At Psychic World, it's customary to invite our top psychics, fortune-tellers, and astrologers to share their predictions about the upcoming year. We asked them to gaze into the future for 2025, and what they said will leave you thinking. Reading time: 8 min As we close out the year, Psychic World is reflecting on the changes that are coming our way in 2025. This will be a transformative year, marked by shifting global dynamics and new approaches to politics, economics, and society. Some of our psychics believe this could be the start of the biggest paradigm shift in three decades. So, what can we expect? A ceasefire between Russia and Ukraine is predicted for before the summer of 2025. This aligns with astrological changes that will see a more cooperative approach to global power struggles. The international community might accept a compromise on Ukraine's annexed provinces, prioritizing stability over territorial disputes. This change reflects a move towards collective progress and away from an adversarial approach. The world is also expected to become increasingly polarized in 2025, with tensions between China and the US dominating headlines. However, this may be offset by a more balanced global order emerging. Nation-states will need to find a balance between autonomy and defending their interests in a highly interconnected world. Some key events to watch out for include: * The USD becoming stronger than ever, potentially reaching parity with the Euro. * A less radical US foreign policy under the Trump administration 2.0, leading to a more peaceful global order. * Elections in several European nations, including Germany, Spain, and Poland, which could lead to a shift away from centrist parties and towards bold, reformist leaders. Germany is expected to undergo significant changes in 2025, with Saturn's transit through Aries supporting new, innovative leadership. The European Union has been working to reclaim its position as one of the world's top manufacturing powerhouses since reunification in 1991. The rapid evolution of technology, including cryptocurrencies and AI, is driving innovation and growth in the crypto/smart contracts sphere and AI development. Bitcoin and Ethereum are expected to surge past \$100K and \$6K respectively, driven by recognition as serious reserves of value and partial adoption by the new U.S. administration. However, this increased focus on technology and innovation may lead to more scrutiny from governing bodies such as Pluto in Aquarius, which governs technology, innovation, and control. As a result, the European Union and the United States are expected to implement stringent regulations on AI to balance innovation with ethical considerations. Regarding the possibility of a new pandemic in 2025, one prediction pointed out that the lagot spreads indicated nothing good for that year, suggesting a serious pandemic that could be worse than COVID-19. The eclipse cycles of 2025, including a total lunar eclipse and partial solar eclipse, may signal transformative beginnings. The year 2025 marks the onset of a new era in society and culture, comparable to the shifts seen in 1989 after the collapse of the iron curtain. Pluto's journey through Aquarius will bring profound changes in technology, equality, and collective ideals. Key trends to watch include: A renewed interest in traditional faiths like Christianity. Pushback against radical liberalism as Western societies recalibrate their policies. The beginning of the end for the European Union as it transforms or fractures due to economic pressures and rising nationalism. The return of sovereignty as nations redefine themselves, embracing "Nation-States 2.0". Advances in space exploration, particularly with private companies like SpaceX and Blue Origin leading the charge. According to PsychicWorld's mediums and psychics, 2025 marks the beginning of a new era in space exploration and innovation, driven by advancements in reusable rockets. This shift is expected to push human civilization beyond Earth's boundaries. Societies globally are poised for significant changes, with decisions influenced by cosmic forces. The world will enter a transformative phase, showcasing humanity's resilience. The accuracy of past predictions, such as those from PsychicWorld's 2024 edition, highlights the talent of their top astrologers. However, it's essential to view these predictions as mere conjecture based on incomplete information about celestial movements and energy fluctuations. The ultimate reality lies in the daily lives of individuals affected by these shifts. Six months prior to Joe Biden's potential departure from the presidential race was foreseen by some. A warning about an assassination attempt on Donald Trump that he miraculously survived had also been given. Additionally, a Republican landslide and Trump's victory, accompanied by control of both houses, were predicted accurately. Kate Middleton's courageous battle with cancer was also correctly prophesied. Furthermore, the impending collapse of the Baltimore bridge and a Middle Eastern conflict involving cyber and air attacks on Israel were forecasted. This is just a glimpse into my proven track record of precise predictions. To delve deeper, explore my earlier videos. Key Highlights for 2025 This year symbolizes endurance and transformation as represented by the alchemical salamander in fire. According to my spirit guides, 2025 will be marked by upheaval but also hold promise for a hopeful turning point. United States: Trump's inauguration is expected to be shrouded by legal challenges and controversies, yet sweeping reforms will reshape the nation, including anti-woke laws and advancements in government efficiency. Groundbreaking technological strides are anticipated in AI and defense led by Elon Musk. Europe: Social unrest will sweep across France and Germany, with a shift towards conservative politics on the continent. A fuel crisis looms, but Britain is expected to fare better than the EU. Middle East: The year begins tumultuously with proxy wars, yet Trump's peace-building efforts could pave the way for stability. China: Economic turmoil and social unrest signal the gradual collapse of the communist regime, with significant global repercussions. Global Spiritual Awakening: A resurgence in ancient practices, Eastern philosophies, and collective consciousness is expected to bring renewed hope and spiritual growth. These are just a few highlights there's more in my detailed predictions for 2025. Mikki's 2025 predictions paint a picture of chaos in the world of entertainment and politics. According to her, we can expect "a really revealing year" with the curtain being lifted on Hollywood's secrets. This "revelation" will also be felt in other areas such as politics and religion, leading to a more "revolutionary time". Mikki's forecast also touches on several high-profile cases, including the Diddy allegations. She believes that while there may be further developments in 2025 regarding Diddy's arrest and charges, it won't be the only major scandal of the year. In fact, she predicts that Jay Z will take center stage, with evidence emerging that he'll find difficult to PR his way out of. Regarding Beyoncé, Mikki believes that her calm demeanor in the face of her husband's alleged wrongdoing is not just an act. She expects it to be revealed that they've been separated for a while, and Beyoncé's ability to "play the PR machine" will allow her to maintain her public image without being tarnished by Jay Z's scandal. Lastly, Mikki mentions Ashton Kutcher in relation to his alleged involvement with a sex trafficking ring. Mikki predicts Taylor Swift and Travis Kelce Will Break Up By Summer, Royal Family Exposure on the Horizon. Mikki shared her insights on the upcoming US election, which she believes will be a significant turning point for the country. She noted that the inauguration of Trump's successor is still uncertain due to ongoing events, and warned that this could lead to a sense of uncertainty and fear among the population. In Australia, Mikki expects a shift towards more conservative values in local politics, with potential implications for the Liberal party's return to government. However, she also sees an opportunity for people to come together across ideological lines and engage in meaningful conversations. Mikki emphasized that this period will be marked by a need for action and revolution, as people respond to the changes unfolding around them. She predicted that technology will continue to play a major role, but warned that there will be growing pains along the way, particularly with regards to AI and social media. Regarding the question of whether AI will take over the world, Mikki reassured that this is not likely in 2025. Instead, she encouraged people to approach technological advancements with a sense of wonder and humility, acknowledging that growth and progress often involve challenges and setbacks. Clairvoyant Suttiff makes accurate yearly predictions, including the 2016 US presidential election, and uses her gifts to help locate missing individuals. According to her, 2025 will be a transformative year, marked by significant changes in global politics, leadership, and economy. Spirit guides her to emphasize the importance of being vigilant and open-minded as major scandals, such as COVID-19 cover-ups and human trafficking, begin to unravel. Former high-ranking officials and those involved in deceit will face public scrutiny. Suttiff notes that 2025 shares parallels with 1970, a year marked by the Watergate scandal and President Nixon's resignation. She also highlights the significance of the number seven, associated with work, unity, and healing energy. In numerology, 2025 reduces to nine, indicating a year for completion, truth-telling, and new beginnings. Suttiff predicts a major overhaul in environmental policies, with the rise of new discoveries and solutions for diseases like lymph cancer. Additionally, significant breakthroughs are expected in skin health, aging, and eye disease treatment. New breakthroughs are on the horizon for humanity, with discoveries in light therapy, electrical current healing, and natural ingredients poised to revolutionize healthcare. In 2025, focus will shift towards cancer treatments and research. This year is expected to see significant advancements in space exploration, with multiple countries investing in space travel and discovery, thanks in part to Elon Musk's initiatives. A new era of oil discoveries is anticipated, with the industry on high alert due to potential pipeline explosions and oil spills. This could lead to increased tensions and higher oil prices. However, food costs are expected to decrease, with tax credits being introduced by the Trump Administration to support sustainable farming practices. As we move into 2025, some nations will experience a shift towards conservatism, particularly in America. Meanwhile, conflicts in regions like the Middle East, South Asia, Europe, and Russia may escalate, but ultimately lead to a peaceful resolution in 2026, with President Trump's inauguration marking a new beginning. A heightened risk of assassination attempts is also on the horizon, as well as financial crises, especially during the summer months. This year will bring significant challenges, but also opportunities for humanity to come together and make profound changes. The coming year is expected to bring significant changes and trials for leaders worldwide. In Ukraine, a leadership change is anticipated, and the ATM may break down. Similarly, a shift in media landscape is underway, where fake news won't be tolerated, and communication will improve. There's a growing demand for transparency and truth, with social media platforms emerging in 2025 to address this need. Legislation on human trafficking will also see significant changes, exposing those involved and promoting a stop to modern slavery. The music industry and governments must confront their complicity in human slavery. P Diddy may sing out against it, mirroring the fate of canaries in coal mines. Severe storms are predicted for 2025, particularly affecting major waterways like the Gulf of Mexico, Baltic Sea, and Atlantic Oceans. Hurricane season will be intense, with September and October being particularly hazardous. Countries facing financial struggles include Australia, Canada, England, India, Germany, and France, mainly due to issues with immigration and inadequate services for citizens. Terrorism is expected to continue, but it will be short-lived if any violence occurs during the summer. A unity movement will gain momentum by the end of 2025, paving the way for a more prosperous and peaceful 2026. The Real Estate Market will experience fluctuations, with October seeing some positive developments. The Detroit Lions winning the Superbowl is also predicted. A wealth of investigations and truths will be uncovered in 2025, driving economic growth through analysis and improvement. Ultimately, a unity movement will prevail by the end of 2025, setting the stage for a better 2026. In 2025, we'll be navigating significant changes as life paths begin to unfold. From March to August, expect some challenges along the way. Kelle Suttiff invites readers to embrace growth and transformation. Astrologers have long marked this year as "something big is coming." We'll explore why, how to prepare, and what to expect in 2025. Consider supporting Kelle's writing by donating or sharing with a friend. Every planet, except Chiron and Pluto, is shifting signs. These two planets provide stability, but their changes create an environment of transformation. Neptune moves from Pisces to Aries, while Uranus enters Gemini. Saturn re-enters Pisces, influencing home, family, and love. The Nodes move from Aries & Libra to Pisces & Virgo, joining the Neptune-Saturn pair-dance. Eclipses in 2025 will be particularly notable, especially the last one. Mars turns retrograde in Leo and Cancer, while Venus does so in Aries. Mercury's retrogrades amplify existing energies. The Moon reaches a point with increased Super- and Micro Moons. To learn more about each astrological event, visit Kelle's article collection. As I continue publishing articles leading up to significant events, I have to break it to you: 2025 is going to be a wild ride. Unlike previous years since 2020, astrologically speaking, 2025 holds even more significance and potential for change. While the year may start with some cleaning-up-from-the-past vibes, the overall energy is one of new beginnings and birth think of it like a cosmic reboot. Globally and personally, we're on the cusp of a brand-new era, filled with hope, possibility, and solutions to long-standing problems. As our society adapts to these changes, we'll be reinventing what it means to be human in modern times. But make no mistake: change requires leaving the past behind; there's no going back. By Fall 2025, planets like Neptune, Uranus, and Saturn will return to their original signs, tying up loose ends before making a full return in early 2026. Astrologers have been talking about these years for decades, calling them "huge" and we're living through them now. Our birth times are more than just random happenings; they're maps guiding us through our human experiences on this planet. We weren't born too early or too late; we were meant to navigate these exact times. If you found this article helpful, consider supporting my work by sending a donation. I'll help me keep writing and keeping my site ad-free. Please share this with your loved ones if they've benefited from my insights. I've already written articles for most of these events and will continue publishing as we approach the next milestones. To summarize: what real-world changes can we expect? The answer depends on your personal astrological blueprint, so take a reading to get personalized insight. However, everyone will be affected by some aspects of this year and that's where hope and new beginnings come in. So, I highly recommend that you read about both the positive and negative aspects so you can prepare in a thoughtful way. The list below might be a bit concerning, but I encourage you to read and get prepared. By the way, if you want to check out some good things about this year, I have a list with 9 positive points that you can find here. This year will be all about big storms, especially in unexpected places. With Jupiter leaving Gemini and Uranus flirting with Gemini, we can expect significant events. Unfortunately, there might be accidents involving fire and spreading fires. This is due to Neptune's influence in Aries, which is amplified by Pluto and Uranus. Be cautious of technological failures causing fire or natural catastrophes. Don't rush into using new inventions that have an elevated fire risk. Also, make sure your home is secure against fires when Jupiter enters Cancer in June. When storms meet fire, you can expect a huge risk this year. Please take care and be prepared for the worst. The next theme will be rain, floods, and water damage. Saturn and Neptune entering a fire sign explains the "FIRE" caution above. They'll return to a water sign in Fall, and the North Node will move into that same sign, placing eclipses on the same axis. This means we can expect a huge focus on WATER everywhere this year. We've already seen this since September 2024, but it'll be amplified from January through May and September until the end of the year. If you've found this article helpful so far, please consider supporting my work by sending a donation. You can also share this with a friend to help them prepare for 2025. Saturn, Neptune, and the North Node in Pisces bring a heightened potential for chemical leakage and toxin release. On a global level, there will be an increase in armed conflicts on individual and political levels. Let's hope things don't escalate too far. Additionally, we'll see the consequences of drug abuse or mis-medication as Saturn and Neptune wrap up Pisces. This has already been happening, but it'll become more apparent this year. Lastly, 2025 will briefly experience a rise in authoritarianism on a global level. However, with Uranus in Gemini and Pluto firmly situated in Aquarius, this won't last or succeed. Given text here: paraphrase this text-time that authoritarianism contains the word author: we as humans are the authors of our stories, we get to co-create and thereby protect ourselves by striving for the realities we wish to see in the world. That includes you and me, too, not only those put into power. Now, to some really good news: 1) We won't be having World War III yet. Some people will look at all of this and get (understandably) super-scared. However, I'm very sure that we won't have that event just yet at the earliest, that'll come in 2028 (again, at the earliest and I hope and pray that well never have it.) 2) We'll win the fight for free speech. Uranus in Gemini will, among other things, show a struggle for the right of continued/first-time-ever free speech and free press. Fortunately, we, the people, will win this fight over the next 8 years. And that winning will start in 2025. 3) More powerful and efficient co-creation and cooperation. 2025 will see the real beginning of something that has been teased a little since Pluto's first stint in Aquarius in 2023: the power of humanity coming together. Groups cooperating, individuals lifting each other up, being of real service to one another all of this will come through as we navigate all the harder things I've just talked about. 4) A rise of humanitarianism in nowadays world, many use this word to describe themselves but few who say it live it: to be a humanitarian is something that 2025 redefines in a most beautiful and life-giving, compassion-fueled way. True humanitarianism is the real one, not the one for fame, fortune, and social media views will take the world like wildfire. If this article helped you so far, please consider sending a donation of your choice to help me continue writing these articles for free (and to keep my site ad-free!). Also, please send this to a friend; if it helps you prepare for 2025, chances are it'll help your loved ones, too! 5) Humanitarian inventions. Because of the rise of humanitarianism, we'll see the structures supposed to aid people in improving and even see new inventions of structures to better aid people in various situations, thereby making the world a better place. This is a long-term development, but we'll see it starting this year. 6) Technology that changes the world. 2025 onward, we'll see a rise in inventions that change the world and in lots of cases, for the better. Water gives life. The breath of fire, in many myths, was what created the human spirit. Similarly, this year's transits indicate a giant awakening and new, life-giving process to us humans on a mythic and spiritual level. Many people are finding faith in one form or another. This will continue and ramp up in 2025. This meaning that we find in all of life will fortify us but also make us create a life of beauty and joy where we land. I'll guide us right into a purpose-driven, intuitively nourished life we've always been meant for. 8) The end of what keeps us stuck. On a personal and potentially more social level, we'll be seeing the end of all the things that keep us stuck. This year contains a huge goodbye and clearing of all the things that we can't take with us; including the painful and toxic situations we were trying to move away from but remained stuck in. So, if you need movement in your life; if you need a situation to change, or if you need to lose a given article text here. This year marks a major new beginning that brings an end to the old, allowing us to start anew. On both a personal and societal level, this shift is happening, and it's crucial to understand how it will impact our lives. A guide is available to help you navigate these changes, focusing on each Sun and Rising sign. This is just the starting point, and I encourage you to book a reading or subscribe to my newsletter for more in-depth information. The guide is free for subscribers, but it's also available here if you'd like to take a look. One key aspect of this year is the completion of Neptune and Saturn in your house of endings, bringing about an energy that marks a new beginning. Additionally, Pluto's influence in your tenth house is turning your public life, work, and purpose on its head. This year also highlights themes around reputation, career, and life's mission, where endings may be necessary to pave the way for new beginnings. With Pluto's transformative power, you can expect significant changes in areas like truth, trust, and intimacy. Furthermore, this year is about major endings that will birth a whole new life. The process of transformation, much like childbirth, brings forth a new being, and this is exactly what's happening. The main focus of the year is on your work, career, public role, and daily chores, particularly in how you serve humanity. With Uranus ending its journey, it's time to explore new ways to contribute to society. This year is about relationships and purpose. Focus on what makes life meaningful and commit to your goals. Get more in-depth insights into the signs and their transformations by subscribing to my newsletter for free. You can also support my work by donating or booking a reading here. Massive changes are coming in your social and love lives due to Neptune, Saturn, and Uranus' presence. Learn more about it by subscribing to my newsletter. This year is all about finding true priorities through mindset shifts and new information. Consider the impact on your home and foundations when thinking of family and relationships. Your personal life will be highlighted this year, with growth and transformation as you settle into your own skin. Clearing what's not working in your life is a priority this year, thanks to Neptune and Saturn's collaboration. For more insights into the upcoming year, check out my article compilation 2025. Consider donating or sharing it with loved ones to help prepare for the year ahead. ###
