Superstore season 2 episode guide

Superstore's six-season run came to a close in March 2021, leaving behind a unique blend of humor and heart. Creator Justin Spitzer's brainchild, which spent its first three seasons under his showrunning guidance, delved into the lives of Cloud 9 employees - from managers to floor workers - who kept the fictional store running. With America Ferrera leading an impressive cast, Superstore carved out a distinct niche on NBC's lineup with its offbeat humor and poignant social commentary. Beneath its goofy surface, the show tackled real-world issues faced by retail workers, often using subtle humor to highlight the struggles of working at Cloud 9. The series' portrayal of corporate neglect towards employees was perhaps its most striking aspect, especially when compared to the company's cheerful marketing slogans. Interestingly, Cloud 9 stores have made appearances in other NBC shows, including Good Girls and I Feel Bad, solidifying Superstore's place within the network's universe. Before production began, the cast and crew filmed the pilot at a real Kmart store in Burbank, California, which presented both comedic and logistical challenges for those involved. Despite these quirks, the show remained true to its offbeat spirit, often blurring the lines between reality and fiction. Some of its stars, including Nico Santos and Nichole Sakura, attempted to gain authenticity by trying to secure jobs at retail stores - only to find themselves facing unexpected obstacles in the process. Santos and Sakura's Target Application Rejection Reveals Cloud 9 Quirk When Santos and Sakura applied at Target, they were met with rejection. Despite having experience in retail, particularly from high-end clothing boutiques, the duo was not considered a good fit for the job. The story behind their application is as intriguing as it is amusing. During a brief period before filming began, Nichole, who portrays Cheyenne, had an idea to apply at Target. Santos, being nearby, was inspired by her suggestion and applied himself. However, despite his efforts, he received an email stating that he wasn't a suitable candidate for the position. The rejection didn't matter in the grand scheme, as both Santos and Sakura were well-suited for their roles on Cloud 9. The show's employees are known for wearing crisp blue vests over their street clothes with brightly colored name tags. While most character names appear on these tags, Amy Sosa, played by America Ferrera, defies this tradition. Amy's name tag changes frequently, often to obscure her real identity from customers. These tags range from normal names like "Ramona" and "Margaret" to more unique options such as "Selena" or "Rowena." There's even a notable exception – when Amy dresses up as the late pop star for Halloween, her name tag reads "Selena." A bizarre running joke on the show revolves around Amy's changing name tags. Her character is a private person who prefers not to be addressed by her real name, especially since she doesn't know most of her customers. Meanwhile, an unsettling mystery unfolds during Superstore's third season. A lone severed foot appears after a tornado damages the store, leading everyone to believe it belongs to an employee who may have died in the disaster. However, as the series progresses, employees mention finding severed feet on the shelves before and after the tornado. Ultimately, the source of the severed feet is revealed: Elias, a largely silent Cloud 9 worker played by Danny Gura, has been quietly placing one on a shelf alongside merchandise. The cast adored this revelation, with Ben Feldman calling it a "jump-up-and-clap moment." The showrunner, Jonathan Green, also shared that Elias' fate remains unknown, leaving the audience wondering if he's still at large or if he's been arrested. By paying close attention to these small details, viewers can uncover hidden jokes and quirks within the show. A recent example is a bride-to-be who worries about her dress clashing with court-mandated tracking devices during a scene. Superstore's Interstitial Gags Shine Amid COVID-19 Pandemic Portrayal Jon Barinholtz shines as Marcus on the show, often attempting to initiate group chants that don't gain traction. His portrayal is perfectly captured by his brother Ike's style and comedic timing. In fact, Ike has had notable roles in Blockers and Neighbors, and on TV shows like Eastbound & Down and The Mindy Project. Jon brings similar mannerisms to the table but holds his own without being overshadowed. Superstore's sixth season was cut short in 2021, but showrunners Jonathan Green and Gabe Miller initially planned a seventh season where they'd split the Cloud 9 store into an online fulfillment center and in-person shop. However, they adapted their plans for the series finale, featuring Dina in charge of the fulfillment center and Glenn leading the storefront. The story concludes with employees referencing raccoons overrunning the store, but showrunner Gabe Miller revealed that this was inspired by a real-life problem on the soundstage, where actual raccoons occasionally appeared during filming. Why we saw some items on floor. Raccoons have taken residency during the production hiatus. As if on cue, a raccoon scrambled across the aisle." Some of the very best things about Superstore are the relationships between characters, which blossom throughout the series and receive closure in the finale. In a flash-forward narrated by Garrett, Jonah and Amy finally start their life together, Glenn starts his own business (and hires Mateo and Cheyenne), and eventually, the entire gang gets back together for a sweet backyard barbeque. As it turns out, this get-together happened in real life, with COVID-19 precautions in place. According to Variety, the cast had a socially distanced wrap and watch party in Ferrera's backyard after filming concluded. The actor expressed how happy he was surrounded by such an awesome group of people, and his co-star agreed that Superstore is about finding your chosen family. The relationships on Superstore are something special. Knowing that they transcended the on-screen story is pretty cool. Hopefully, this bond will lead to many reunions throughout the years to come. In late March 2021, NBC's endearing series Superstore came to a close after six seasons. Created by Justin Spitzer, Superstore explores what it's like to work at a big-box store from various perspectives and balances social commentary with offbeat humor. A notable aspect of Superstore is the fictional Cloud 9 store itself, set outside St. Louis, Missouri. The show often exaggerates its corporate side, portraying the job as having similar pitfalls to other retail jobs. However, it's clear that this setup works for the audience, as Cloud 9 has appeared in other NBC properties like Good Girls twice in 2018. Given article text here Cloud 9 store appeared in a 2018 episode of I Feel Bad. Before Superstore started filming, cast and crew used real stores to shoot the pilot. The Kmart store in Burbank, California was one of these stores. During filming, the store remained open and employees worked alongside actors. Despite changes made to the store's signage, some branding from Kmart is still visible. Real customers didn't understand what was happening during filming and were asked where items were located by cast members who played their characters. Many actors try to stay in character even when off set. However, Nico Santos and Nichole Sakura had trouble finding jobs before starting Superstore. They applied at Target but weren't hired. Amy Sosa, a Cloud 9 employee, has a unique running joke. She never uses her real name on her name tag, choosing instead to go by names like "Ramona," "Margaret," and even "Poot" for special occasions. Definitely pay attention to Amy's name tags, as during Superstore's third season, the Cloud 9 crew discovers a terrifying mystery: severed feet keep appearing on store shelves. Initially, everyone thinks they belong to an employee who died in a tornado, but it turns out that's not the case. As the series progresses, employees continue finding these gruesome discoveries, culminating in a massive stash of severed feet being found in the final season. Thankfully, the mystery is solved when it's revealed that Cloud 9 worker Elias has been quietly collecting and hiding them. The cast loved this twist, with Ben Feldman stating it was a "jump-up-and-clap moment" for the team. Superstore may seem like an ordinary comedy, but it requires attention to detail, especially during interstitial cuts between scenes. These hidden gags range from absurd to believable, featuring a bride checking her tracking anklet, a customer taste-testing candles, and more. The show's unique blend of humor and wit makes these in-between scenes worth paying close attention to. As the world grappled with the COVID-19 pandemic, Superstore fearlessly addressed this unprecedented moment in history, showcasing the challenges faced by essential workers. Writer Owen Ellickson explained that going escapist didn't make sense for the show, as it would have ignored the real-world struggles of its characters. Throughout the sixth and final season, Cloud 9 employees dealt with social distancing, masks, hand sanitizer, and more, giving audiences a glimpse into the challenges faced by essential workers during this time. Superstore masterfully tackles real societal issues with humor and sensitivity. The show excels at bringing problems like being a working mother, union issues in corporations, and immigration into its narrative, making it relatable and impactful. One notable example is the deportation of Mateo, an undocumented immigrant, which sparked controversy and praise for the show's handling of sensitive topics. Critic Emily VanDerWerff praises Superstore's ability to balance tone, saying it walks a tightrope between interpersonal affection and corporate indifference, showcasing its ethos and best storylines. Superstore's co-creator Gabe Miller discussed the show's finale, revealing that the plan was always to end the series with a store renovation and employee restructuring. This would have led to a divided store, with some employees working in-person while others handled fulfillment. However, the COVID-19 pandemic put an end to further episodes, but Miller and his team managed to create a satisfying conclusion. The show's raccoon storyline was inspired by real-life issues on set, where actual raccoons would sometimes appear and freeze in place, watching scenes being filmed. This wasn't just a clever reference to Parks and Recreation, but rather a genuine problem that the production team faced. The relationships between characters were another highlight of Superstore, with fans getting closure as the series came to a close. In a flash-forward scene, Jonah and Amy start their life together, while Glenn starts his own business and the rest of the gang reunites for a backyard barbecue. As it turns out, this real-life reunion happened too! The cast had a socially distanced wrap party in Jane Ferrera's backyard, where they celebrated the end of filming. The cast members praised the show as being about finding family among unexpected people, and their bond is expected to lead to many future reunions.
