This is a Pro User Generator Carbon Brush Assembly, which is a replacement part that will function identically if the existing one looks like it. It features two carbon sticks and two spade connections with typical positive and negative terminals. We produce our own branded replacement parts for specific generator models. These components are designed as direct replacements, not OEM products. Our Generator Parts Center offers a 90-day warranty for any part purchased, with returns processed according to our return policy. If you need to replace your Pro User generator carbon brush assembly, this universal part is the most common solution. It has two carbon sticks and two spade connections, making it easy to install. This brush typically resolves power output issues in generators but may not be the only problem. Testing during repairs is recommended, although visual inspections can often identify the issue. The brush features 2 holes that are 1/4 inches apart with a distance of 5/8 inch from the backside. The carbon sticks are spaced at 5/8-inch centers and have the same length as the body. Spacers might be needed for proper fit, but they're usually not required. This replacement process is straightforward. If you need assistance repairing your generator, find the carbon brush in the head unit, located near the center shaft. Remove the cover to access it, and ensure that the brushes are making contact with the wires. If not, they may need replacing. Markings on the terminals can help prevent mistakes. Your order will ship from a US warehouse, typically within one business day. Tracking information is available in your order details online. Shipping costs vary by location but start at \$4 for most packages. We offer combined shipping discounts for multiple items to provide the best prices possible. Additional details about this product are provided above, including measurements and specifications. We offer free shipping with orders from the third, fourth, or fifth ship with your purchase. Our team is happy to assist you in finding the right parts and answering repair questions. Please use the form below and provide as much information as possible so we can give you accurate assistance. We need to know the brand and model of your equipment to answer your questions accurately. If you can't find this information, you can still use the form, but we may not be able to provide personalized help. Our parts, including voltage regulators, are universal parts manufactured by our own brand. They are designed as direct replacement parts for specific brands and models, such as generators and small engine-powered equipment. We offer a 90-day replacement warranty on all parts purchased from us. If you need to return or exchange a part, it must be done within the terms of our return policy. Our 850w power generator is available with free shipping, but please note that this offer only applies to the buy now price and does not include any offers made through our website.
