not all students are alike. Based on this knowledge, differentiated instruction applies an approach to teaching and learning that provides students with multiple options for taking in information and making sense of ideas. The differentiated instruction model requires teachers to be flexible in their approach to teaching and in their presentation of information to the learners. Classroom teaching is a blend of whole-class, group and individual instruction. At DaVinci Academy, differentiated instruction is utilized in every subject. Character Development DaVinci Academy has established a learning community of students, teachers and parents that model and encourage strong character development. This includes a respect for diversity and a sense of responsibility to the community and all of society. We meet the needs of our students through our curriculum, our unique learning approach and positive student reinforcement which emphasizes the importance of good behavior, builds self-esteem and inspires confidence. This, in turn, assists parents and the community in raising children to be confident, successful adults. They will possess strong problem solving skills, leadership capabilities and an ability to reach their full potential. At DaVinci Academy, we are committed to helping our students develop a set of skills and attitudes that will guide and prepare them through their educational journey towards life long learning. We also strive to promote in our students an appreciation for diversity, a commitment to excellence and a sense of self-reliance and overall responsibility. For more information on our differentiated instruction model, visit our website at www.dvinciacademy.org. Our program provides Character Development through team activities, homework/academic assistance, Open groups and game play Hands on activities such as arts and crafts Choice time, outside time, computer time Other opportunities and activities not otherwise stated Snack Time Den Family Handbook: 2025-26 DaVinci Den Handbook Application for Educational Benefits The application for Educational Benefits is for more than lunches. By completing the application, students may receive reduced fees for activities and other programs. For families who would like to apply for Educational Benefits, the form is now available online through Infinite Campus. Families will need to complete an application for each school year, as they do not carry over from year to year. Paper copies are also available in the school office. Below are answers to frequently asked questions as well as other general information about our school. If you don't find what you're looking for here, please call us at (763) 754-6577 or utilize our online contact form to send us a message and we'll answer your questions! General School Information 1. What is a charter school? Minnesota charter schools are independent public schools started, governed and operated jointly by licensed teachers, parents, community members and an elected board of directors. They are part of the state public school system, but operate independently, as a separate school district. All charter schools in Minnesota are tuition-free and are open to and welcome all students, no matter ability or need. Minnesota was the birthplace of the charter movement. In 1991, the Minnesota Legislature passed the first charter school law in the nation. It was the beginning of a unique public school option that has grown steadily over the past two decades. As of August 2015, there are 165 charter schools in operation in the state. While over 60% of charters are located in the greater Twin Cities metropolitan area, there are charters in communities across the state. Charter schools are non-profit organizations funded by state general education revenues. However, unlike traditional school districts, charter schools cannot initiate tax levies to generate additional funding. Charter schools are open to all students, and do not charge tuition. Every charter school in Minnesota must be approved by the Minnesota Department of Education (MDE) and tracks and lists data and results for all schools in Minnesota. View DaVinci Academy's School Report Card to see information about our school demographics, test results, academic progress and performance and more. In 2016, DaVinci Academy was named a Reward School for the 6th year in a row. DaVinci Academy is one of only 3 Minnesota charter schools that have received the Reward School designation for all six years since the Multiple Measurement rating (MMR) system was introduced in 2011-12. Also in 2016, DaVinci Academy was one of the eight schools in Minnesota to be nominated by the Commissioner of Education to be a National Blue Ribbon School. In 2015, out of the 335 Blue Ribbon Schools nationwide, only 15 were charter schools. 4. What is an "Intersection"? DaVinci Academy's Intersection Program offers students additional opportunities to grow and learn. During intersections, regular classes are suspended and students are given the opportunity to develop a deeper understanding of a particular subject area of their choosing. Intersection is voluntary and curriculum costs vary depending on the topics being offered. 5. What is differentiation? Differentiated instruction is a teaching discipline based on the premise that instructional approaches should vary and be adapted for individual students in the classroom. Differentiated instruction provides students with multiple options for taking in information, making sense of the ideas being presented, and showing mastery. At DaVinci Academy, differentiated instruction is used in every subject. Classroom teaching is a blend of whole-class, group and individual instruction. 6. What is Core Knowledge Sequence? The Core Knowledge Sequence movement is an educational reform based on the premise that a grade-by-grade core of common learning is necessary to ensure a sound and fair education. Simply put, knowledge builds on knowledge. The more you know, the more you are able to learn. The movement was started by Dr. E. D. Hirsch, Jr., author of Cultural Literacy: What Every American Needs to Know and The Schools We Need, and is based on a large body of research in cognitive psychology, as well as a careful examination of several of the world's fairest and most effective school systems. Due to the completeness and rigor of the curriculum, students are able to achieve the most important goals for education – greater reading comprehension, the ability to think critically and solve problems, and higher test scores. 7. Does DaVinci Academy provide Special Education Services? In serving the needs of all students, we provide special education services as required by state and federal laws. Parents may request an assessment for their child to determine eligibility. That assessment will be administered by DaVinci Academy Special Education professionals. Our teachers may also recommend assessment. A Child Study Team reviews the needs of each identified student before testing begins. See Policy 608 for more information on special educational services. 8. What extra-curricular activities does DaVinci Academy offer? Activities vary from season to season; some activities are through the school and others are contracted out through private organizations that the school has screened. We are steadily expanding extra-curricular opportunities for our students, both in athletics and in arts and science. The PTO's Mission DaVinci Academy of Arts and Science's Parent Teacher Organization's mission is to enrich the learning opportunities and environment at the Academy. We will encourage involvement of all parents, teachers and staff. We will generate, gather and distribute resources to supplement school programs and enhance the educational experiences of all its students. We are going to fundraise for the school to help provide outstanding educational services and technology for our teachers and students. We will strive to maintain communication and cooperation between parents, teachers, and staff to help ensure that students achieve their fullest potential and receive the best education possible. We will strive to keep open the communication, cooperation and involvement of the community. "Like" the PTO on Facebook to keep in touch with everything the PTO is doing! From upcoming meetings to the next big event, as well as opportunities to get involved, this is a great way to stay connected! Visit the PTO Home Page DaVinci Academy of Science and the Arts is dedicated to developing competent, inventive, and ethical, thinkers who apply their knowledge, skills, leadership and problem-solving abilities to become productive members of a dynamic society. We accomplish this mission by: • Offering innovative, onsite, distance, online programs, and internships opportunities that promote enthusiasm, exploration and academic excellence. • Emphasizing a rigorous science and arts foundation. The main campus, including the administrative headquarters, is located in Ogden, Utah, United States. DaVinci Academy started operation on April 15, 2004. It is named after Leonardo da Vinci. Originally located in the Old Post Article Building, its main campus is now located in the American Can Company of Utah Building Complex in downtown Ogden. During its first year of operation, the student body consisted of the 9th and 10th grades. It has since expanded to include three other campuses that include an on-campus K-6 school and distance elementary school programs. In the spring of 2007, the school had its first graduating class. In late 2008, the school board decided to purchase the building north of the school. In the beginning of the 2009–10 academic year, the building was opened for 7th–9th graders. The school board then expanded into two more buildings at different locations in the downtown Ogden area. These buildings serve as an on-site elementary school and a headquarters for the online program. The elementary program has also expanded to include campus in Kayville, Utah. The chart of the school focuses on Performing Arts and Science.[3] There are seven sports played by the High School students at the school. Basketball, Bowling, Cross Country Running, Soccer, and Volleyball are the sports in which students participate. DaVinci Academy competes in the Utah School Sports Association with other charter and private schools in the Wasatch Front region of Utah.[4] DaVinci Academy DaVinci's Notebook ^ a b "DaVinci Academy".
