I'm not a robot

2025 s class

This vehicle features a powerful engine with a mild-hybrid system and ECO start/stop functionality. The transmission is an advanced 9G-TRONIC Automatic system that includes driver-selectable modes and sequential shift control. Additionally, it has a full-time 4MATIC all-wheel drive system for enhanced stability. The vehicle's suspension system consists of air body control suspension with electric power-assist speed-sensing steering. It also features regenerative 4-wheel disc brakes with four-wheel ABS, brake assist, hill hold control, and an electric parking brake. For comfort and convenience, the vehicle boasts a range of amenities including 20-gallon fuel tank, dual stainless steel exhaust system, multi-link front suspension with air springs, and a panoramic glass roof. The interior features premium materials such as leatherette back material on bucket seats and power heated auto-dimming side mirrors. The infotainment system includes an MBUX navigation system with a 12.8-inch OLED touchscreen display, wireless charging, Apple CarPlay and Android Auto integration, and online music streaming capabilities. The vehicle also comes equipped with a Burmester surround sound system, Bluetooth connectivity, and two LCD monitors in the front. This vehicle is equipped with a range of features, including a trip odometer and trip computer, power rear windows with second row sun blinds, mobile hotspot internet access, and a leather steering wheel with auto tilt-away function. Other notable features include a compass, proximity key for doors and push button start, valet function, and remote keyless entry with integrated key transmitter. The vehicle also boasts advanced safety features such as active distance assist, DISTRONIC, voice-activated dual zone front automatic air conditioning, and illuminated locking glove box. Inside, the interior trim is made of leatherette/piano black console insert and piano black/metal-look interior accents, while the upholstery is full cloth. The vehicle also comes equipped with features such as day-night auto-dimming rearview mirror, driver and passenger visor vanity mirrors, and a full floor console with covered storage. The S-Class sedan boasts an array of safety features, including rear center 3-point seats, height adjusters, and pretensioners. The vehicle also comes equipped with advanced driver-assistance systems, such as back-up cameras, front cameras, and cameras on both sides, ensuring enhanced visibility during navigation. This luxurious ride offers passengers unparalleled entertainment options, featuring a large 12.8-inch Organic LED touchscreen that can be personalized across up to five screens for individualized enjoyment or shared content. With 800 customizable settings available in up to seven user profiles, drivers and passengers can tailor their driving experience to suit their preferences. In terms of occupant protection, the S-Class continues to push boundaries with its innovative safety features. Air bags can now be extended to rear cabins, enhancing overall protection for all occupants. Additionally, ambient lighting options allow users to personalize the cabin's ambiance according to their mood or preference. For an immersive audio experience, the vehicle features standard Burmester 3D Surround Sound and a High-End 4D option that integrates resonators into seats for a truly multisensory experience. Other advanced features include driving alerts, door-opening warnings, and adaptive cruise control. The Plug-In Hybrid S 580e takes the S-Class to new heights with its impressive 503 total horsepower, delivering exceptional performance while also providing an eco-friendly alternative through its electric motor and regenerative capabilities. Furthermore, the vehicle's available rear-axle steering system makes parking and maneuvering in tight spaces more manageable. Finally, drivers can fine-tune their driving experience with the DYNAMIC SELECT drive modes, which offer Sport, ECO, or customizable settings to suit any driving style. The Mercedes-Benz S-Class continues to lead its segment with updates for the 2025 model year, including Conditionally Automated Driving at higher speeds in Germany. The new infotainment system responds more intelligently to users, while customization options are enhanced with new colors and materials. Drive Pilot can now operate at speeds of up to 95 km/h in regular traffic flow, allowing customers to use their time more efficiently. Safety remains a top priority with the enhanced version of Drive Pilot, featuring redundancy for critical functions such as electrical systems, steering, and braking. The system utilizes over 35 sensors, including cameras, radar, ultrasonic sensors, and LiDAR, ensuring precise real-time environmental detection. A unique positioning system combined with detailed digital mapping enables accurate lane determination. The MBUX infotainment system has been upgraded with new digital features via over-the-air updates, refining navigation, expanding the AI-powered voice assistant, and introducing additional functions. The integration of ChatGPT into the voice assistant makes it more natural and versatile, allowing drivers to access accurate answers and engage in conversations. The new Mercedes-Benz S-Class features improved navigation with Google's satellite view, allowing for better orientation in complex environments. The vehicle also offers seamless interaction with dialogue history, enabling follow-up questions and continuous communication during conversations. Furthermore, the Entertainment Package Plus is now available, providing access to popular streaming services directly in the vehicle. In the rear of the S-Class, RIDEVU transforms the journey into an exclusive cinematic experience with a rich selection of movies and series. The Manufaktur program has expanded globally, offering over 50 new paint colors and 25 additional interior options worldwide. Owners can personalize their vehicles to match their unique preferences through bespoke interior elements and handcrafted paint finishes. A new S-Class Edition is available, featuring sporty elegance and exclusive design. It includes AMG Line and Night package options, with carefully curated paint finishes and details such as dark shadow gloss door handles and illuminated "Mercedes-Benz" lettering. The interior features Nappa leather in three color variants, a head-up display, and the Burmester 3D Surround Sound System. Completing the high-end specification are 20-inch AMG light-alloy wheels and DIGITAL LIGHT with projection function. The new Mercedes-Benz campaign, starring Roger Federer, showcases what makes a Mercedes-Benz truly unique. The S-Class is highlighted as the epitome of craftsmanship and technological excellence. With its Manufaktur program, the vehicle boasts precision-made details such as handcrafted stitching and fine leather upholstery. To enhance driving experiences, Mercedes-Benz offers advanced features like Drive Pilot, which relies on activated Digital Extras like Intelligent Drive Online Service and Car-to-X Communication. These extras require a Mercedes me ID and Terms of Use agreement. Furthermore, ChatGPT integration is available through the MBUX Voice Assistant feature. The use of Digital Extras depends on equipment, countries, and applicable laws. A driver must always be ready to take control when prompted by the vehicle's automated driving function. The limited term for these extras can be extended for a fee if still offered for the corresponding vehicle. Mercedes-Benz encourages users to share and adapt their content under a Creative Commons license, providing freedom from legal restrictions as long as license terms are followed. Where permitted, or allowed by applicable exceptions or limitations, no warranties are provided. The license may not grant you all the necessary permissions for your intended use. For instance, other rights like publicity, privacy, or moral rights might restrict how you utilize the material. The Mercedes-Benz S-class has long been a preferred choice among buyers seeking refined comportment and an esteemed presence. Its six-figure starting price plays a role, but its enduring success can be attributed to its class-leading ride and comfort, upscale furnishings, and smooth powertrains that define it. The latter is available in the form of either a 442-hp turbocharged straight-six, a 496-hp twin-turbo V-8, or a plug-in hybrid combining the turbo six with an electric motor. The ride and handling benefit from a standard air-spring suspension, while heated and ventilated massaging front seats cater to the occupants. Well-equipped as standard, there's also a long list of optional materials, woods, and colors available to personalize the S-class according to your taste. A potential area for contention is the sheer number of screens and their almost overwhelming amount of controls and features. Nevertheless, while several rivals like the Audi A8, BMW 7-series, and Genesis G90 have made inroads onto the big Benz's turf, it remains the king of full-size luxury sedans. As one of our favorites in its segment, the Mercedes-Benz S-class has also earned a spot on our Editors' Choice list for 2025. The S-class sedan offers an extensive suite of features, including standard drive, advanced suspension systems, and impressive acceleration. The test models showcased the optional E-Active Body Control's "curve" function, which subtly adjusts the car's position in corners, and the all-wheel-steering system, which makes maneuverability a breeze in tight spaces. The latest Mercedes-Benz S-class sedan boasts a cutting-edge interface, featuring a massive 12.8-inch OLED touchscreen that dominates the center stack. However, it lacks a touchpad or rotary controller, instead relying on voice-command functions and smartphone-like capabilities, such as facial recognition and fingerprint scanning, courtesy of an enhanced MBUX software. The car also comes with a range of standard features, including wireless Apple CarPlay, Android Auto, and wireless charging, but its complexity can be overwhelming, requiring multiple screen touches to access certain functions. The S-class sedan is available with premium options like the Burmester 3D sound system or the more powerful Burmester 4D stereo. Safety is a top priority in the S-class, with standard driver-assistance technology, including automatic parking and collision prevention systems. Additional features, such as rear-seat airbags and active suspension, are also available to enhance safety and protection during accidents. Mercedes-Benz's warranty coverage is surprisingly limited compared to other luxury brands, offering four years or 50,000 miles of limited warranty and powertrain warranty, but no complimentary scheduled maintenance. The Mercedes-Benz S580's performance figures are impressive, with a 70-0 mph braking distance of 168 ft. Its roadholding capabilities are also noteworthy, achieving 0.87 g on the skidpad. In fuel economy tests, the vehicle recorded an observed 35 MPGe in EV/Hybrid mode and a range of 58 miles electrically and 630 miles overall. The EPA estimates combined city/highway gasoline + electricity mileage at 23/20/29 mpg. The S580 features a twin-turbocharged V8 engine, producing 496 horsepower and 516 lb-ft of torque. Its transmission is an 9-speed automatic, while the chassis boasts multilink suspension in both front and rear axles. Braking performance is also impressive, with 14.5-inch vented discs up front and 14.1-inch cross-drilled discs in the rear. The vehicle's dimensions are substantial, measuring 126.6 inches in wheelbase, 208.2 inches in length, 76.9 inches in width, and 59.2 inches in height. It has a curb weight of 4992 pounds and features Pirelli P Zero tires with dimensions F: 255/35R-21 98Y MO-S and R: 285/30R-21 100Y MO-S. In the C/D test results, the S580 accelerated from 0-60 mph in 3.9 seconds and reached a top speed of 129 mph. Its quarter-mile time is 12.5 seconds at 114 mph. Braking performance is also notable, with distances of 168 ft and 350 ft recorded for 70-0 mph and 100-0 mph respectively.
