Compatibility: - FL25 supports SP Football Life versions 2025, 2024, and 2023. - Important notes for users: - FL25's upgraded pre-installed stadium server (version 1.60) may cause issues with older servers; new stadiums can be added to the updated server. - The default FL25 stadiums are available for reference in case of any modifications. Installation: 1. Copy the stadium's text into map teams.txt 2. Extract stadiums from the stadium server directory:\SP Football Life 2025\SiderAddons\content\stadiums Note that pre-installed stadiums and replay compatibility limitations apply. Users can assign home or random stadiums for automatic loading, as well as select specific ones through sider functions.
