****Recent Update:**** January 24, 2024 The ESTSOFT-developed PDF editing program, "alPDF", supports Windows 7, 8, and 10 operating systems, with language options in Korean and English. The software is free to use, with a minimum system requirement of 256MB RAM and 100MB available hard disk space. alPDF is a popular PDF viewer and editor that allows users to open and edit existing PDF files, as well as convert them to various formats such as Excel, HWP, PPT, JPG, and PNG. The program also features OCR (Optical Character Recognition) functionality, making it useful for converting scanned documents into editable text. Some of the key features of alPDF include: * Conversion of PDF files to various formats * Editing and modifying PDF files * Merging and splitting PDF pages * Reducing file size * Support for OCR plugins alPDF is part of ESTSOFT's "alTools" suite, which includes other programs such as "alZip" and "alCSI". The software is available for download on the alPDF website, where users can also find installation instructions and user manuals. ****Recommended System Specifications:**** * CPU: 1GHz or higher * RAM: 1GB or higher * Available hard disk space: 100MB or more The history of alPDF versions includes: * alPDF V2.2 (July 15, 2019): Added OCR functionality and automatic file association * alPDF V2.1 (November 7, 2018): Improved editing features and font compatibility, with bug fixes and usability enhancements. Note: The installation process involves downloading the setup file and running it to install alPDF on your computer.
