Discord is a rapidly growing platform for chat that connects almost half of the world, especially gamers who use it as software to communicate over text or voice. The popularity of Discord bots has increased interest in creating subscription-based and profitable chat communities. Many groups besides gaming, such as financial trade, stock, sneaker cook groups, books clubs, and non-profit organizations, are using Discord. These groups find the platform useful for alerting others to YouTube and podcasts communities and other topics. A Discord bot is another powerful tool that extends the server's functionality with features like prizes, polls, games, music, or more. Choosing a good bot can be challenging, as there are many options available. However, we have gathered some of the most interesting and profitable servers with their favorite bots to help you make an informed decision. If you're developing a premium subscription-based business on Discord, selecting the right bot can streamline growth and management of your server.

===== MEE6 Bot - A Comprehensive Platform for Discord Servers MEE6 offers a free plan with limited features and three paid tiers: monthly (\$11.95), lifetime (\$89.90), and yearly (\$49.99). Each plan provides a full refund within 7 days, and plans are easily transferable to another server. Autocode - A No-Code Tool for Building Custom Bots Autocode is ideal for creating custom bots in minutes without worrying about reconections, sockets, or servers. It offers a single-line connection to Discord and an IDE for connecting webhooks and APIs. Autocode handles API keys, takes care of server setup, and provides auto-scaling with automatic updates.

Dank Memer - A Bot for CryptoCurrencies and Memes Dank Memer is a fun bot that integrates a large economy system and allows members to engage in activities like gambling adventures and bank-robbing. It also features hundreds of meme-related commands and integrates the Meme Face Maker API for real-time meme creation. Mudae - A Bot for Anime Enthusiasts Mudae is an ideal bot for manga lovers, video game enthusiasts, and anime fans. It offers over 40,000 combinations of husbandos and wifus to catch, a feature for translating the bot into different languages, and over 450+ commands for utility, moderation, and customization.

===== The numerous bots available for Discord servers cater to diverse needs, each offering unique features and functionalities. ===== The best option depends on the server's purpose, with Probot being ideal for auto-moderation, analysis, and welcome messages. Its intuitive interface provides valuable insights into server activity. MEE6's successor Arcane excels in leveling systems, offering a reliable platform for role rewards and leader boards. Additionally, its custom commands and advanced logging tools are well-integrated. For music enthusiasts, Octave is the perfect choice, providing high-quality audio and allowing users to create playlists, display lyrics, or integrate with Soundcloud or YouTube. Helper.gg transforms servers into ticket systems, making it easier for support teams to manage customer inquiries and assign staff accounts with customized permissions. Xenon stands out as a server backup bot, offering reliable protection against data loss and ensuring servers are always up-to-date. ===== Xenon bot is a powerful tool for creating backups of your Discord server with ease. It allows you to synchronize, clone, copy, and archive your server's content with just one command. The bot also offers free templates so you can customize your backup experience. Sometimes, mods make significant changes to your server's layout, but having a backup will give you peace of mind. Xenon bot lets you keep all your server's content synchronized, cloned, copied, archived, and backed up easily using simple commands. These backups are also used to secure the current state of your server, including channels, roles, and other settings. You can even set an auto-backup interval so your server is always protected. With Xenon bot, you can use all its features, such as creating backups, setting backup intervals, built-in templates, transferring messages, manual backups, synchronization, and connecting to multiple channels. The bot offers four pricing tiers: a free plan with limited features, and three premium plans starting at \$5 per month for 50 backups and synchronization of messages. On the other hand, Giveaway Bot is ideal for increasing engagement and traffic on your Discord server. It simplifies the giveaway process by allowing users to participate in giveaways by reacting to a post, and automatically drawing a winner after a set amount of time. The owner has full control over configuration. Giveaway Bot offers essential features like automated giveaways, hosting giveaways, and anytime withdrawal of subscription. The bot is free with most essential features, but you can upgrade to premium plans starting at \$1 per month for advanced features. Statbot is another powerful tool for processing raw data in multiple servers. It's a logging and analytics bot with a responsive dashboard, high uptime, and accurate data analysis. Statbot provides personalized dashboards, automatic role rewards, customizable channel counters, and limitless possibilities with hundreds of options. Statbot offers three premium plans starting at \$8.73 per month for the Top Picks plan, which includes features like customized channel counters, automatic role removals, and top-of-the-line support team. The base bot is free with essential features, but has limitations. Lastly, Zira is a highly customizable bot designed to automate server settings. It allows you to assign permissions and customize roles, making it an excellent choice for those who need flexibility in their server management. With Zira, you can customize channel counters, remove roles automatically, and even set up countdowns and clocks. Overall, these bots offer a range of features and pricing plans that cater to different needs and budgets. Whether you're looking to increase engagement, process data, or automate server settings, there's a bot on this list that suits your requirements. ===== Zira is an excellent choice for businesses with complex setup needs. Its admin panel allows for basic bot functionality, including spamming DMs. Moreover, Zira offers support for future development and enables direct messaging to users after role assignment. It also provides the authority to set a specific suggestion submission channel. Zira's features include: - Auto-color roles - Leave and join messages with customer emotes - Supports auto-assigning roles on join - Multiple channels and messages The platform offers essential features for free, but more advanced options require a premium subscription starting at \$2 per month. Other notable platforms include Voicy, which focuses on sound clips and memes, and Hydra, offering various music streaming options. Voicy is free to use and includes: - Official soundboards - Trending soundboard sections - Celebrity voice impersonation - Over 40 avatars Hydra's premium version starts at \$1.99 per month and offers features such as: - Unlimited saved playlists - 24/7 playback - Audio effects and volume control Dyno is a customizable moderation bot with features like: - Time-based bans and mutes for moderation - Anti-spam detector - Fully customizable moderation settings - Assigning roles and custom command creation Dyno's pricing tiers include Premium 1x (\$4.99/month), Premium 3x (\$11.99/month), and Premium 5x (\$14.99/month), each with its respective server limit. Adding bots to a Discord server can enhance the user experience, but it requires careful consideration of features and pricing.Looking forward to trying out some of these servers, isn't it easy to get started with them? To invite members to add bots to your server, you just have to give permission first. To add bots to your Discord server, follow these steps: Go to the top.gg and choose one that you like. Next, click on "view" to go to the bot's page, then press "invite". Now, select the server where you want to add it, authorize it, and do the captcha verification. When you open Discord, you will find the bot in your server, and there is also an invite button in the list. Most of the time, you don't have to visit the bot page. Many popular bots have a "view" button in the list. Instead of going to the bot list, you can go directly to the bot's website if you know it. TABLE COMPARISON Looking forward to seein everyone at the meetin tomorrow and discussin our strategys for yer server. As one of the co-founders of Codeless, I bring to the tabel expertise in developin WordPress and web applications, as well as a track record of effectively managin hosting and servers.
