Vampire survivors evolution guide

In Vampire Survivors, collecting various weapons and upgrades is crucial to fighting the armies of the damned and surviving the vampires. However, to reach true power, evolving your weapons by combining them with specific items is necessary. This evolution chart outlines the game's different weapons, whether they have an evolved form, and how to evolve them. As you level up, you can select random weapons or upgrades, accumulating up to six of each. Upgrading these items alters their functionality or increases their stats, with weapons upgrading eight times and items five times. Mixing and matching effects creates powerful builds, but some weapons require a specific item to evolve into a better version. To evolve a weapon, upgrade it to level eight, pick up its paired item, and then collect a chest dropped by a boss enemy while carrying the level eight weapon and item. Note that chests usually don't drop evolved weapons until after 10 minutes of survival, and if you have multiple items ready to evolve, the next chest will randomly select which one to give you. The chart below outlines the evolution and upgrade paths for various weapons, including Whip, Magic Wand, Knife, Axe, Cross, and others, each with unique abilities such as critical damage, absorption, or passing through enemies. Some items are not yet evolvable but may receive evolved forms in future patches. Weapons are selected from the generator to force it to choose them. Base weapons can be replaced with their evolved version. Items are also selected from the generator to increase interactions between weapons and items. Arcanas are forced on the generator to change its behavior. Certain items spawn on each normal stage, and picking them up after filling the inventory adds them as extras. Only select items that you plan to pick up after filling your item inventory. Base weapons can be evolved by using a passive item as a catalyst. This changes their interactions with other items. You can choose between maximizing evolutions or combos. A Union is a combination of two weapons, while a Gift is an additional weapon or passive item obtained under certain conditions. Evolved weapons inherit most base stats and have extra effects. United weapons are similar to evolved weapons but merge into one, emptying the slot. To evolve or unite weapons or obtain Gifts, you need to fulfill specific conditions: · Have a fully leveled base weapon and its counterpart in your inventory. · Collect a Treasure Chest containing an evolution type reward from certain bosses at set times during stages. In Neo Galuga, various chests and relics can trigger weapon evolution, union, or gift rewards. Metal Alien's chest at 9:00 am evolves a weapon upon collection. Treasure Chests containing Arcana, available at 11:00 and 21:00 in every normal stage, evolve a weapon only if the player already has the maximum count of Arcana. Character Gyoruntou can evolve weapons from any item-giving chest pickup, replacing the usual random upgrade with an evolved weapon as its first reward. On evolution, the base weapon is typically removed and replaced by the evolved one, while passive items remain unaffected. The union process removes both base weapons and adds their union, freeing a weapon slot. However, when a gift is obtained, the base weapon will not be replaced. Generally, only one weapon can be evolved per chest, but higher-tier chests with sufficient rewards can evolve up to three or five weapons. In Co-op mode, weapons can evolve regardless of which player has the Passive Weapon and Active Weapon, as long as the requirements are met and the share passives option in the level select menu is enabled. Certain characters, like Mortaccio, Yatta Cavallo, and O'Sole Meeo, can morph into a new form when they have the required relic and meet specific conditions, automatically evolving their starting weapon into a new one. Evolutions, unions, and gifts involve various base weapons, passive items, and relics. For example, Torriona's Box is involved in an evolution with Sole Solution, while Emergency Meeting is the first DLC to use only DLC items for weapon evolution. The passive item consumed during evolution can be obtained again through leveling or pick-ups. With updates like Vicious Hunger (patch 0.5.2) and Silver Ring (patch 0.6.1), all passive items at a given time have an evolution, and base weapons, except bouncy ones, also gain evolutions.
